

CH 02 - Descriptive Statistics: Tabular/Graphical

1. A frequency distribution is a tabular summary of data showing the
- fraction of items in several classes.
 - percentage of items in several classes.
 - relative percentage of items in several classes.
 - number of items in several classes.

ANSWER: d

POINTS: 1

DIFFICULTY: Easy

LEARNING OBJECTIVES: BSST.ASWC.17.02.01 - Summarizing data for a categorical variable

NATIONAL STANDARDS: United States - BUSPROG: Analytic

STATE STANDARDS: United States - AK - DISC: Descriptive Statistics

KEYWORDS: Bloom's: Remember

2. A frequency distribution is
- a tabular summary of a set of data showing the relative frequency.
 - a graphical form of representing data.
 - a tabular summary of a set of data showing the frequency of items in each of several nonoverlapping classes.
 - a graphical device for presenting categorical data.

ANSWER: c

POINTS: 1

DIFFICULTY: Easy

LEARNING OBJECTIVES: BSST.ASWC.17.02.01 - Summarizing data for a categorical variable

NATIONAL STANDARDS: United States - BUSPROG: Analytic

STATE STANDARDS: United States - AK - DISC: Descriptive Statistics

KEYWORDS: Bloom's: Remember

3. A tabular summary of a set of data showing the fraction of the total number of items in several classes is a
- frequency distribution.
 - relative frequency distribution.
 - cumulative relative frequency distribution.
 - cumulative frequency distribution.

ANSWER: b

POINTS: 1

DIFFICULTY: Easy

LEARNING OBJECTIVES: BSST.ASWC.17.02.01 - Summarizing data for a categorical variable

NATIONAL STANDARDS: United States - BUSPROG: Analytic

STATE STANDARDS: United States - AK - DISC: Descriptive Statistics

KEYWORDS: Bloom's: Understand

4. The percent frequency of a class is computed by
- multiplying the relative frequency by 10.
 - dividing the relative frequency by 100.
 - multiplying the relative frequency by 100.
 - adding 100 to the relative frequency.

CH 02 - Descriptive Statistics: Tabular/Graphical

ANSWER: c

POINTS: 1

DIFFICULTY: Easy

LEARNING OBJECTIVES: BSST.ASWC.17.02.01 - Summarizing data for a categorical variable

NATIONAL STANDARDS: United States - BUSPROG: Analytic

STATE STANDARDS: United States - AK - DISC: Descriptive Statistics

KEYWORDS: Bloom's: Remember

5. The relative frequency of a class is computed by
- dividing the midpoint of the class by the sample size.
 - dividing the frequency of the class by the midpoint.
 - dividing the sample size by the frequency of the class.
 - dividing the frequency of the class by the sample size.

ANSWER: d

POINTS: 1

DIFFICULTY: Easy

LEARNING OBJECTIVES: BSST.ASWC.17.02.01 - Summarizing data for a categorical variable

NATIONAL STANDARDS: United States - BUSPROG: Analytic

STATE STANDARDS: United States - AK - DISC: Descriptive Statistics

KEYWORDS: Bloom's: Remember

6. The sum of frequencies for all classes will always equal
- 1.
 - the number of elements in a data set.
 - the number of classes.
 - a value between 0 and 1.

ANSWER: b

POINTS: 1

DIFFICULTY: Easy

LEARNING OBJECTIVES: BSST.ASWC.17.02.01 - Summarizing data for a categorical variable

NATIONAL STANDARDS: United States - BUSPROG: Analytic

STATE STANDARDS: United States - AK - DISC: Descriptive Statistics

KEYWORDS: Bloom's: Remember

7. Fifteen percent of the students in a school of Business Administration are majoring in Economics, 20% in Finance, 35% in Management, and 30% in Accounting. The graphical device(s) which can be used to present these data is (are)
- a line chart.
 - only a bar chart.
 - only a pie chart.
 - both a bar chart and a pie chart.

ANSWER: d

POINTS: 1

DIFFICULTY: Easy

LEARNING OBJECTIVES: BSST.ASWC.17.02.01 - Summarizing data for a categorical variable

CH 02 - Descriptive Statistics: Tabular/Graphical

NATIONAL STANDARDS: United States - BUSPROG: Analytic

STATE STANDARDS: United States - AK - DISC: Descriptive Statistics

KEYWORDS: Bloom's: Understand

8. A cumulative relative frequency distribution shows

- the proportion of data items with values less than or equal to the upper limit of each class.
- the proportion of data items with values less than or equal to the lower limit of each class.
- the percentage of data items with values less than or equal to the upper limit of each class.
- the percentage of data items with values less than or equal to the lower limit of each class.

ANSWER: a

POINTS: 1

DIFFICULTY: Easy

LEARNING OBJECTIVES: BSST.ASWC.17.02.02 - Summarizing data for a quantitative variable

NATIONAL STANDARDS: United States - BUSPROG: Analytic

STATE STANDARDS: United States - AK - DISC: Descriptive Statistics

KEYWORDS: Bloom's: Remember

9. The sum of the relative frequencies for all classes will always equal

- the sample size.
- the number of classes.
- one.
- any value larger than one.

