## CHAPTER LEARNING OBJECTIVES

1. **Identify the activities and users associated with accounting.** Accounting is an information system that identifies, records, and communicates the economic events of an organization to interested users. The major users and uses of accounting are as follows: (a) Management uses accounting information to plan, organize, and run the business. (b) Investors (owners) decide whether to buy, hold, or sell their financial interests on the basis of accounting data. (c) Creditors (suppliers and bankers) evaluate the risks of granting credit or lending money on the basis of accounting information. Other groups that use accounting information are taxing authorities, regulatory agencies, customers, and labor unions.
2. **Explain the building blocks of accounting: ethics, principles, and assumptions.** Ethics are the standards of conduct by which actions are judged as right or wrong. Effective financial reporting depends on sound ethical behavior. Generally accepted accounting principles are a common set of standards used by accountants. The monetary unit assumption requires that companies include in the accounting records only transaction data that can be expressed in terms of money. The economic entity assumption requires that the activities of each economic entity be kept separate from the activities of its owners and other economic entities.
3. **State the accounting equation, and define its components.** The basic accounting equation is:

$$\text{Assets} = \text{Liabilities} + \text{Stockholders' Equity}$$

Assets are resources owned by a business. Liabilities are creditorship claims on total assets. Stockholders' equity is the ownership claim on total assets.

The expanded accounting equation is:

$$\text{Assets} = \text{Liabilities} + \text{Common Stock} + \text{Revenues} - \text{Expenses} - \text{Dividends}$$

Common stock is affected when the company issues new shares of stock in exchange for cash. Revenues are increases in assets resulting from income-earning activities. Expenses are the costs of assets consumed or services used in the process of earning revenue. Dividends are payments the company makes to its stockholders.

4. **Analyze the effects of business transactions on the accounting equation.** Each business transaction must have a dual effect on the accounting equation. For example, if an individual asset increases, there must be a corresponding (1) decrease in another asset, or (2) increase in a specific liability, or (3) increase in stockholders' equity.
5. **Describe the four financial statements and how they are prepared.** An income statement presents the revenues and expenses, and resulting net income or net loss, for a specific period of time. A retained earnings statement summarizes the changes in retained earnings for a specific period of time. A balance sheet reports the assets, liabilities, and stockholders' equity at a specific date. A statement of cash flows summarizes information about the cash inflows (receipts) and outflows (payments) for a specific period of time.
- <sup>a</sup>6. **Explain the career opportunities in accounting.** Accounting offers many different jobs in fields such as public and private accounting, governmental accounting, and forensic accounting. Accounting is a popular major because there are many different types of jobs, with unlimited potential for career advancement.

At the beginning of 2018, Hold Steady Company had total assets of \$520,000 and total liabilities of \$250,000. Answer each of the following questions.

1. If total assets increased \$60,000 and stockholders' equity decreased \$90,000 during the year, determine the amount of total liabilities at the end of the year.
2. During the year, total liabilities decreased \$75,000 and stockholders' equity increased \$50,000. Compute the amount of total assets at the end of the year.
3. If total assets decreased \$100,000 and total liabilities increased \$55,000 during the year, determine the amount of stockholders' equity at the end of the year.

**Solution 209**

1. Ending Total Liabilities =  $(\$520,000 + \$60,000) - (\$520,000 - \$250,000 - \$90,000)$   
=  $\$580,000 - \$180,000 = \$400,000$
2. Ending Total Assets =  $(\$250,000 - \$75,000) + (\$520,000 - \$250,000 + \$50,000)$   
=  $\$175,000 + \$320,000 = \$495,000$
3. Ending Stockholders' Equity =  $(\$520,000 - \$100,000) - (\$250,000 + \$55,000)$   
=  $\$420,000 - \$305,000 = \$115,000$

The accounting profession provides many career opportunities for individuals. Identify the major fields that exist in accounting and comment on the major functions performed by individuals in each of these areas.

### \*Solution 251

The major fields that exist in accounting are in the areas of (1) public accounting, (2) private accounting, and (3) not-for-profit accounting. In public accounting, an accountant may practice as: (1) an auditor who examines the financial statements of companies and expresses an opinion as to the fairness of presentation; (2) a tax specialist who gives tax advice, prepares tax returns, and represents clients before governmental agencies; and (3) a management accountant who engages in the development of accounting and computer systems and the design of organizational systems.

