

Chapter 2: Analyzing and Recording Business Transactions

ACCOUNTING PRACTICE

Discussion Questions: Key Points

1. Assets are listed in order of liquidity, or closeness to cash.
2. When the company pays for something in advance that won't be used up in this accounting period, it would record a prepaid asset. In a sense, plant assets are a type of prepaid asset, although it would not be classified as such. All prepaid assets would be used up, eventually. That is, they all become expenses over time or with use. An example would be Prepaid Rent, Prepaid Insurance, etc.
3. Revenue increases retained earnings. By definition, when revenue is increased as assets are acquired (or liabilities reduced) as a result of activities relating to the company's line of business, the owners have a claim on those assets that are acquired. This ownership interest is reflected in the Retained Earnings account.
4. Not all events are transactions. A transaction is an event that has a financial impact on a company. In other words a transaction affects at least two accounts in the accounting equation. If no accounts are affected then it is an event, not a transaction. Journal entries are recorded for all transactions.
5. The normal balance of an account is the side that increases the account.
 - a. Debit
 - b. Debit
 - c. Credit
 - d. Credit
 - e. Debit
6. The bank is keeping its own books, not yours. When you give the bank cash or deposit your paycheque, the bank needs to keep track of its liability to you. It is increasing its liability account with a credit (the debit that it makes is to its own cash account).
7. A credit balance in the Cash account would indicate a negative cash balance. Negative cash does not make sense. If a company overdraws its Cash account, it now has a liability to the bank. Rather than showing a credit balance in its Cash account, it should show a credit balance in a liability account. Sometimes, a negative "credit" cash balance is acceptable in case the company had signed an overdraft agreement with its bank. Interest is usually charged in such case on the amount overdrawn.
8. Journalizing is the process of recording a transaction in the journal. Posting is the process of transferring the information from the journal to the appropriate amounts in the ledger or to t-accounts.
9. False. A balanced trial balance is a necessary but not sufficient condition for accurate financial statements. If a debit to Supplies is improperly recorded as a debit to Supplies Expense, for example, the trial balance will balance but the financial statements will be inaccurate.
10. The financial statement numbers generally come from the trial balance. However, the numbers on the trial balance come from the general ledger. So, the numbers on the trial balance really come from the general ledger.

Short Exercises

(5–10 min.) S2-1

1. b
2. c
3. e
4. g
5. d
6. f
7. a

(5–10 min.) S2-2

1. Accounts Payable L
2. Cash A
3. Service Revenue R
4. Prepaid Rent A
5. Rent Expense E
6. Common Shares SE

(5–10 min.) S2-3

1. Transaction occurs.
2. Record the transactions in the journal.
3. Post the transactions from the journal to the ledger.
4. Prepare the trial balance.
5. Prepare the financial statements.

(5–10 min.) S2-4

Example	A, 1
1.	R, 4
2.	SE, 3
3.	A, 1
4.	E, 5
5.	L, 2
6.	SE, 3
7.	E, 5

(5–10 min.) S2-5

The basic summary device in accounting is the account. The left side of an account is called the debit side, and the right side is called the credit side. We record transactions first in a journal. Then we post or copy the data to the ledger (or T-accounts). It is helpful to list all the accounts with their balances on a trial balance.

Effect on Trial Balance	Account(s) Misstated
a. Total debits = Total credits	Cash \$675 too high Rent expense \$675 too low
b. Total debits = Total credits	Accounts receivable \$250 too high Accounts Payable \$250 too high
c. Total debits = Total credits	Cash \$180 too low Service revenue \$180 too low
d. Total debits = Total credits	Supplies \$240 too low Accounts payable \$240 too low
e. Total debits > Total credits	Notes payable \$15,000 too low

