Chapter 2 The Balance Sheet

ANSWERS TO QUESTIONS

- 1. (a) An asset is a resource owned by a company that has measurable value and is expected to provide future benefits.
 - (b) A current asset is an asset that will be used up or turned into cash within the next 12 months.
 - (c) A liability is a debt or obligation arising from past transactions or events, which the company is likely to pay, settle, or fulfill by sacrificing resources in the future.
 - (d) A current liability is a debt or obligation that will be paid, settled, or fulfilled within one year.
 - (e) Common stock includes the amount of financing (cash and sometimes other assets) provided to the company by stockholders in exchange for shares of common stock.
 - (f) Retained earnings are the cumulative earnings of a company that are not distributed to the owners and instead are reinvested in the business.
- 2. A transaction is an exchange or event that has a direct and measurable financial effect on the assets, liabilities, or stockholders' equity of a business. Transactions include two different types of events: (1) external exchanges and (2) internal events. The first situation (1) is exemplified by the sale of goods or services to customers. The second situation (2) is exemplified by employees using up the benefits of equipment owned by the company.
- 3. Accounts are used to accumulate and report the effects of different business activities. Accounts are necessary to keep track of all increases and decreases in the basic accounting equation.
- 4. The basic accounting equation is: Assets = Liabilities + Stockholders' Equity.
- 5. Debit is the left side of a T-account and credit is the right side of a T-account. A debit is an increase in assets or a decrease in liabilities or stockholders' equity.

 A credit is the opposite a decrease in assets or an increase in liabilities or stockholders' equity.

6. Transaction analysis is the process of studying a transaction to determine its financial effect on the business in terms of the basic accounting equation:

Assets = Liabilities + Stockholders' Equity

The two principles underlying the process are:

- Duality of effects: every transaction affects at least two accounts.
- * A=L+SE; the accounting equation must remain in balance after each transaction.
- 7. The accounting equalities in transaction analysis are:
 - (a) Assets = Liabilities + Stockholders' Equity
 - (b) Debits = Credits
- 8. A journal entry is a method for expressing the effects of a transaction on accounts in a debits equal credits format. The title of the account(s) to be debited is (are) listed first. The title of the account(s) to be credited is (are) listed underneath the debited accounts and both account title(s) and amount(s) are indented to the right. (An optional explanation can be included on the lines following the journal entry; this explanation is omitted in most textbook examples and homework problems because the description of the transaction in the textbook already provides the explanation.)
- 9. T-accounts are a simplified version of the ledger, which summarizes transaction effects for each account. T-accounts show increases on the left (debit) side for assets, which are on the left side of the accounting equation. T-accounts show increases on the right (credit) side for liabilities and stockholders' equity, which are on the right side of the accounting equation. The T-account is a tool for summarizing transaction effects for each account and determining balances.
- 10. The cost principle requires that assets and liabilities be recorded at their original cost to the company.
- 11. Because the customer list was not purchased by her salon (it was developed internally), her salon does not report it on the balance sheet. Knowing this, she should be sure to advise her banker that the salon has established a loyal group of customers that holds considerable value for generating future revenues (but is excluded from the balance sheet for accounting reasons).

^{*} Due to the nature of cases, it is very difficult to estimate the amount of time students will need to complete them. As with any open-ended project, it is possible for students to devote a large amount of time to these assignments. While students often benefit from the extra effort, we find that some become frustrated by the perceived difficulty of the task. You can reduce student frustration and anxiety by making your expectations clear, and by offering suggestions (about how to research topics or what companies to select). The skills developed by these cases are indicated in the table on the following page.

CHARLIE'S CRISPY CHICKEN Balance Sheet At September 30

Assets			Liabilities	
Current Assets			Current Liabilities	
Cash	\$	1,800	Accounts Payable	\$ 2,000
Supplies		1,500	Salaries and Wages Payable	200
Total Current Assets		3,300	Total Current Liabilities	2,200
Equipment		38,000	Note Payable (long-term)	25,000
Land		18,900	Total Liabilities	27,200
Total Assets	9	60,200		
			Stockholders' Equity	
			Common Stock	30,000
			Retained Earnings	3,000
			Total Stockholders' Equity	33,000
			Total Liabilities &	
			Stockholders' Equity	\$60,200

CCC's current ratio (3,300/2,200 = 1.5) suggests the company has enough current assets that could be converted into cash to cover its current liabilities. At September 30, CCC had \$1.50 of current assets for each dollar of current liabilities.