Private (managerial) accountants perform many different activities within a company. Private accountants may be involved in: cost accounting, budgeting, general financial accounting, accounting information systems, and tax accounting.

The framework used to record and summarize the economic activities of a business enterprise is referred to as the accounting equation. State the basic accounting equation and define its major components. How are business transactions and financial statements related to the accounting equation?

### Solution 252

The basic accounting equation is expressed as follows:

$$\text{Assets} = \text{Liabilities} + \text{Stockholders' Equity}$$

Assets are defined as resources owned by the business. Liabilities are creditors' claims against the assets of the business; or simply put, liabilities are existing debts and obligations. Stockholders' equity is the ownership claim on the total assets of the business; it is equal to total assets minus total liabilities.

Business transactions are economic events and activities that affect the elements of the basic accounting equation; that is, transactions cause increases or decreases in the assets, liabilities, and stockholders' equity. The financial statements report the results and effects of transactions on the business' assets, liabilities, and stockholders' equity. The balance sheet is a summary expression of the basic accounting equation.

Your friend, Angela, made this comment:

My major is biology and I plan to research for cures for major illnesses. Thus, I have no need to study accounting.

What is your response to Angela?

**Solution 253**

Angela, you are entering a dynamic profession and you have the opportunity to make important contributions to society. While science will be your profession and major concern, you will not be able to escape the need to understand accounting. Accounting staff and professionals will always be available to assist you. Here are some areas that will directly affect you:

As a manager, you will need to review accounting information (both internal and external) and make decisions. Budgets will be an important part of your research activities. As an employee, you will be concerned about the financial information of your employer. Thus, you will need to be able to read the company's financial statements. Also, as an investor, you will be interested in the financial statements of other companies.

You will probably not be a preparer of the financial statements, but you do need an understanding of how they are prepared. You also need a good understanding of how to interpret the information on the financial statements.

**S-A E 254**

The information needs of a specific user of financial accounting information depends upon the kinds of decisions that user makes. Identify the major users of accounting information and discuss what questions financial accounting information answers for each group of users.

**Solution 254**

The major users of accounting information are internal users and external users. Internal users are those who manage the business. External users are those outside the business who have either a present or potential financial interest.

Financial accounting information may answer the following questions for internal users:

1. Is cash sufficient to pay our debts?
2. Can we afford to give employee pay raises this year?
3. What is the cost of manufacturing each unit of product?
4. Which product line is the most profitable?

Questions answered by financial accounting information for external users include:

1. Is the company earning satisfactory income?
2. How does the company compare in size and profitability with competitors?
3. Will the company be able to pay its debts as they come due?

**S-A E 255** (Ethics)

Joanna Newsom owns and operates Joanna's Burgers, a small fast food store, located at the edge of City College campus in Newton, Ohio. After several very profitable years, Joanna's Burgers began to have problems. Most of the problems were related to Joanna's expansion of the eating area in the restaurant without corresponding increases in the food preparation area. Joanna does not have the cash or financial backing to expand further. She has therefore decided to sell her business.

Vivian Girls is interested in purchasing the business. However, she is located in another city and is unfamiliar with Newton. She has asked Joanna why she is selling Joanna's Burgers. Joanna replies that her elderly mother requires extra care, and that her brother needs help in his manufacturing business. Both are true, but neither is her primary reason for selling. Joanna reasons that Vivian should not have asked her anyway, since profitable businesses don't come up for sale.

**Required:**

1. Identify the stakeholders in this situation.
2. Did Joanna act ethically in not revealing fully her reasons for selling the business? Why or why not?

**Solution 255**

1. The stakeholders include  
Joanna Newsom  
Vivian Girls  
Newton, Ohio  
Students of City College  
City College  
Persons financing the purchase of Sam's Burgers
2. Joanna did not act ethically in not revealing fully her reasons for selling the business. Students might be of the opinion that a purchaser should investigate a business before purchasing it, rather than relying entirely on the seller's assertions. However, students should realize that Joanna should have said something about her problems. She might ethically be allowed to put these in the best possible light, perhaps, but failure to disclose them at all is certainly unethical. This is especially true, since family concerns might well cause someone to sell a business that is otherwise doing well. Joanna has shown an intent to deceive that is unethical, and might be actionable in court as well.