(20–25 min.) E2-10A

Reqs. 1 & 2

1. The Supplies account needs to be increased by \$2,000 and the Supplies Expense account needs to be decreased by \$2,000. But there will be no overall change in the debit and credit balances (the total of the trial balance will not change) because the amount of the journal entry was correct, it was simply to the wrong account. So instead of a \$2,000 debit balance in Supplies Expense, there will be a \$2,000 balance in Supplies.
2. The Unearned Revenue account needs to be decreased by \$90 and the Cash account needs to be decreased by \$90. This means that there will be an overall change in the debit and credit balances. The credit balance for Unearned Revenues will decrease by \$90 and the debit balance for Cash will decrease by \$90 overall.
3. The Salary Payable account was debited in error instead of the Salary Expense account. Therefore, the Salary Payable account needs to be increased by \$2,500 and the Salary Expense account needs to be increased by \$2,500. This will not create a change in the overall debit and credit balances because the original entry had the correct amount for the journal entry, it was simply to the wrong account.
4. The Loan from Shareholder account will need to be increased by \$10,000 and the Common Shares account will need to be decreased by \$10,000. This will not create a change in the overall debit and credit balances because the right amount of debits and credits were recorded, but simply one of the accounts was incorrect. Once fixed, the trial balance would still have the same total balance of debits and credits.
5. The Dividends account would be too high by \$3,500 and the Salary Expense account would be too low. Therefore a journal entry would be needed to increase the Salary Expense account and to decrease the Dividends account. The result would be no change to the overall debit and credit balances on the trial balance though, because the correct amounts had been recorded, but the wrong account had been used.

Overall, there is only one transaction (#2) that impacts the debit and credit balances on the trial balance. Therefore, the new balance will be \$95,010 (96,000 – 90).-

1	Dr.	Cr.	2 Changes to the Overall
Balance	96,000	96,000	Dr. & Cr. Balance

Effect on Trial Balance	Account(s) Misstated
a. Total debits = Total credits	Cash
	\$765 too high
	Rent expense
	\$765 too low
b. Total debits = Total credits	Accounts Receivable
	\$600 too high
	Accounts Payable

\$600 too high

c. Total debits = Total credits

Cash

\$540 too low

Service Revenue

\$540 too low

d. Total debits = Total credits

Supplies

\$700 too low

Accounts Payable

\$700 too low

e. Total debits > Total credits

Notes Payable

\$50,000 too low

(20–25 min.) E2-10B

Reqs. 1 & 2

1. The Accounts Payable account needs to be increased by \$2,000 and the Cash account needs to be increased by \$2,000. But there will be no overall change in the debit and credit balances (the total of the trial balance will not change) because the amount of the journal entry was correct, it was simply to the wrong account. So instead of a \$2,000 credit to Cash, there should be a \$2,000 credit to Accounts Payable.
2. The Accounts Payable account needs to be increased by \$900 and the Cash account needs to be increased by \$900. This means that there will be an overall change in the debit and credit balances. The credit balance for Accounts Payable will increase by \$900 and the debit balance for Cash will increase by \$900 overall.
3. The Salary Expense account was debited in error instead of the Dividends account. Therefore, the Salary Expense account needs to be decreased by \$1,500 and the Dividends account needs to be increased by \$1,500. This will not create a change in the overall debit and credit balances because the original entry had the correct amount for the journal entry, it was simply to the wrong account.
4. The Common Shares account will need to be increased by \$6,000 and the Revenue account will need to be decreased by \$6,000. This will not create a change in the overall

debit and credit balances because the right amount of debits and credits were recorded, but simply one of the accounts was incorrect. Once fixed, the trial balance would still have the same total balance of debits and credits.

Overall, there is only one transaction (#2) that impacts the debit and credit balances on the trial balance. Therefore, the new balance will be \$41,100 (42,000 – 900).

Req. 3

Impact on Accounts

Req. 3

It was a profitable year for Cascade Consulting, Inc. from the standpoint that the business generated \$8,300 of net income. However, \$8,300 was not very much income for a whole year.

