

Chapter 2

Analyzing and Recording Transactions

QUESTIONS

- Common asset accounts: cash, accounts receivable, notes receivable, prepaid expenses (rent, insurance, etc.), office supplies, store supplies, equipment, building, and land.**
 - Common liability accounts: accounts payable, notes payable, and unearned revenue, wages payable, and taxes payable.**
 - Common equity accounts: owner, capital and owner, withdrawals.**
- A note payable is formal promise, usually denoted by signing a promissory note to pay a future amount. A note payable can be short-term or long-term, depending on when it is due. An account payable also references an amount owed to an entity. An account payable can be oral or implied, and often arises from the purchase of inventory, supplies, or services. An account payable is usually short-term.**
- There are several steps in processing transactions: (1) Identify and analyze the transaction or event, including the source document(s), (2) apply double-entry accounting, (3) record the transaction or event in a journal, and (4) post the journal entry to the ledger. These steps would be followed by preparation of a trial balance and then with the reporting of financial statements.**
- A general journal can be used to record any business transaction or event.**
- Debited accounts are commonly recorded first. The credited accounts are commonly indented.**
- A transaction is first recorded in a journal to create a complete record of the transaction in one place. (The journal is often referred to as the book of original entry.) This process reduces the likelihood of errors in ledger accounts.**
- Expense accounts have debit balances because they are decreases to equity (and equity has a credit balance).**
- The recordkeeper prepares a trial balance to summarize the contents of the ledger and to verify the equality of total debits and total credits. The trial balance also serves as a helpful internal document for preparing financial statements and other reports.**
- The error should be corrected with a separate (subsequent) correcting entry. The entry's explanation should describe why the correction is necessary.**

10. The four financial statements are: income statement, balance sheet, statement of owner's equity, and statement of cash flows.
11. The balance sheet provides information that helps users understand a company's financial position at a point in time. Accordingly, it is often called the statement of financial position. The balance sheet lists the types and dollar amounts of assets, liabilities, and equity of the business.
12. The income statement lists the types and amounts of revenues and expenses, and reports whether the business earned a net income (also called profit or earnings) or a net loss.
13. An income statement user must know what time period is covered to judge whether the company's performance is satisfactory. For example, a statement user would not be able to assess whether the amounts of revenue and net income are satisfactory without knowing whether they were earned over a week, a month, a quarter, or a year.
14. (a) Assets are probable future economic benefits obtained or controlled by a specific entity as a result of past transactions or events. (b) Liabilities are probable future sacrifices of economic benefits arising from present obligations of a particular entity to transfer assets or provide services to other entities in the future as a result of past transactions or events. (c) Equity is the residual interest in the assets of an entity that remains after deducting its liabilities.
15. The balance sheet is sometimes referred to as the statement of financial position.
16. Debit balance accounts on the Apple balance sheet include: Cash and cash equivalents; Short-term marketable securities; Accounts receivable; Inventories; Vendor non-trade receivables; Other current assets; Long-term marketable securities; Property, plant and equipment, net; Goodwill; Acquired intangible assets, net; Other non-current assets.

Credit balance accounts on the Apple balance sheet include: Accounts payable; Accrued expenses; Deferred revenue; Commercial paper; Current portion of long-term debt; Deferred revenue, non-current; Long-term debt; Other non-current liabilities; Common stock; Retained earnings; Accumulated other comprehensive income (current year abnormal debit balance).
17. The asset accounts with *receivable* in its account title are: Accounts receivable, net; Income taxes receivable, net. The liabilities with *payable* in the account title are: Accounts payable; Income taxes payable, net; Income taxes payable, non-current.
18. Samsung's balance sheet lists the following current liabilities: Trade payables; Short-term borrowings; Other payables; Advances received; Withholdings; Accrued expenses; Income tax payable; Current portion of long-term liabilities; Provisions; Other current liabilities; Liabilities held-for-sale.

Samsung's balance sheet lists the following noncurrent liabilities: Debentures; Long-term borrowings; Long-term other payables; Net defined benefit liabilities; Deferred income tax liabilities; Provisions; Other non-current liabilities.

Quick Study 2-8 (10 minutes)

The correct answer is a.

Explanation: If a \$2,250 debit to Utilities Expense is incorrectly posted as a credit, the effect is to understate the Utilities Expense debit balance by \$4,500. This causes the Debit column total on the trial balance to be \$4,500 less than the Credit column total.

Quick Study 2-15 (10 minutes)

Debt ratio = Total liabilities / Total assets = \$38,633 mil / \$42,966 mil = 89.9%

Interpretation: Its debt ratio of 89.9% exceeds the 60% of its competitors. Home Depot's financial leverage, and accordingly its riskiness, can be judged as above average based on the debt ratio.

