Answer: TRUE

Diff: 2

Objective: LO 1-4

1.4-64) Retained earnings and cash on the balance sheet will always be equal.

Answer: FALSE

Diff: 3

Objective: LO 1-4

1.4-65) Explain the purpose of each financial statement and the type of information found in each statement.

Answer: The four financial statements are called the balance sheet, income statement, statement of changes in shareholders' equity, and statement of cash flows. The purpose of the balance sheet is to present the financial situation of a company as of a specific date. It lists the assets, or what a business owns; the liabilities, or the amount owed to creditors; and shareholder's equity, the residual ownership, or what the owners of a business own free and clear.

The income statement is also called a profit and loss statement. It lists the sales revenues of a business. Then expenses incurred to run the business are subtracted from sales revenues. The result is either a profit or loss from running the business.

The statement of changes in shareholder's equity describes the changes in shareholder's equity during an accounting period. There are two sections: one which shows the change in contributed capital and the other which starts with beginning retained earnings then adds net income and subtracts distributions to owners to arrive at an ending retained earnings.

The statement of cash flows presents all of the cash coming into a business and all of the cash going out of a business during an accounting period. The cash transactions are grouped into operating, investing, and financing activities. Operating activities are the day-to-day activities involved in running a business. Investing activities involve the buying or selling of equipment used to run the business. Financing activities involve raising money from outside the business, such as borrowing money from a bank and repaying these amounts. Taken together, these financial statements provide business owners with a picture of how well their business is doing financially.

Diff: 2

Skill: Communication abilities

Objective: LO 1-4

1.4-66) Describe the format of the balance sheet.

Answer: The balance sheet is composed of assets and claims on assets. The claims on assets are called liabilities and shareholders' equity.

Diff: 1

Skill: Communication abilities

Objective: LO 1-4

1.4-67) Describe the format of the income statement.

Answer: The income statement is composed of revenues earned from the sales of goods and services. Expenses incurred in generating sales are subtracted from revenues. The result is either a profit or loss.

Diff: 1

Skill: Communication abilities

Objective: LO 1-4

1.4-68) Describe the format of the statement of changes in shareholders' equity.

Answer: The statement of changes in shareholders' equity starts with a beginning balance of retained earnings. Net income is added or net loss is subtracted, and dividends are then subtracted in order to determine the ending balance. The statement also shows changes in contributed capital.

Diff: 1

Skill: Communication abilities

Objective: LO 1-4

1.4-69) Describe the format of the statement of cash flows.

Answer: The statement of cash flows shows all the cash collected and all the cash disbursed during an accounting period. The transactions are grouped according to operating, investing, and financing activities.

Diff: 1

Skill: Communication abilities

Objective: LO 1-4

1.4-70) What are the four financial statements? What information does each provide?

Answer: The four financial statements are the balance sheet, income statement, statement of changes in shareholders' equity, and statement of cash flows. The balance sheet shows assets, liabilities and shareholders' equity at a specific point in time. The income statement presents revenues minus expenses for an accounting period. The statement of changes in shareholders' equity explains the change in the shareholders' equity balances. It presents the beginning balance of retained earnings, to which net income is added or net loss is subtracted, then dividends are subtracted in order to determine the ending balance. It also shows changes in contributed capital. The statement of cash flows shows the amounts of cash coming into or going out of a business. Transactions are organized into operating, investing, and financing activities.

Objective: LO 1-4

1.4-82) Review the following balance sheet and answer the following questions.

Barry Rich, CPA			
Balance Sheet			
April 30, 2012			
	Assets		Liabilities
Cash	\$2,430	Note Payable	\$3,000
Supplies	1,690	Shareholders' equity	
Equipment	<u>7,500</u>	Contributed capital	\$5,000
		Retained Earnings	<u>3,620</u>
		Total Shareholders' equity	<u>8,620</u>
Total assets	\$11,620	Total liabilities and shareholders' equity	<u>\$11,620</u>

1. Is this business a sole proprietorship, partnership, or corporation? How do you know?
2. Who has claims to the assets owned by the business and how much are they?
3. Assume that April is the first month of operations and no dividends were given to the owner. How much net income was earned during April?
4. Using this balance sheet, describe what Barry Rich did during the first month of running his business.

Answer:

1. This is a corporation. Only corporations have retained earnings and shareholders' equity.
2. Creditors have claims to \$3,000, and Barry has claim to \$8,620.
3. Since this is the first month of operations, the business started with a zero balance in retained earnings. Therefore, the amount of retained earnings indicates that the business earned \$3,620 since there were no dividends.
4. Barry started the business by investing \$5,000 of his own money. He also borrowed \$3,000. He purchased \$7,500 worth of equipment. In running the business, he ended up with \$2,430 in cash and \$1,690 in supplies. He made a profit of \$3,620.