(15–20 min.) P2-6A

Req. 1

Journal Page 3				
DATE	ACCOUNTS	POST. REF.	DR.	CR.
	a. Cash		90	
	Service Revenue			90

		($\$980 - \$890 = \$90$)			
	b.	Supplies		540	
		Accounts Payable			540
		The original entry was recorded “backwards” so an entry for double the amount needs to be made.			
	c.	Cash		10,800	
		Rent Expense			10,800
		($\$12,000 - \$1,200 = \$10,800$)			
	d.	Accounts Payable		850	
		Accounts Receivable			850

Req. 2

- Net income is understated because Service Revenue was credited (increased) by only \$890 instead of the correct amount of \$980.
- Net income would be unchanged because the entry did not affect a revenue or an expense.
- Net income would be understated because Rent Expense was debited (increased) by \$12,000 instead of the correct amount of \$1,200.
- Net income would be unchanged because the entry did not effect a revenue or an expense.

(20–25 min.) P2-7A

Req. 1

APPLY YOUR KNOWLEDGE

Ethics in Action

Case #1

- Jamie should not debit the Dividends account rather than the Legal Expense account. It would be wrong to debit the Dividends account because the transaction was *not* a dividend but rather the payment of an expense.
- It does matter how the \$5,000 payment is recorded. By debiting the Dividends account rather than the proper expense account, the net income will be higher on the income statement. While it is true that the trial balance will show that total debits equal total credits either way, it will not reveal inaccurate or improper individual account balances. The purpose of properly recording each business transaction is to provide a set of financial statements that accurately reflect the results of operations and related financial position.
- Jamie does have an ethical responsibility to accurately record the transactions as she is providing financial statements to the bank. Since the bank is relying on the accuracy of the financial statements, it assumes that the income statement properly includes all the expenses for the business. By omitting the \$5,000 expense, Jamie is giving the bank an inaccurate and misleading income statement.

Case #2

- Jim's actions were not justified. The journal is where all the business transactions are initially entered into the accounting records. It is important that transactions are correctly

entered and posted to ultimately ensure accurate financial statements. Even though the expense total is the same, Wage Expense will not reflect the true amount of wages actually incurred and thus will not be accurate.

- There are ethical concerns. Jim has a responsibility to ensure that all the business transactions are properly recorded. He cannot misclassify expense transactions to obtain account balances that reflect what he feels they should reflect rather than the reality of what actually happened. This is misleading. Users of financial information depend upon the accountants to properly record and post all transactions to provide accurate information; therefore, accountants have an ethical duty to ensure accurate financial reporting.
- As the owner of ProCare Lawnservice you should have a problem with Jim's actions. You need to have accurate financial information for decision-making purposes. Accordingly, by Jim reducing the actual amount of Wage Expense, you may not be aware of the actual labour costs and may decide to hire additional employees. You depend upon the accountant to provide accurate financial reports, and thus, Jim has not fulfilled his obligation as an accountant.

KNOW YOUR BUSINESS

Financial Analysis

The journal entries would be as follows:

Journal					
DATE		ACCOUNTS	POST. REF.	DR.	CR.
Jan	3	Equipment		485,000	
		Cash			485,000
	7	Wages Expense		45,000	
		Cash			45,000

	10	Inventories		500,000	
		Accounts Payable			500,000
	15	Accounts Receivable		642,000	
		Sales Revenue			642,000
	29	Accounts Payable		167,500	
		Cash			167,500

Industry Analysis

1. The relevant statement to evaluate is the statement of income. The revenues are higher for Boeing (\$81.6Bn) than Bombardier (\$16.7Bn) based on 2012 results.
2. The relevant statement to evaluate is the consolidated statement of financial position. The assets are higher for Boeing (\$88.8Bn) than for Bombardier (\$25.7Bn) based on 2012 results.
3. The relevant statement to evaluate is the consolidated balance sheet. The total liabilities are higher for Boeing (\$74.8Bn) than for Bombardier (\$24.4Bn) based on 2012 results.
4. In 2010, the gross profit margin for Boeing (2012) is 15.9% and the gross profit margin for Bombardier is 14.9% in 2012. The market conditions (i.e., recession) and input costs will have the most significant impact on the gross profit margins of both companies. In addition, as different products have different margins, the mix of products that are sold during the year will also impact the overall gross profit margin.
5. Boeing paid dividends of 1.322Bn in 2012 while Bombardier paid \$249 million for their fiscal year ended 2012. This is found on the statement of cash flows under financing activities.
6. The solution to this question will depend on your risk tolerance and investment objectives. One answer could be that you are investing to earn dividends, which are usually of lower risk than capital gains. Boeing pays 44.2% of its net earnings out as dividends, and Bombardier pays 41.6%. Given this, you might be more interested in owning Boeing. However, before making any investment, you would want to look at the

price of each of the company's shares and determine what the dividend yield was on each. You would want to invest in the company with the higher dividend yield.