EXERCISES

Exercise 2-1 (10 minutes)

2. Transactions a, c, and e did not yield an expense for the following reasons:

- e This transaction is a distribution of cash to the owner. Even though equity decreased, that decrease did not occur in the process of providing goods or services to customers.
- a This transaction decreased cash in settlement of a previously existing liability (equity did not change). Supplies expense is recorded when assets are used, not necessarily when cash is paid.
- c This transaction involves the purchase of an asset. The form of the company's assets changed, but total assets did not (and equity did not change).

Exercise 2-12 (20 minutes)

1.

e.	Cash	5,000	
	Note Payable		5,000
	<i>Cash received for note payable to bank.</i>		

2. Transactions a, c, d, and e did not yield revenue for the following reasons:

- d This transaction changed the form of an asset from receivable to cash. Total assets were not increased (revenue was recognized when the services were originally provided).
- e This transaction brought in cash (increased assets), and it also increased a liability by the same amount (represented by the signing of a note to repay the amount).
- a This transaction brought in cash, but this is an owner investment.
- c This transaction brought in cash, but it created a liability to provide services to the client in the next year.

Exercise 2-15 (20 minutes)

Calculation of change in equity for part a through part d

	Assets	-	Liabilities	=	Equity
Beginning of the year	\$ 60,000		\$20,000		\$40,000
End of the year	105,000		36,000		<u>69,000</u>
Net increase in equity					<u>\$29,000</u>

a.	Net income	\$?
	Plus owner investments		0
	Less owner withdrawals		<u>(0)</u>
	Change in equity		<u>\$29,000</u>

Net Income = \$29,000

Since there were no additional investments or withdrawals, the net income for the year equals the net increase in owner's equity.

b.	Net income	\$?
	Plus owner investments		0
	Less owner withdrawals (\$1,250/mo. x 12 mo.)		<u>(15,000)</u>
	Change in equity		<u>\$29,000</u>

Net Income = \$44,000

The withdrawals were added back because they reduced equity without reducing net income.

c.	Net income	\$?
	Plus owner investment		55,000
	Less withdrawals by owner		<u>(0)</u>
	Change in equity		<u>\$29,000</u>

Net Loss = \$26,000

The investment was deducted because it increased equity without creating net income.

d.	Net income	\$?
	Plus owner investment		35,000
	Less owner withdrawals (\$1,250/mo. X 12 mo.)		<u>(15,000)</u>
	Change in equity		<u>\$29,000</u>

Net Income = \$9,000

The withdrawals were added back because they reduced equity without reducing net income and the investments were deducted because they increased equity without creating net income.

Exercise 2-20 (20 minutes)

Description	(1) Difference between Debit and Credit Columns	(2) Column with the Larger Total	(3) Identify account(s) incorrectly stated	(4) Amount that account(s) is overstated or understated
a. \$3,600 debit to Rent Expense is posted as a \$1,340 debit.	\$2,260	Credit	Rent Expense	Rent Expense is understated by \$2,260
b. \$6,500 credit to Cash is posted twice as two credits to Cash.	\$6,500	Credit	Cash	Cash is understated by \$6,500
c. \$10,900 debit to the Withdrawals account is debited to Owner's Capital.	\$0	—	Owner, Capital Owner, Withdrawals	Owner, Capital is understated by \$10,900 Owner, Withdrawals is understated by \$10,900
d. \$2,050 debit to Prepaid Insurance is posted as a debit to Insurance Expense.	\$0	—	Prepaid Insurance Insurance Expense	Prepaid Insurance is understated by \$2,050 Insurance Expense is overstated by \$2,050
e. \$38,000 debit to Machinery is posted as a debit to Accounts Payable.	\$0	—	Machinery Accounts Payable	Machinery is understated by \$38,000 Accounts Payable is understated by \$38,000
f. \$5,850 credit to Services Revenue is posted as a \$585 credit.	\$5,265	Debit	Services Revenue	Services Revenue is understated by \$5,265
g. \$1,390 debit to Store Supplies is not posted.	\$1,390	Credit	Store Supplies	Store Supplies is understated by \$1,390

Exercise 2-21 (15 minutes)

	Overstated, Understated, or Correctly-Stated	Amount
a.	<u>Correctly-stated.</u> The debit column is correctly stated because the erroneous debit (to Accounts Payable) is deducted from an account with a (larger assumed) credit balance.	\$0
b.	<u>Understated.</u> The credit column is understated by \$37,900 because Accounts Payable was debited — it should have been credited.	\$37,900
c.	<u>Correctly-stated.</u> The Automobiles account balance is correctly stated.	\$0
d.	<u>Understated.</u> The Accounts Payable account balance is understated by \$37,900. It should have been increased (credited) by \$18,950 but the posting error decreased (debited) it by \$18,950.	\$37,900
e.	The credit column is \$37,900 less than the debit column, or \$162,100 in total (\$200,000 - \$37,900).	