1.5-7) Review the following income statement for Up Against the Wall, a wallpaper store. Then answer the following questions.

Up Against the Wall
Income Statement
For the Month Ended July 31, 2012

Revenues	\$17,440	
Cost of goods sold	<u>(6,975)</u>	
Gross profit		\$10,465
Expenses		
Rent	\$ 1,650	
Wages	1,369	
Advertising	<u>830</u>	
Total expenses		<u>(3,840)</u>
Net income		<u>\$6,625</u>

- a. What does gross profit represent?
 - b. Can you tell whether or not the expenses are reasonable compared to the amount of income?
 - c. Ms. Machier, the owner of Up Against the Wall, is looking for a partner. As a potential investor, does this income statement present a favorable or unfavorable impression of the success of the business?
 - d. What other information would you require before you invested in this business?
- Answer: a. Gross profit is the first profit. It is calculated by subtracting cost of goods sold from revenues. It represents the markup on the cost of inventory sold.

b. No.

c. This income statement presents a favorable impression.

d. Investors would ask to see a balance sheet, statement of cash flows, and a statement of changes in shareholders' equity in order to evaluate the success of a business more fully.

Skill: Analytic skills

Objective: LO 1-5

1.5-8) Adam Key started a lock service out of his house. It is profitable, but the latest statement of changes in shareholders' equity shows a decrease. Review the statement and advise Adam on what the business should do.

Adam Key's Locks
Statement of Changes in Shareholders' Equity
For the Month of September 30, 2012

Beginning contributed capital	\$40,000
Add: Capital contributed during the month	<u>0</u>
Ending contributed capital	\$40,000
Beginning retained earnings	\$27,000
Add: Net income	3,000
Less: dividends	<u>(3,500)</u>
Ending retained earnings	<u>\$26,500</u>

Answer: Adam is drawing more money out of the business than he is making in profit. If he wants to grow the business, he will have to take out less than the business makes.

Diff: 1

Objective: LO 1-5

1.5-9) Tina is worried about the current financial state of Team Shirts, Inc. Her latest statement of cash flows shows a net decrease in cash. Review and analyze the following summary statement. Is Tina's business in trouble? Should she be worried? What should she do to improve the cash flow situation?

Team Shirts, Inc.
Statement of Cash Flows
For the Month of March 31, 2012

Cash from operating activities:	\$ 1,200
Cash used for investing activities:	(1,650)
Cash used for financing activities:	<u>(2,000)</u>
Net decrease in cash	<u><u>\$(2,450)</u></u>

Answer: Cash from operating activities is positive. This means that Team Shirts is generating more in cash sales than it is spending to run the business. This is a sign of a healthy business. Cash used for investing is negative. This shows that Team Shirts is investing in the future by spending money on new equipment used to run the business. This is a sign that the business is growing. Cash used for financing means that Team Shirts has either paid off a debt or paid dividends to shareholders. Repayment of debt is a healthy business practice. Paying dividends to investors is also a good business practice.

This cash flow picture is normal for a new business. However, to conserve cash, Team Shirts should consider using credit to buy new equipment or postponing such purchases until the business has more cash. It could also forgo paying cash dividends until more cash is generated from operating activities.

1.5-12) Below is an income statement for Daily Kneads. Fill in the missing amounts.

Daily Kneads
Income Statement
For the Month Ended September 30, 2012

Sales	a. _____
Cost of goods sold	\$100,000
Gross profit	\$200,000
Administrative expenses	b. _____
Operating income	\$80,000
Interest expense	c. _____
Earnings before taxes	\$70,000
Income taxes (rate 35%)	d. _____
Net income	e. _____

Answer:

a. $\$200,000 + 100,000 = \$300,000$

b. $\$200,000 - 80,000 = \$120,000$

c. $\$80,000 - 70,000 = \$10,000$

d. $\$70,000 \times .35 = \$24,500$

e. $\$70,000 - 24,500 = \$45,500$

Learning Objective 1-6

1.6-1) Good business planning involves the identification of risks such as operating risks and financial risks.

Answer: TRUE

Diff: 2

Objective: LO 1-6

1.6-2) Managers are required to maximize shareholders' equity in the business, which often requires them to "cook the books."

Answer: FALSE

Diff: 1

Skill: Ethical understanding and reasoning abilities

Objective: LO 1-6

1.6-3) A control is an activity performed to minimize or eliminate risk.