On the other hand, Bombardier has more debt as a percentage of assets than Boeing. Bombardier's total liabilities are 94.7% of assets compared to Boeing's, which are 93.3% of total assets. Both of these amounts are very high for a company, which increases the risk for shareholders. Before making any investment decisions, we would need a lot more information than this preliminary analysis has provided.

Small Business Analysis

There are two mistakes here affecting the cash account. The first mistake is the cash transaction utilizing the debit card. When cash is decreased, it must be credited. Your friend debited cash for the transaction using the logic that she was using a **debit** card. To correct this transaction, you will need to remove the original transaction and journalize the transaction correctly. These journal entries look the same. They are as follows:

DATE	ACCOUNTS	POST REF.	DR.	CR.
May 5	Supplies		400	
	Cash			400
	To remove the original debit card transaction			

DATE	ACCOUNTS	POST REF.	DR.	CR.
May 5	Supplies		400	
	Cash			400
	To record debit card transaction			

The next error is that the credit card transaction doesn't have any effect on Cash until the credit card bill is paid. When the original transaction took place, a liability account, such as Credit Card Payable, should have been credited. To correct this, the following entry needs to be made.

DATE	ACCOUNTS	POST REF.	DR.	CR.
May 5	Cash		250	
	Credit Card Payable			250
	Correct posting using credit card			

Written Communication

Although student's responses will vary widely, here is a suggested memo to address the two situations.

Dear friend:

I want to address the two concerns you had in your email to me last week. The first one was about the credit balance in your cash account. Even after I made the corrections to your trial balance, the cash was still showing in the credit column. And yes, you are correct that the normal balance of the cash account should be a debit balance. But it is possible to have your cash balance in the credit column if your chequeing account is overdrawn. If you have overdrawn your account, you will need to contact the bank to make sure that they did not return any of your

cheques. Plus, you will have to deposit some funds into your account to bring it to the positive (debit) side.

The second situation was concerning the use of debit cards versus credit cards. The terminology does get very confusing. Without going into an accounting lesson on the differences between debits and credits, let me explain what happens when you use the two cards. When you use your debit card, there have to be funds available in whatever account that card is attached to because the use of this card will automatically withdraw that amount of money from the account. The bank “debits” your account which, in banking terms, means they removed the money from your account. On the other hand, you have to credit cash because you are decreasing your cash account.

A credit card transaction, on the other hand, does not automatically remove the cash from your account. It sets up a liability to the credit card company which will have to be paid when you get the credit card statement. So the credit card transaction itself does not affect cash. You are not crediting cash when you use your credit card. You are crediting a liability to the credit card company, which means you owe them money.

Financial Accounting

Second Canadian Edition

Chapter 2 Analyzing and Recording Business Transactions

Prepared by:
Alym Amlani, CPA, CA
Kwantlen Polytechnic University

CHAPTER 2

Analyzing and Recording Business Transactions

Learning Objectives

1. Define accounts and understand how they are used in accounting
2. Explain debits, credits, and the double entry system of accounting
3. Demonstrate the use of the general journal and the general ledger to record business transactions
4. Use a trial balance to prepare financial statements

How are accounts used to keep business transactions organized?

L.O. 1: DEFINE ACCOUNTS AND UNDERSTAND HOW
THEY ARE USED IN ACCOUNTING

Organizing Accounts

- Accounts are assigned **account numbers** to help organization
 - Account numbers usually have two or more digits
 - The first digit indicates the type of account
 - Other digits specify the exact account

Chart of Accounts

The **Chart of Accounts** lists all accounts in order by account number.

