Balance						
ACCOUNT	DEBIT	CREDIT				
Cash	\$18 000					
Accounts receivable	1 000					
Office supplies	500					
Land	14 000					
Accounts payable		\$ 400				
Longval, capital	30 600*					
Longval, drawings	3 000

Rent expense, office	900					
Salary expense	1 100					
Electricity and gas expense	600					
Total	<u>\$70 400</u>	<u>\$9 200</u>				

^{*}Incorrect; should be listed as a credit.

To correct this error,

1. Take the difference between total debits and total credits:

2. Divide the error by 2:

\$61 200 / 2 = \$30 600

3. Locate \$30 600 on the trial balance. The Longval, capital account should have a credit balance.

Rent expense, office	1 200					
Salary expense	1 200					
Electricity and gas expense	200					
Total	<u>\$37 100</u>	<u>\$39 800</u>				

^{*}Incorrect; should be listed as \$3 000.

To correct this error,

1. Take the difference between total debits and total credits:

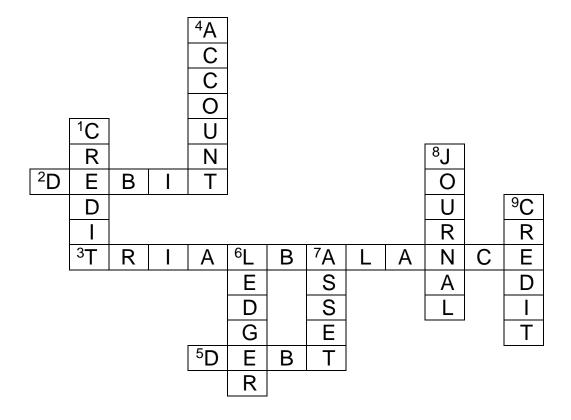

2. Divide the error by 9:

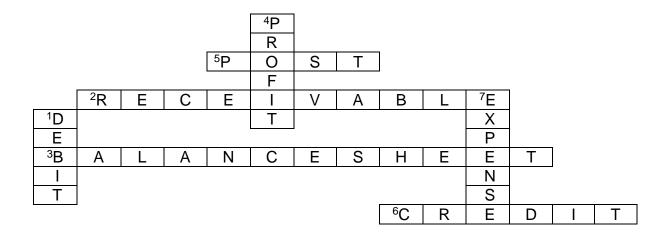

$$$2700 \div 9 = $300$$

3. Locate \$300 on the trial balance. The Nangle, drawings account holds the error. Trace the Nangle, drawings balance back to the ledger account, which shows the correct amount, \$3 000.

Recommendation: Discontinue the business, because profit falls below the target amount.

Double-entry bookkeeping has the advantage that it records both sides (the 'giving' side and the 'receiving' side) of a business transaction in the precise language of accounting, i.e. 'debits' and 'credits'. This allows for the exact description of balances in all accounts, and helps ensure that the entire system is always in balance.

Req. 2

The bank is not misusing the term *credit*. From the perspective of the bank's ledger, when you deposit money in the bank, the bank debits Cash (received from you) and credits a payable (payable to you on demand). It is this payable, a liability account, that is the source of the term *credit*. This is why a bank *credit* is good for the depositor. It means you have more money in the bank.

Focus on Ethics

Listing Dingo Downs on the ASX will mean greater public accountability and, in particular, greater levels of disclosure of financial and other information about the firm. It also requires attention to what is good corporate governance.

Listing on the ASX provides the benefit of greater access to potentially cheaper sources of long-term equity finance compared to debt finance. However, there are considerable costs of compliance to ASX listing rules.

The ASX requires compliance with IFRS and much additional detailed, continuous disclosure of events that may reflect on the interpretation of information contained in reports filed with the ASX. There are requirements for the disclosure of information about the remuneration of directors and other officers and many detailed rules concerning the periodic filing of financial information. There are additional requirements regarding the audit of annual reports and the certification of statements made concerning the business.

The ASX has issued detailed guidance on ethics and the governance of listed entities. Among the matters on which recommendations are given are disclosure of the functions of the Board, how performance of management is monitored and assessed, how management remuneration is determined, the code of conduct of the Board, company policy on continuous disclosure and financial risk management.

Listing therefore carries with it a considerable overhead.

Fraud Case

Req. 1

By changing an expense to an asset, the total expenses will decrease and profit will increase.

Req. 2

The CEO gained by earning a bonus, and the accounting manager may have gained by getting favourable treatment from the CEO. The shareholders of the firm lost, because the business paid out the bonus under fraudulent conditions.