ANSWER: c

POINTS: 1

DIFFICULTY: Easy

LEARNING OBJECTIVES: BSST.ASWC.17.02.01 - Summarizing data for a categorical variable

BSST.ASWC.17.02.02 - Summarizing data for a quantitative variable

NATIONAL STANDARDS: United States - BUSPROG: Analytic

STATE STANDARDS: United States - AK - DISC: Descriptive Statistics

KEYWORDS: Bloom's: Remember

10. The sum of the percent frequencies for all classes will always equal

- one.
- the number of classes.
- the number of items in the study.
- 100.

ANSWER: d

POINTS: 1

DIFFICULTY: Easy

LEARNING OBJECTIVES: BSST.ASWC.17.02.01 - Summarizing data for a categorical variable

BSST.ASWC.17.02.02 - Summarizing data for a quantitative variable

NATIONAL STANDARDS: United States - BUSPROG: Analytic

STATE STANDARDS: United States - AK - DISC: Descriptive Statistics

KEYWORDS: Bloom's: Remember

CH 02 - Descriptive Statistics: Tabular/Graphical

11. The most common graphical presentation of quantitative data is a
- histogram.
 - bar chart.
 - stem and leaf display.
 - pie chart.

ANSWER: a

POINTS: 1

DIFFICULTY: Easy

LEARNING OBJECTIVES: BSST.ASWC.17.02.02 - Summarizing data for a quantitative variable

NATIONAL STANDARDS: United States - BUSPROG: Analytic

STATE STANDARDS: United States - AK - DISC: Descriptive Statistics

KEYWORDS: Bloom's: Remember

12. The total number of data items with a value less than the upper limit for the class is given by the
- frequency distribution.
 - relative frequency distribution.
 - cumulative frequency distribution.
 - cumulative relative frequency distribution.

ANSWER: c

POINTS: 1

DIFFICULTY: Easy

LEARNING OBJECTIVES: BSST.ASWC.17.02.02 - Summarizing data for a quantitative variable

NATIONAL STANDARDS: United States - BUSPROG: Analytic

STATE STANDARDS: United States - AK - DISC: Descriptive Statistics

KEYWORDS: Bloom's: Understand

13. The relative frequency of a class is computed by
- dividing the cumulative frequency of the class by n .
 - dividing n by cumulative frequency of the class.
 - dividing the frequency of the class by n .
 - dividing the frequency of the class by the number of classes.

ANSWER: c

POINTS: 1

DIFFICULTY: Easy

LEARNING OBJECTIVES: BSST.ASWC.17.02.01 - Summarizing data for a categorical variable

NATIONAL STANDARDS: United States - BUSPROG: Analytic

STATE STANDARDS: United States - AK - DISC: Descriptive Statistics

KEYWORDS: Bloom's: Remember

14. The difference between the lower class limits of adjacent classes provides the
- number of classes.
 - class limits.
 - class midpoint.
 - class width.

CH 02 - Descriptive Statistics: Tabular/Graphical

ANSWER: d

POINTS: 1

DIFFICULTY: Easy

LEARNING OBJECTIVES: BSST.ASWC.17.02.02 - Summarizing data for a quantitative variable

NATIONAL STANDARDS: United States - BUSPROG: Analytic

STATE STANDARDS: United States - AK - DISC: Descriptive Statistics

KEYWORDS: Bloom's: Remember

15. In a cumulative frequency distribution, the last class will always have a cumulative frequency equal to

- a. one.
- b. 100%.
- c. the total number of elements in the data set.
- d. 10.

ANSWER: c

POINTS: 1

DIFFICULTY: Easy

LEARNING OBJECTIVES: BSST.ASWC.17.02.02 - Summarizing data for a quantitative variable

NATIONAL STANDARDS: United States - BUSPROG: Analytic

STATE STANDARDS: United States - AK - DISC: Descriptive Statistics

KEYWORDS: Bloom's: Remember

16. In a cumulative relative frequency distribution, the last class will have a cumulative relative frequency equal to

- a. one.
- b. zero.
- c. the total number of elements in the data set.
- d. the total of classes in the data set.

ANSWER: a

POINTS: 1

DIFFICULTY: Easy

LEARNING OBJECTIVES: BSST.ASWC.17.02.02 - Summarizing data for a quantitative variable

NATIONAL STANDARDS: United States - BUSPROG: Analytic

STATE STANDARDS: United States - AK - DISC: Descriptive Statistics

KEYWORDS: Bloom's: Remember

17. In a cumulative percent frequency distribution, the last class will have a cumulative percent frequency equal to

- a. one.
- b. 100.
- c. the total number of elements in the data set.
- d. None of these alternatives is correct.