Super Trader - Chart of Accounts			
ACCT #	Account Title	ACCT #	Account Title
1100	Cash	4100	Sales Revenue
1200	Accounts Receivable	4200	Other Revenues

Assets

- Economic resources or properties **owned** or **controlled** by a business
- Will generate **future benefits**

Assets

- Common assets include:
 - Cash
 - Accounts Receivable (A/R)
 - Inventory
 - Notes Receivable
 - Prepaid Expenses
 - Land
 - Buildings
 - Equipment, Furniture, and Fixtures

Assets

- **Current Assets** are ones that are expected to be converted to cash, sold, or consumed within a year or operating cycle
- **Long-term** assets are those that the business will hold for more than one year or longer than the operating cycle
 1. Long-Term Investments
 2. Property, Plant, and Equipment
 3. Intangible Assets

Liabilities

- Amounts owed to third parties
- Will result in a future sacrifice of economic resources

Liabilities

- Common assets include:
 - Accounts Payable
 - Unearned Revenue
 - Notes Payable
 - Accrued Liabilities

Liabilities

- **Current Liabilities** are ones that are expected to be paid or obligations fulfilled within a year or operating cycle
- **Long-term** liabilities are those expected to be paid after more than one year or operating cycle
 - Example: mortgage payable

Shareholders' Equity

- Owners' claim to the assets of the business
- Includes:
 - **Share capital:**
 - Represents the investment of assets, usually cash, the shareholders have invested into a business in exchange for the company's shares.
 - A business may issue different classes of shares, for example, preferred shares and/or common shares.

Shareholders' Equity

- Owners' claim to the assets of the business
- Includes:
 - **Retained Earnings:** The Retained Earnings account tracks the cumulative earnings of the business since it began, less any dividends given to shareholders.

Shareholders' Equity

- Owners' claim to the assets of the business
- Includes:
 - **Revenues:**
 - Increases in retained earnings created by selling goods or services
 - Represents amounts *earned* by the company even if payment has not yet been received
 - A business may have several revenue accounts depending on how many ways it earns its revenue.

Shareholders' Equity

- Owners' claim to the assets of the business
- Includes:
 - **Expenses:**
 - Decreases in retained earnings from using resources to deliver goods and services to customers
 - Incurred when resources or services are consumed, not when paid

Shareholders' Equity

- Owners' claim to the assets of the business
- Includes:
 - **Dividends:**
 - This account reflects the amount of earnings that have been distributed to the shareholders.
 - Dividends decrease retained earnings (and, therefore, shareholders' equity).

What are debits, credits, and T-accounts?

L.O. 2: EXPLAIN DEBITS, CREDITS, AND THE
DOUBLE ENTRY SYSTEM OF ACCOUNTING

Double-Entry Accounting

- Every transaction impacts two or more accounts
- The **debit** side of an account is the left side
- The **credit** side of an account is the right side
- The **normal balance** is the side that increases the account

T-Accounts

- We visualize accounts as a large “T”
- These are called **T-accounts**

Account Title	
Debit = left side Dr.	Credit = right side Cr.

Copyright © 2015 Pearson Canada Inc.