Req. 1

FACEBOOK, INC.
Balance Sheet
At September 30, 2016

(amounts in millions)

Assets		Liabilities	
Current Assets		Current Liabilities	
Cash	\$ 6,000	Accounts Payable	\$ 2,600
Short Term Investments	20,100	Total Current Liabilities	 2,600
Accounts Receivable	3,100	Note Payable (long-term)	3,000
Prepaid Rent	 1,100	Total Liabilities	5,600
Total Current Assets	30,300		
	 	Stockholders' Equity	
Software	21,500	Common Stock	15,700
Equipment	7,900	Retained Earnings	38,400
Total Non-Current Assets	 29,400	Total Stockholders' Equity	 54,100
	 	Total Liabilities &	
Total Assets	\$ 59,700	Stockholders' Equity	\$ 59,700

Req. 2

As of September 30, 2016, stockholders' equity has provided the primary source of financing for Facebook, Inc. The company has financed \$54,100 of its assets with stockholders' equity and only \$5,600 with liabilities.

Req. 3

Facebook's current ratio (\$30,300/\$2,600 = 11.65) suggests the company has enough current assets that could be converted into cash to cover its current liabilities. Specifically, the current ratio of 11.65 implies that, at September 30, 2016, Facebook had \$11.65 of current assets for each dollar of current liabilities.

Current Ratio =
$$\frac{$30,000}{$15,000}$$
 = 2.0

Yes, it is likely that Mister Ribs will be able to pay its current liabilities as they come due. The current ratio of 2.0 indicates that for every dollar in current liabilities, the company has two dollars in current assets. This ratio indicates a good ability to pay.

M2-24

a. Decrease	\$30,000 - \$2,000 \$15,000 + \$0	- =	1.87
b. Increase _	\$30,000 + \$2,000 \$15,000 + \$0	_ =	2.13
c. Increase _	\$30,000 + \$5,000 \$15,000 + \$0	_ =	2.33
d. Decrease _	\$30,000 + \$500 \$15,000 + \$500	_ =	1.97

M2-25

a. Decrease
$$\begin{array}{r} \$1,000,000 + \$20,000 \\ \$500,000 + \$20,000 \\ \hline \text{b. Increase} \\ \hline \$1,000,000 - \$50,000 \\ \hline \$500,000 - \$50,000 \\ \hline \text{c. Increase} \\ \hline \begin{array}{r} \$1,000,000 + \$100,000 \\ \$500,000 + \$0 \\ \hline \end{array} = 2.20 \\ \hline \text{d. Decrease} \\ \hline \begin{array}{r} \$1,000,000 + \$250,000 \\ \$500,000 + \$250,000 \\ \hline \end{array} = 1.67 \\ \hline \end{array}$$

(a)	Note Payable (short-term)	Equipment	
(b)	Cash	Equipment	
(c)	_	_	No exchange transaction
(d)	Common Stock	Cash	
(e)	Cash	Land	
(f)	_	_	No company transaction
(g)	Note Payable (short-term)	Cash	
(h)	Cash	Note Payable (long-to	erm)

Req. 2

The truck in (b) would be recorded as an asset of \$21,000. The land in (e) would be recorded as an asset of \$50,000. These are applications of the cost principle.

Req. 3

The agreement in *(c)* involves no exchange or receipt of cash, goods, or services and thus is not a transaction. Because transaction *(f)* occurs between the owner and others, the separate entity assumption implies this transaction does not affect the business.

Total Assets	\$70,000	Equity	\$70,000	

Req. 5

LDS's assets were financed primarily by stockholders' equity. The stockholders' equity financed \$40,000 of the company's assets and liabilities financed \$30,000.

Transaction

Brief Explanation

- (a) Issued common stock for \$17,000 cash.
- (b) Purchased a building for \$50,000; paid \$10,000 cash and gave a \$40,000 note payable for the balance.
- (c) Used cash to purchase supplies costing \$1,500.