Exercise 2-22 (15 minutes)a.

Company	Liabilities	/	Assets	=	Debt Ratio
Dreamworks	\$ 30,000		\$ 40,000		0.75
Pixar	147,000		150,000		0.98
Universal	17,000		68,000		0.25

- b. Pixar has the largest financial leverage because it has the larger debt ratio in comparison to both Dreamworks and Universal.

Computation of 2019 net income:

Owner investment	35,000
Add net income	?
Deduct withdrawals by owner.....	<u>(19,000)</u>
Increase in equity during the year.....	<u>\$ 22,000*</u>

Thus, net income = (\$22,000 + \$19,000 - \$35,000) = \$ 6,000

* Computation of 2019 equity increase:

Equity, December 31, 2018	\$282,200
Equity, December 31, 2019	<u>(304,200)</u>
Increase in equity during 2019	<u>\$ 22,000</u>

Owner investment	5,000
Add net income	?
Deduct withdrawals by owner.....	<u>(3,000)</u>
Increase in equity during the year	<u>\$ 13,000*</u>

Thus, net income = (\$13,000 + \$3,000 - \$5,000) = \$ 11,000

* Computation of 2019 equity increase:

Equity, December 31, 2018	\$137,000

(b) $\$193,437 / \$321,686 = \underline{60.1\%}$

4. 2017

Explanation: Apple has greater financial leverage when a greater proportion of its assets are financed by liabilities. Additionally, Apple's financing structure is more risky when it utilizes more leverage.

Comparative Analysis — AA 2-2 (25 minutes)

\$ millions

1. **Apple**
 Current year debt ratio: $\$241,272/\$375,319 = \underline{64.3\%}$
 Prior year debt ratio: $\$193,437/\$321,686 = \underline{60.1\%}$

2. **Google**
 Current year debt ratio: $\$44,793/\$197,295 = \underline{22.7\%}$
 Prior year debt ratio: $\$28,461/\$167,497 = \underline{17.0\%}$

3. **Apple**

Explanation: Apple has the higher degree of financial leverage. Apple's debt ratio is markedly higher for the current year than that of Google. This indicates that Apple carries more debt financing than Google. This also implies that Apple is attempting to use nonowner financing to make more money for its owners. This is fine provided Apple's return does not decline below that of what it pays nonowners for use of that money—this is the main source of financing risk.

₩ and \$ in millions

1. Samsung

Current year debt ratio: ₩87,260,662 / ₩301,752,090 = 28.9%

Prior year debt ratio: ₩69,211,291 / ₩262,174,324 = 26.4%

2. Increased financial leverage

3. (a) Less Risky *Explanation:* Samsung's debt ratio of 28.9% is lower than Apple's debt ratio of 64.3% (\$241,272/\$375,319).

(b) More Risky *Explanation:* Samsung's debt ratio of 28.9% is higher than Google's debt ratio of 22.7% (\$44,793/\$197,295).

Ethics Challenge — BTN 2-1

This case involves a conflict between the need for efficiency and the need for control. While it makes sense to take and process lunch orders quickly, this efficiency is being accomplished by a shortcut that greatly weakens control over cash receipts. Cash could be received and lost or stolen because there would be no initial record of how much was received.

The assistant manager's explanation about the head manager not arriving until 3 o'clock suggests that the head manager doesn't know about the proposed shortcut. Thus, the new employee is faced with the dilemma of deciding whether to accept the assistant manager's instructions, suggest to the assistant manager that the shortcut seems wrong, or to ask the head manager to confirm the instructions. Each of these alternatives involves personal risk.

It is possible that the assistant manager does not understand the potential for fraud and abuse if this shortcut is used. If the relationship between you and the assistant manager is such that you feel you can do so, you should explain your understanding of how the shortcut could lead to the problems of inaccurate records for tax purposes, gathering inaccurate marketing information, and abuse by other employees who might not be as honest as you and the assistant manager.

If the assistant manager insists, you may want to work as instructed to get an idea of whether the shortcut is being abused by the assistant manager and perhaps to find out discreetly whether the head manager knows about it. (Although, this behavior does involve personal risk of perceived collusion with the assistant manager.) If you conclude that the assistant manager is committing fraud, you should report the situation to the head manager as quickly as possible.

The four major financial statements and their purposes are:

- ***Income statement*** describes a company's revenues and expenses along with the resulting net income or loss over a period of time. It helps explain how equity changes during a period due to earnings activities.
- ***Statement of owner's equity*** explains changes in equity due to net income (or net loss) and any withdrawals and or owner investments over a period of time.
- ***Balance sheet*** describes a company's financial position (assets, liabilities, and equity) at a point in time.
- ***Statement of cash flows*** identifies cash inflows (receipts) and outflows (payments) over a period of time. It also explains how the cash balance on the balance sheet changed from the beginning to the end of a period.