Rachel Bells Havens is a friend of yours from high school. She decided to become a beautician after leaving high school, rather than to attend college. She recently opened her own shop, and has contracted her services to a local hospital. She is paid a monthly fee for her services, and receives a small gratuity from each of the patients.

She has just received her first set of financial statements from her accountant. She is quite upset. The statements show a cash balance of \$3,600 at the end of the month, but a net income of only \$500. She has written you a letter, asking you whether such a situation is possible, or whether she should find another accountant.

**Required:**

Write a short letter to your friend. Use proper form. Answer her question completely, but briefly.

**Solution 256**

Answers will vary. The instructor's requirements concerning proper form should be followed. The letter may be either business or personal. As a minimum, the letter should be in a recognizable form, and proper grammar and spelling should be used. A suggested personal letter follows:

1245 Lily Lane  
Buena Vista, AR 77661  
(Date)

Dear Rachel,

Congratulations on opening your business! I am sure you will do well, combining your creative genius with your talent for serving others.

You asked about your financial statements. Of course, you realize that I am just an accounting student, but I do know that it is possible to have a large cash balance and little net income. You may have had expenses that were not paid in cash yet. These expenses reduce your income, but not your cash.

I think that you should discuss the statements with the accountant who prepared them. He or she will be in the best position to explain the results.

Thanks for the question. It really made me think.

Sincerely,  
(signature)

## CHALLENGE EXERCISES

### CE 1

The total assets and liabilities of Company at January 1 and December 31, 2018 are presented below.

	January 1	December 31
Assets	\$95,000	\$140,000
Liabilities	30,000	36,000

#### Instructions:

1. Assume dividends of \$10,800 were paid and no additional stock was issued during the year. Revenues were \$110,000. Compute (a) net income, and (b) expenses.
2. Assume additional stock was issued for \$4,800 and no dividends were paid during the year. Expenses were \$42,000. Compute (a) net income, and (b) revenues.
3. Assume additional stock was issued for \$62,000 and dividends of \$15,600 were paid during the year. Compute net income.
4. Assume additional stock was issued for \$6,000 and net income was \$51,000. Compute dividends paid.

#### Solution CE 1

1. a. January 1 stockholders' equity =  $\$95,000 - \$30,000 = \$65,000$ .  
 December 31 stockholders' equity =  $\$140,000 - \$36,000 = \$104,000$ .  
 The change in stockholders' equity =  $\$104,000 - \$65,000 = \$39,000$ .  
 $\$39,000 = \text{Net income} + \text{investments by owners} - \text{dividends}$ .  
 $\$39,000 = \text{NI} + \$0 - \$10,800$ .  
 NI = \$49,800.
  - b. Revenues – expenses = net income.  
 $\$110,000 - \text{expenses} = \$49,800$ .  
 Expenses = \$60,200.
2. a. January 1 stockholders' equity =  $\$95,000 - \$30,000 = \$65,000$ .  
 December 31 stockholders' equity =  $\$140,000 - \$36,000 = \$104,000$ .  
 The change in stockholders' equity =  $\$104,000 - \$65,000 = \$39,000$ .  
 $\$39,000 = \text{Net income} + \text{investments by owners} - \text{dividends}$ .  
 $\$39,000 = \text{NI} + \$4,800 - \$0$ .  
 NI = \$34,200.
  - b. Revenues – expenses = net income.  
 $\text{Revenues} - \$42,000 = \$34,200$ .  
 Revenues = \$76,200.
3. a. January 1 stockholders' equity =  $\$95,000 - \$30,000 = \$65,000$ .  
 December 31 stockholders' equity =  $\$140,000 - \$36,000 = \$104,000$ .  
 The change in stockholders' equity =  $\$104,000 - \$65,000 = \$39,000$ .  
 $\$39,000 = \text{Net income} + \text{investments by owners} - \text{dividends}$ .  
 $\$39,000 = \text{NI} + \$62,000 - \$15,600$ .  
 NI = \$7,400. (a net loss).

**Solution CE 1** (cont.)

4. a. January 1 stockholders' equity = \$95,000 – \$30,000 = \$65,000.  
 December 31 stockholders' equity = \$140,000 – \$36,000 = \$104,000.  
 The change in stockholders' equity = \$104,000 – \$65,000 = \$39,000.  
 \$39,000 = Net income + investments by owners – dividends.  
 \$39,000 = \$51,000 + \$6,000 – dividends.  
 Dividends = \$18,000.
