235. Charlene Addemup prepared the following trial balance from the general ledger of Big Blue Cleaning Service. It did not balance.

Big Blue Cleaning Service Trial Balance October 31, 2015

Cash	\$ 975	
Accounts receivable	3,800	
Cleaning equipment	13,500	
Office equipment	6,600	
Accounts payable		\$ 4,510
Fred Tullis, capital		23,000
Fred Tullis, withdrawals	4,200	
Cleaning fees earned		10,875
Cleaning expense	8,600	
Totals	\$ <u>37,675</u>	\$ <u>38,385</u>

Because the trial balance did not balance, Charlene decided to examine the accounting records very closely. She found that the following errors had been made:

- (1) A purchase of cleaning equipment on account for \$245 was posted as a debit to Cleaning Equipment and as a debit to Accounts Payable.
- (2) An investment of \$500 by the owner was debited to Fred Tullis, Capital and credited to Cash.
- (3) In calculating the balance of the Accounts Receivable account, a debit of \$600 was omitted from the calculation.
- (4) One debit of \$300 to the Fred Tullis, Withdrawals account was posted as a credit.
- (5) Office equipment purchased for \$800 was posted to the Cleaning Equipment account.
- (6) One entire entry was not posted to the general ledger. The transaction involved the receipt of \$125 for cleaning services performed for cash.

Prepare a corrected trial balance for the Big Blue Cleaning Service at October 31, 2015.

211. Explain the steps in processing transactions in an accounting system.

210.

Business transactions and events are documented by source documents. These source documents are analyzed for the effects of the transactions and events on the accounting records. The information is recorded into the accounting system. The information is then posted to the accounts and organized in the trial balance. The final step is the preparation of financial statements and reports for decision makers.

212. Explain how accounts are used in recording information about transactions.

Accounts are classified into five major classifications: assets, liabilities, equity, revenues and expenses. Accounts are used to record detailed information about increases or decreases of specific items in these categories. The accounts serve as the information resource for financial statements and reports.

Difficulty: Moderate Larson - Chapter 02 #108 Learning Objective: 02-02 Describe an account; its use; and its relationship to the ledger. Type: Knowledge

213. Explain the difference between a ledger and a chart of accounts.

A ledger is a record containing all of the accounts of a business. The chart of accounts is a list of all of the accounts in the ledger. The chart of accounts usually includes a numbering system for the accounts.

Difficulty: Moderate Larson - Chapter 02 #109 Learning Objective: 02-04 Describe a chart of accounts and its relationship to the ledger. Type: Knowledge

214. Explain debits and credits and their role in the accounting system.

Debit refers to the left side of an account and credit refers to the right side of an account. Debits and credits form the basis of the double-entry accounting system. This system is based on the concept that all transactions and events affect at least two accounts. The double-entry system is organized around the accounting equation which states that assets = liabilities + equity. The left side is the normal balance for assets and the right side is the normal balance for liabilities and equity. Revenues have a right-side normal balance and expenses have a left-side normal balance.