These financial statements are linked to each other across time.

Specifically, a balance sheet reports an organization's financial position at a *point in time*. The income statement, statement of owner's equity, and statement of cash flows report on performance over a *period of time*. These three statements link balance sheets from the beginning to the end of a reporting period. That is, they explain how the financial position of an organization changes from one point to another.

Taking It to the Net — BTN 2-3

1. The prior three years' net income or (loss) for Amazon are (\$ millions):
 2016 = \$2,371 2015 = \$596 2014 = \$(241)

2. The three years net cash *provided* by operations follows (\$ millions):
 2016 = \$16,443 2015 = \$11,920 2014 = \$6,842

3. The reason its cash balance only increased by \$3,444 million in 2016 was because of net cash outflows of \$9,876 million for its investing activities and \$2,911 million for its financing activities (and further reduced by \$212 million related to foreign currency effects). Those uses of cash absorbed much of the cash generated by its operating activities.

Teamwork in Action — BTN 2-4

<Instructor note: There is no specific solution to this activity.>

The following sample solution gives a summary outline of what a minimum report needs to include. Assume a team member selects assets:

Category: Assets

- a. Increases (decreases) in assets are debits (credits) to asset accounts. Debit means left side, credit means right side. The normal side of an account refers to the side where increases are recorded. For assets, this is the debit, or left, side.

- b. Owner investment of \$10,000 cash in business.

- c. Assets = Liabilities + Owner, Capital – Withdrawals + Revenues – Expenses
 + \$10,000 = \$0 + \$10,000 – \$0 + \$0 – \$0
 Owner investments have no effect on the income statement, but they do increase the cash flows from financing by \$10,000 on the statement of cash flows (this increases its net cash flow).

- d. Paid rent expense with \$2,000 cash.

- e. Assets = Liabilities + Owner, Capital – Withdrawals + Revenues – Expenses
 - \$2,000 = \$0 + \$0 – \$0 + \$0 – \$2,000
 An expense paid in cash will decrease net income on the income statement and decrease operating cash flows on the statement of cash flows.

Entrepreneurial Decision — BTN 2-5

There are several issues that ownership should consider. Those considerations include the following three issues (among others).

- If ownership chooses to contribute personal funds for the expansion, ownership money will be at risk (not business loans); in this case, the business will not have the expense of interest payments, nor will the business have the risk of the inability to repay a loan.
- If ownership chooses to have the business borrow the money, the business will have interest and loan payments to make, and the business will have more risk (as reflected in the company's debt ratio).
- If the business can pay the interest and loan payments, it can be to the business's advantage to borrow, as long as the return on assets is high enough (that is, higher than the rate of interest on the borrowing).

Entrepreneurial Decision — BTN 2-6

1.

MARTIN MUSIC SERVICES
Balance Sheet
December 31

Assets		Liabilities	
Cash.....	\$ 3,600	Accounts payable.....	\$ 2,200
Accounts receivable	9,600	Unearned lesson fees	<u>15,600</u>
Prepaid insurance	1,500	Total liabilities	17,800
Prepaid rent	9,400		
Store supplies.....	6,600		
Equipment	<u>50,000</u>		
Total assets.....	<u>\$80,700</u>		
		Equity	
		Total equity	<u>62,900</u>
		Total liabilities and equity	<u>\$80,700</u>

2.

Debt ratio = Total liabilities / Total assets = \$17,800 / \$80,700 = 22.1%

Return on assets = Net income/Average assets = \$40,000/\$80,700* = 49.6%

*Ending balance is used per instructions ("assume average assets equal its ending balance").

3. The prospects of a bank loan are likely to be good. (i) The debt ratio indicates that 78% of the company's funding is from equity. Also, there are no debt obligations requiring periodic payments. This implies low risk. (ii) The level of return on assets is very high. This implies good return.

Overall, given the information and the assumption that current performance will continue into the future, the prospects of a bank loan are good.

Note: The loan does carry some risk—fueling this risk are (i) poor recordkeeping, (ii) lack of information on growth potential, and (iii) a much higher pro forma debt ratio—that is, if the loan is granted, the debt ratio will jump to 43%, computed as:

$$(\$17,800 + \$30,000) / (\$80,700 + \$30,000).$$

Hitting the Road — BTN 2-7

Findings will vary. It is advisable that the instructor obtain a few classified sections from newspapers that were published over the period of the assignment. If student reports lack responses for question 2, it is informative and motivating to bring these (accounting-related job opportunities) sections to class when discussing or returning student reports as many students are not accounting majors.