Answer: TRUE

Diff: 1

Skill: Use of information technology

Objective: LO 1-6

1.6-4) Bea Rich is enthusiastic about starting her catering business. She feels confident that she has a great concept and can handle the day-to-day details of running a business. However, this is her first attempt at running her own business. Advise Bea on the risks associated with starting a business.

Answer: All businesses are exposed to risk. A risk is anything that exposes a business to a potential injury or loss. For example, Bea could serve clients meals that could cause severe allergic reactions. She could purchase and serve food that had hazardous bacteria, such as salmonella. However, people start a business because the potential rewards outweigh the potential risks.

Risks can be classified into the following four categories: general strategic risks, operating risks, financial risks, and information risks. A good business plan will take into account strategies for covering these risks. General strategic risks for Bea's business would include the quality of food and allergies of customers. Operating risks would include breakdown of equipment, availability of quality ingredients, and transportation problems. Financial risks include the ability to pay off debt and having enough cash to pay bills. Information risks include keeping proper business records and keeping track of bills.

Business owners manage risk through the process of control, in which risks are determined and methods are adopted to minimize those risks.

Skill: Analytic skills, Use of information technology

Objective: LO 1-6

1.6-5) Doug Depp is the manager at Chutes, Inc. that sells parachutes. Management's next year's bonus is based on the current year's net income. In an effort to increase his bonus, Doug decides to buy the pull-cord used in making the company's parachutes from a less reputable supplier. The supplier's prices are lower, but the pull-cords are less reliable in successfully opening the parachute.

- a. Explain how net income will be higher if the cheaper pull-cord is used in the parachutes sold to Chutes, Inc.'s customers.
- b. Discuss whether Doug is acting in the best interest of the company and its owners.
- c. Discuss the ethical issue and what the consequences of Doug's actions may be.

Answer: a. Cost of goods sold will be less thus net income will be greater.

b. Doug is acting in his best interest but not necessarily the company's and its owners' in the long-run. Doug's decision will help Chutes, Inc.'s net income in the short-run, but the decision may hurt the company in the long-run.

c. The reputation of the company could be harmed in the long-run especially if a customer were to be injured due to the failure of the parachute.

Objective: LO 1-6

1.6-6) Ima Broke is the sole owner of Miracles, Inc. Ima needs another loan from a bank to expand her business. In order to improve the chances of receiving a loan, she decides to report the principal of one of Miracles, Inc.'s loans as contributed capital instead of a liability on the balance sheet. Discuss the ethical issue with Ima's treatment of the loan.

Answer: Ima Broke is misrepresenting the company's financial position. The principal of loans has to be paid back when due, but the company has no obligation to give money back to its owners. A potential creditor will be misled and may decide to lend the money only to find out later that the company does not have the ability to pay back its loans when due.

Objective: LO 1-1 & LO 1-6

1.6-7) Team Instructions: *Divide the class into teams of three or four people. Each team member should work the following problem separately outside of class. Then give the students time in class to compare answers with their teammates and put together a final correct copy of the problem. Each team should turn in only one copy of the problem for grading. All team members will receive the same grade.*

Doug Depp is your manager at Chutes, Inc. which sells parachutes. Management's next year's bonus is based on the current year's net income. In an effort to increase his bonus, Doug decides to buy the pull-cord used in making the company's parachutes from a less reputable supplier. The supplier's prices are lower, but the pull-cords are less reliable in successfully opening the parachute. Discuss with your team members the pros and cons of buying the cheaper pull-cord. As a team, decide what the president of the company could do in the future to avoid having the company face this type of scenario.

Answer: The pros: Cost of goods sold will be less thus net income will be greater. The price of the company's stock may rise. The cons: The reputation of the company could be harmed in the long-run especially if a customer were to be injured due to the failure of the parachute. The company could change its incentive plan. Currently a manager is focused solely on net income and not on the long-run reputation of the company. The president could use other measurements such as customer complaints and defect rates to determine bonuses for management.

1.6-8) Team Instructions: *Divide the class into teams of three or four people. Each team member should work the following problem separately outside of class. Then give the students time in class to compare answers with their teammates and put together a final correct copy of the problem. Each team should turn in only one copy of the problem for grading. All team members will receive the same grade.*

Search the internet for information about the WorldCom Inc. fraud in 2002. With your group, write a brief description of the fraud and discuss the ethical issue.

Answer: WorldCom Inc. executives were found guilty of hiding the company's increasing expenses by improperly shifting costs from operating to capital accounts (i.e. expenses were classified as assets). Management should always put good ethical behavior above "cooking the books" in order to make the company look more profitable than it is.