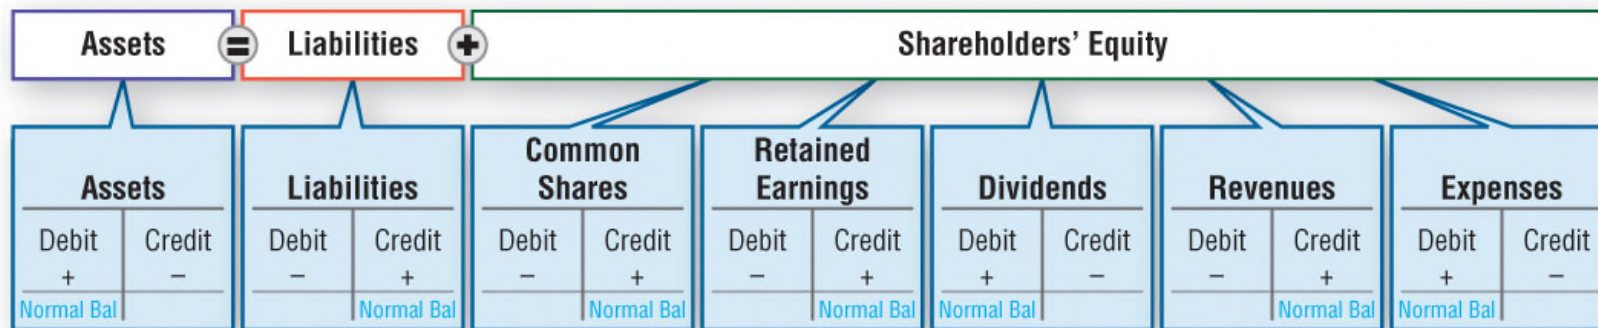

Exhibit 2-2 ▲

Copyright © 2015 Pearson Canada Inc.

How are the general journal and general ledger used to keep track of business transactions?

L.O. 3: DEMONSTRATE THE USE OF THE GENERAL JOURNAL AND THE GENERAL LEDGER TO RECORD BUSINESS TRANSACTIONS

General Journal

- A chronological record of transactions of business
- The general journal is a place to record events that have affected the business
- Recording a transaction in the general journal is referred to as journalizing the transaction

General Ledger

- A grouping of all the accounts of a business with their balances in balance sheet order
- It shows the amount of assets, liabilities, and the shareholders' equity accounts on a given date

Posting

- Once transactions have been entered in the general journal, the information is then transferred to the general ledger
- The process of transferring information from the general journal to the general ledger is called posting

Transaction Analysis and Recording

- **General Journal:** a chronological (organized by date) record of transactions of a business
- **Journalizing:** recording a transaction in the general journal

Transaction Analysis and Recording

Copyright © 2015 Pearson Canada Inc.

Transaction Analysis and Recording

To record a journal entry:

1. Record the date
2. Record the debit entry by entering the account title and then entering the amount in the debit column
3. Record the credit entry on the next line by indenting the account title and then entering the amount in the credit column
4. Write an explanation describing the entry.

Balancing the T-Accounts

- After transactions are posted to T-Accounts, you will calculate each account's *balance*
- The beginning balance for the current period equals the ending balance from the prior period
- If an account's total debits are more than its total credits, it has a **debit** balance.
- If an account's total credits are more than its total debits, it has a **credit** balance.

T-Accounts

How is a trial balance prepared, and what is it used for?

L.O. 4: USE A TRIAL BALANCE TO PREPARE FINANCIAL STATEMENTS

What Is a Trial Balance?

- It is NOT an official financial statement
- Most commonly prepared at the end of the **accounting period**

Sample Trial Balance

A **trial balance** is a list of all the accounts of a business and their balances at a specific point in time.

Hooray Consulting, Inc. Trial Balance January 31, 2015			
ACCT #	ACCOUNT	DEBIT	CREDIT
1010	Cash	\$16,850	
1020	Accounts Receivable	1,900	
1030	Supplies	350	
1040	Equipment	4,000	
2010	Accounts Payable		\$ 200
2050	Notes Payable		12,000
3010	Common Shares		10,000
3030	Retained Earnings		0
3040	Dividends	500

Correcting Errors

- If error has occurred, steps required to correct it depend on type of error that was made
- If journal entry made to wrong accounts or for wrong amount, easiest to reverse the incorrect entry, and then enter the correct entry
- To correct entry that has been made twice, reverse one of the entries
- If the entry has been wrongly omitted, it simply needs to be entered

Preparation of Financial Statements

- Financial statements are prepared after completing the trial balance
- We prepare the statements in the following order:
 1. Income Statement
 2. Statement of Changes of Equity
 3. Statement of Financial Position

Preparing Financial Statements

Always check to ensure your Statement of Financial Position is in balance
