Name _____

MULTIPLE CHOICE. Choose the one alternative that best completes the statement or answers the question.

1) Scarcity

- A) stems from the incompatibility between limited resources and unlimited wants.
- B) can be overcome by discovering new resources.
- C) can be eliminated by rationing products.
- D) is a bigger problem in market economies than in socialist economies.

Answer: A production possibility frontier is a curve showing the maximum attainable combinations of two products that may be produced with available resources and current technology. Points along a production possibility frontier are attainable with the resources available and are efficient. Points inside the frontier are attainable but inefficient. Points outside the frontier are unattainable.