E2-14

Req. 1

September 30, 2016

December 31, 2015

Current Ratio = $\frac{$1,328}{$33}$ = 3.99

Current Ratio = $\frac{$1,249}{$366}$ = 3.41

Req. 2

The company's current ratio increased, which implies an increased ability to pay current liabilities.

Req. 3

Current Ratio =
$$\frac{$1,328 - $10}{$333 - $10}$$
 = 4.08

Paying down Accounts Payable in this case (when the current ratio is larger than one) increases the current ratio.

Req. 4

As of September 30, 2016, stockholders' equity has provided the primary source of financing for Columbia Sportswear, Inc. The company has financed \$1,521 of its assets with stockholders' equity and only \$401 with liabilities.

Equipment	40,000	Common Stock	12,000
Equipment	+0,000	Retained Earnings	0
		Total Stockholders' Equity	12,000
		Total Liabilities &	
Total Assets	\$ 47,900	Stockholders' Equity	\$ 47,900

Req. 4

At September 30, BSC reported \$7,900 of current assets and \$5,900 of current liabilities, resulting in a current ratio of 1.34 (7,900/5,900). Because this ratio is greater than 1.3, BSC is complying with the loan covenant. (This means that the bank will not be able to demand repayment or renegotiation of the \$30,000 note payable until it matures in two years.)

ANSWERS TO COACHED PROBLEMS

CP2-1

Req. 1

Ag BioTech was organized as a corporation. Only a corporation issues shares of stock to its owners in exchange for their investment, as ABT did in transaction (a).

Req. 2

_			Assets	ı		=	Liabilities	+	Stockholde	rs' Equity
	Cash	Supplies	Land	Building	Equipment		Note Payable (long-term)		Common Stock	Retained Earnings
(a)	+40,000					=			+40,000	
(b)	-13,000		+18,000	+65,000	+16,000	=	+86,000			
(c)	No effect									
(d)	-3,000	+3,000				=		Ν	lo change	
(e)	+6,000		-6,000			=		Ν	lo change	
	+30,000	+3,000	+12,000	+65,000	+16,000	=	+86,000		+40,000	0

Req. 3

The transaction between the two stockholders (event c) was not included in the spreadsheet. Because event (c) occurs between the owners and others, the separate entity assumption implies this transaction does not affect the business.

CP2-1 (Continued)

Req. 4

- (b) Total liabilities = \$86,000
- (c) Total stockholders' equity = Total assets Total liabilities = \$126,000 \$86,000 = \$40,000
- (d) Cash balance = \$40,000 \$13,000 \$3,000 + \$6,000 = \$30,000
- (e) Total current assets = \$30,000 + \$3,000 = \$33,000

Req. 5

As of January 31, the financing for ABT's assets came primarily from liabilities. For ABT, the liabilities financed \$86,000 of its assets and stockholders' equity financed \$40,000.

CP2-2

Req. 7

As reported in Requirement 6, Ethan Allen had \$243 of current assets and \$145 of current liabilities, yielding a current ratio of 1.68. Because a current ratio of 1.68 is less than the current ratio of 2.02 at September 30, it suggests the transactions decreased the company's ability to pay its current liabilities as they come due.

Req. 8

As of December 31, 2016, the financing for Ethan Allen's investment in assets has come primarily from stockholders' equity. Liabilities financed \$315,000,000 of the company's total assets and shareholders' equity financed \$416,000,000.

ANSWERS TO GROUP B PROBLEMS

PB2-1

Req. 1

Total Assets	\$33,030
Liabilities	
Current Liabilities	
Accounts Payable	\$ 3,350
Notes Payable (short-term)	400
Total Current Liabilities	3,750
Notes Payable (long-term)	12,700
Total Liabilities	16,450
Stockholders' Equity	
Common Stock	10,630
Retained Earnings	5,950
Total Stockholders' Equity	16,580
Total Liabilities and Stockholders' Equity	\$ 33,030

Req. 7

With current assets of \$8,960 and current liabilities of \$3,750, Starbucks' current ratio after the transactions listed in (a) - (e) is 2.39. Prior to these transactions, Starbucks' current ratio was calculated at 1.05, so these transactions increased Starbucks' ability to pay current liabilities in the next year.

