## ESSAY

**66.** Briefly describe the circumstances under which the guarantee of Canadians' rights and freedoms provided under the *Canadian Charter of Rights and Freedoms* is permitted to be limited.

### **Graders Info :**

Limitation of the guarantee of Canada's *Charter* rights and freedoms is allowed when the limitation is demonstrated to be justified under section 1 and by the use of the notwithstanding clause contained in section 33 of the *Charter*.

**67.** Briefly describe the benefits to be derived by businesses being aware of government policy and the status of regulations affecting their operations, as well as the consequences of being unaware of the same.

### **Graders Info :**

Businesses need to actively monitor government policy and regulations that affect how businesses are permitted to operate because either may be changed periodically. Awareness allows business to comply with laws and to attempt to influence development of policies and regulations to favour and further business interests. Being unaware of changes would result in noncompliance with regulations, levy of fines, or even closure of a business. Lack of awareness of government policy may also result in a missed opportunity to lobby government to change law or to take advantage of favourable change in law.

**68.** Briefly describe what is meant by the statement "the distinction between public and private law is not absolute" and provide an example that illustrates this statement.

### **Graders Info :**

The statement is referring to the fact that a single set of circumstances can have two sets of consequences, one involving private law and the other involving public law. For example, where a personal injury arises from an assault, the Crown may decide to prosecute the perpetrator of the assault under the Criminal Code. This is the domain of public law. The victim, however, also has civil rights that can be enforced through tort law, which is the area of private law. Specifically, the victim of the assault can initiate an action in the courts to seek financial compensation for damages from the perpetrator. Also, while most of the law of property is private, even if the government is buying,

selling, or leasing, should the government choose to exercise its executive right to expropriate land, for example, issues of public law would be involved.

**69.** Briefly describe the role of administrative bodies in the Canadian legal system and provide examples of particular bodies that impact businesses and their functions.

**Graders Info :**

It is often difficult to summarize how businesses are subject to administrative regulation because the nature and function of these bodies often vary. In some instances, the body or individual carries out purely administrative functions, as when the Canada Employment Insurance Commission processes a claim for benefits; sometimes the body also has judicial functions, such as when the Labour Relations Board settles a dispute between an employer and employee; sometimes the body exercises legislative functions, as when the Canadian Radio-television and Telecommunications Commission (CRTC) passes regulations concerning the amount of Canadian content on radio and TV; and sometimes the body has some combination of these functions.

Examples of particular bodies that might impact businesses include municipal licensing tribunals, which issue business permits; development zoning boards, which grant development permits; and labour relations boards, which regulate relationships between unionized workers and their employers.

**70.** Briefly describe the origins of the *common law system* and the *civil law system* as they exist in Canada and the comparable and contrasting characteristics of each system of law.

**Graders Info :**

The Quebec civil law system originated from the French legal system and was brought to Quebec by the French when they colonized the region. The Canadian common law system is rooted in England's legal system, which was established in all provinces excluding Quebec by the British when they conquered and colonized the Canadian regions of North America.

The key principle of common law is that laws are interpreted and applied in decisions of the court known as judgments. Judgments become precedents, which form the body of case law that must be referred to and applied by every judge hearing a similar matter when making a legal determination in a similar dispute involving the same laws.

The key principle of the civil law system is that the Quebec legislature makes civil law, and those laws are *codified* or compiled in one source known as the *Civil Code*. The judges' task in the civil code system is to find the specific provision in the code that applies to the case at hand, and to apply it to resolve the dispute. Civil code judges do not refer to past decisions at all.

Both systems are designed to deliver constant, consistent justice.

**71.** Identify the nature of the question that Rothmans would use to challenge Saskatchewan's power wall ban under its *Tobacco Control Act*. Briefly explain how the government of Saskatchewan would be required to respond to such a challenge. Identify and briefly explain what actions the Supreme

Court of Canada would take and the source of its authority to do so in the event that a Rothmans challenge was able to demonstrate that Saskatchewan's *Tobacco Control Act* violated a *Charter* provision and the provincial government failed to prove its legislation met the standard set by s. 1 of the *Charter*.

### **Graders Info :**

A challenge of the Saskatchewan legislation banning use of the power wall to advertise cigarette brands by Rothmans would involve the question of whether the provincial legislation violated the *Charter's* guarantee of freedom of expression. The Saskatchewan government would respond by arguing that such a violation is justified under s. 1 of the *Charter* due to both the provincial and federal governments pressing and substantial purpose, which is to prevent young people from becoming addicted to the drugs contained in cigarettes.

If Rothmans were able to demonstrate that Saskatchewan's *Tobacco Control Act* violated a *Charter* provision and the government failed to prove that its legislation met the standard set by s. 1, the court would be entitled to strike down the province's legislation by declaring it to be of no force and effect because it is unconstitutional. The court's authority to order such a powerful remedy is set out s. 24 and s. 52 of the *Charter*.

**72.** The application of precedent in a common law system is subject to a number of rules. Outline the rules judges must apply when considering how much weight to give a precedent case.

### **Graders Info :**

The rules governing the application of precedent to a particular case include the following:

- A lower court must follow a relevant precedent created by a higher court within the same jurisdiction.
- Not all precedents are of equal value-the higher the court that created the precedent, the more valued the decision is.
- The Supreme Court of Canada-the highest court in Canada-is entitled to decide a case in any way it sees fit.