ANSWER: b

POINTS: 1

DIFFICULTY: Easy

LEARNING OBJECTIVES: BSST.ASWC.17.02.02 - Summarizing data for a quantitative variable

NATIONAL STANDARDS: United States - BUSPROG: Analytic

CH 02 - Descriptive Statistics: Tabular/Graphical

STATE STANDARDS: United States - AK - DISC: Descriptive Statistics

18. Data that provide labels or names for categories of like items are known as

- a. categorical data.
- b. quantitative data.
- c. label data.
- d. category data.

ANSWER: a

POINTS: 1

DIFFICULTY: Easy

LEARNING OBJECTIVES: BSST.ASWC.17.02.01 - Summarizing data for a categorical variable

NATIONAL STANDARDS: United States - BUSPROG: Analytic

STATE STANDARDS: United States - AK - DISC: Descriptive Statistics

KEYWORDS: Bloom's: Remember

19. In a scatter diagram, a line that provides an approximation of the relationship between the variables is known as a

- a. determination line.
- b. trend line.
- c. correlation axis.
- d. zero-bias line.

ANSWER: b

POINTS: 1

DIFFICULTY: Easy

LEARNING OBJECTIVES: BSST.ASWC.17.02.04 - Summarizing data for two variables using graphical displays

NATIONAL STANDARDS: United States - BUSPROG: Analytic

STATE STANDARDS: United States - AK - DISC: Descriptive Statistics

KEYWORDS: Bloom's: Remember

20. A histogram is

- a. a graphical presentation of a frequency or relative frequency distribution.
- b. a graphical method of presenting a cumulative frequency or a cumulative relative frequency distribution.
- c. the history of data elements.
- d. the same as a pie chart.

ANSWER: a

POINTS: 1

DIFFICULTY: Easy

LEARNING OBJECTIVES: BSST.ASWC.17.02.02 - Summarizing data for a quantitative variable

NATIONAL STANDARDS: United States - BUSPROG: Analytic

STATE STANDARDS: United States - AK - DISC: Descriptive Statistics

KEYWORDS: Bloom's: Remember

21. Which of the following is a graphical summary of a set of data in which each data value is represented by a dot above the axis?

CH 02 - Descriptive Statistics: Tabular/Graphical

- a. Histogram
- b. Box plot
- c. Dot plot
- d. Crosstabulation

ANSWER: c

POINTS: 1

STATE STANDARDS: United States - AK - DISC: Descriptive Statistics

KEYWORDS: Bloom's: Apply

45. The ACT scores of a sample of business school students and their genders are shown below.

Gender	ACT Scores			Total
	Less than 20	20 up to 25	25 and more	
Female	24	168	48	240
Male	40	96	24	160
Total	64	264	72	400

- How many students scored less than 20?
- How many students were female?
- Of the male students, how many scored 25 or more?
- Compute row percentages and comment on any relationship that may exist between ACT scores and gender of the individuals.
- Compute column percentages.

ANSWER:

- 64
- 240
- 24

Gender	ACT Scores			Total
	Less than 20	20 up to 25	25 and more	
Female	10%	70%	20%	100%
Male	25%	60%	15%	100%

From the above percentages it can be noted that the largest percentages of both genders' ACT scores are in the 20 to 25 range. However, 70% of females and only 60% of males have

CH 02 - Descriptive Statistics: Tabular/Graphical

ACT scores in this range. Also it can be noted that 10% of females' ACT scores are under 20, whereas, 25% of males' ACT scores fall in this category.

e.

Gender	SAT Scores		
	Less than 20	20 up to 25	25 and more
Female	37.5%	63.6%	66.7%
Male	62.5%	36.4%	33.3%
Total	100%	100%	100%

KEYWORDS: Bloom's: Apply

53. A survey of 400 college seniors resulted in the following crosstabulation regarding their undergraduate major and whether or not they plan to go to graduate school.

Graduate School	Undergraduate Major			Total
	Business	Engineering	Others	
Yes	35	42	63	140
No	91	104	65	260
Total	126	146	128	400

- Are a majority of the seniors in the survey planning to attend graduate school?
- Which discipline constitutes the majority of the individuals in the survey?
- Compute row percentages and comment on the relationship between the students' undergraduate major and their intention of attending graduate school.
- Compute the column percentages and comment on the relationship between the students' intention of going to graduate school and their undergraduate major.

ANSWER:

- No, majority (260) will not attend graduate school
- Majority (146) are engineering majors
-

Graduate School	Undergraduate Major			Total
	Business	Engineering	Others	
Yes	25%	30%	45%	100%
No	35%	40%	25%	100%

Majority who plan to go to graduate school are from "Other" majors. Majority of those who will not go to graduate school are engineering majors.

d.

Graduate School	Undergraduate Major		
	Business	Engineering	Others
Yes	27.8%	28.8%	49.2%
No	72.2%	71.2%	50.8%
Total	100%	100%	100%

Approximately the same percentages of Business and engineering majors plan to attend graduate school (27.8% and 28.8% respectively). Of the "Other" majors approximately half (49.2%) plan to go to graduate school.