PB2-3 (continued)

Req. 8

As of December 31, 2016, financing for Starbucks' assets has come primarily from stockholders' equity. Stockholders' equity financed \$16,580,000,000 of the company's total assets and liabilities financed \$16,450,000,000.

ANSWERS TO SKILLS DEVELOPMENT CASES

S2-1

- 1. D
- 2. B
- 3. B
- 4. A

S2-2

Req. 1

Lowe's:

Assets = Liabilities + Shareholders' Equity \$34,408,000,000 = \$27,974,000,000 + \$6,434,000,000

The Home Depot:

Assets = Liabilities + Shareholders' Equity \$42,966,000,000 = \$38,633,000,000 + \$4,333,000,000

The Home Depot is larger in terms of total assets of \$42,966,000,000 compared to Lowe's total assets of \$34,408,000,000.

Req. 2

Lowe's current liabilities of \$11,974,000,000 are less than the \$14,133,000,000 reported by The Home Depot.

The Home Depot has a larger current ratio, implying better ability to pay current liabilities as they come due.

Req. 3

The amount reported for inventory on the balance sheet represents the original cost of the products to Lowe's, not the expected selling price. The cost principle requires that transactions be recorded at their original cost to the company.

S2-2 (continued)

Req. 4

Financing for the Lowe's investment in assets has come more from liabilities than stockholders' equity. Lowe's liabilities have financed \$27,974,000,000 of the total assets of the company and stockholders' equity has financed \$6,434,000,000.

The more the company has in assets and the less it has in liabilities, the more likely the company will be able to pay all that it owes to creditors, making the company a less risky investment. To predict whether a company is likely to pay all that it owes to creditors and still have something left over to pay out to owners, creditors and investors consider the relative amounts of assets, liabilities, and shareholders' equity. To calculate the percentage of assets financed by creditors, simply divide total liabilities by total assets and multiply by 100.

Lowe's
$$\frac{\text{Total liabilities}}{\text{Total assets}} \times 100 = \frac{27,974,000,000}{34,408,000,000} \times 100 = 81.3\%$$
Home Depot $\frac{\text{Total liabilities}}{\text{Total assets}} \times 100 = \frac{38,633,000,000}{42,966,000,000} \times 100 = 89.9\%$

This places Lowe's in a less risky financial position for investors because it has a smaller percentage of its assets financed by creditors (or liabilities).

S2-3

The solution to this team project will depend on the companies and/or accounting period selected for analysis.

S2-4

Req. 1

Assets = Liabilities + Stockholders' Equity \$15,000 = \$15,000 + 0

Ponzi received \$15,000 cash (\$5,000 from each of the three lenders) in exchange for a promise to repay that money in 90 days. The 50% interest that Ponzi is paying is not a factor in the accounting equation yet because interest is not owed until time has passed. As of December 27, 1919, the interest is just a promise and so no transaction has occurred.

Req. 2

If two of the lenders are repaid their original loan plus the 50% interest there will be no cash left in the business to repay the third lender. It was possible for Ponzi to remain in "business" for 8 months because he continued to collect more money from new lenders, which was used to repay the other lenders.

Req. 3

With the exception of Ponzi and his first lenders (family and friends), almost everyone who provided funds to him was harmed financially. Beyond that, the credibility of all new businesses and their founders was called into question. Ultimately, schemes like Ponzi's led to the creation of accounting rules and stock regulation, but not until thousands of innocent people lost millions of dollars.

S2-5

Req. 1

The president is concerned with the amount of assets that are reported on the balance sheet because investors and creditors judge the riskiness of the company by comparing the amount of recorded assets to liabilities. The greater the amount of the company's assets for a given amount of liabilities, the less risky the company appears to investors and creditors.

Req. 2

The accounting concept that relates to reporting "Intellectual Abilities" as an asset is measurement and, specifically, the cost principle. In the case of "Intellectual Abilities," the company has not acquired this asset through an identifiable transaction (and there exists no known cost for this asset), so it cannot be reported on the balance sheet as an asset.

Req. 3

The accounting concept that relates to reporting the land is the cost principle, which requires that nonfinancial investments such as land be reported at cost even if an appraisal suggests it is worth more.

Req. 4

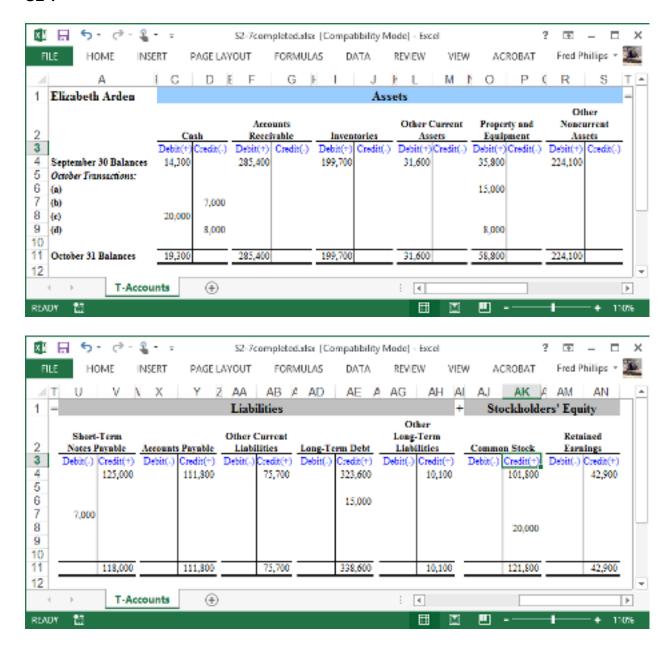

Parties that might be hurt by the president's suggestions include investors, lenders, and other creditors. The bank in particular could be hurt because its managers will consider the company's recorded assets as a benchmark for assessing the company's credit risk. Also, if you were to go along with the president's requests, you also could be personally hurt because you might be charged as an accomplice to fraudulent financial reporting.

You should not report the "Intellectual Abilities" on the balance sheet. Also, you should insist that the amount reported for land be reported at cost, following the cost principle.

S2-6

The major deficiency in this balance sheet is the inclusion of the owner's personal residence as a business asset. Under the separate entity assumption, each business must be accounted for as a separate organization, apart from its owners. The improper inclusion of this asset as part of Betsey Jordan's business overstates total assets by \$300,000; total assets should be \$105,000 rather than \$405,000, and stockholder's equity should be only \$5,000, rather than \$305,000. Betsey Jordan's business is far riskier than suggested by this balance sheet.

Total Liabilities and Stockholders' Equity	<u>\$</u>	87,650

Req. 4

The current ratio indicates the proportion of current assets relative to current liabilities. As of April 30, NGS has 93.3 times more current assets than current liabilities ($$60,650 \div $650 = 93.3$). Clearly, NGS is presently able to pay its current liabilities with no difficulty. Nevertheless, this is likely to change in the future when some of the initial start-up cash is used to operate the company.

Class: McGraw-Hill/Irwin
Problem A 2-1

Requirement 1:												
				ASSETS			=!	STOCKHOLDERS' LIABILITIES + EQUITY				
	+ + +				+	Notes	+	Common	+	Retained		
		Cash	-	Equipment	-	Building		Payable	<u>-</u>	Stock	-	Earnings
(a)	+	100,000							+	100,000		
(b)	+	120,000					+	120,000				
(c)	-	200,000			+	200,000						
(d)	-	3,000	+	30,000			+	27,000				
(e)			-	3,000			-	3,000				
(f)	-	7,000	+	10,000			+	3,000				
(g)	N/A											
	+	10,000	+	37,000	+	200,000	+	147,000	+	100,000		
		Correct! Correct! Correct!						Correct!		Correct!		

Requi	reme	nt 3:									
(a)Total Assets at end of Year:											
	\$	500,000	+	10,000	+	37,000) + 200,000 = \$ 747,000 <correct!< th=""></correct!<>				
(b)Tot	al Lia	bilities at e	nd c	of Year:							
	\$	200,000	+	147,000	=	\$ 347,000	O <correct!< th=""></correct!<>				
(c)Tot	al Sto	ckholders'	Equ	ity at end of Ye	ar:						
	\$	747,000	-	347,000	=	\$ 400,000	O <correct!< th=""></correct!<>				

ren Data PA 2-1:

MALLARD INCORPORATED
