

Horngrren's Accounting, 12e (Miller-Nobles et al.)
Chapter 1 Accounting and the Business Environment

Learning Objective 1-1

1) Accounting is the information system that measures business activities, processes the information into reports, and communicates the results to decision makers.

Answer: TRUE

Diff: 1

LO: 1-1

AACSB: Application of knowledge

AICPA Functional: Measurement

PE Question Type: Concept

H2: Why is Accounting Important? (H1)

2) Critical thinking and judgment skills are not necessary for accountants because technology has made the activities routine.

Answer: FALSE

Explanation: Technology plays an important supporting role in performing routine accounting functions. This allows accountants to have more time to focus on reviewing and evaluating economic activities using critical thinking and judgment.

47) Provide the definition of each of the following accounting assumptions.

Assumption	Definition
Monetary Unit	
Economic Entity	

Answer:

Assumption or Principle	Definition
Monetary Unit	The assumption that requires the items on the financial statements to be measured in terms of a monetary unit. The dollar's purchasing power is assumed to be stable.
Economic Entity	An organization that stands apart as a separate economic unit. The business is separate from the owners.

H2: What is the Accounting Equation? (H1)

11) What is the accounting equation? Briefly explain each of the three parts.

Answer: Assets = Liabilities + Equity.

Assets are economic resources that are expected to benefit the business in the future. They are things of value that a business owns or controls. Liabilities are debts that are owed to creditors. They are one source of claims against assets. Equity is the other source of claims against assets. Equity is the owner's claim against assets and is the amount of assets that is left over after the company has paid its liabilities. It represents the net worth of the business.

38) Gulf Waterworks Company provides plumbing services. The company is a sole proprietorship. Transactions during the first year of operations are given below.

- a) The owner, Jason Robinson, contributed \$6,000 cash in exchange for capital.
- b) Paid \$5,000 cash for equipment to be used for plumbing repairs.
- c) Borrowed \$26,000 from a local bank and deposited the money in the checking account.
- d) Paid \$600 rent for the year.
- e) Purchased \$1,800 of office supplies on account.
- f) Completed a plumbing repair project for a local lawyer and received \$3,200 cash.

Calculate the amount of total owner's equity at the end of the first year after recording the transactions. Assume office supplies of \$1,800 are left at the end of the year.

- A) \$8,600
- B) \$3,200
- C) \$6,000
- D) \$26,000

Answer: A

Explanation: A) Robinson, Capital, Ending = Capital contributions - Withdrawals + Revenues - Expenses

$$= \$6,000 \text{ (contribution)} + \$3,200 \text{ (revenue)} - \$600 \text{ (rent expense)} = \$8,600$$

5) Modern Designer Company is a sole proprietorship. The transactions for the first month of operations are as follows:

- On June 1, 2019, the owner, Cindee Litfin, contributed \$25,000 cash to the business in exchange for capital.
- On June 2, the company rendered services to three clients on account with total revenues earned of \$9,000.
- On June 5, the company incurred an advertising expense on four different web sites and promised to pay a total of \$1,200 at a later date.
- On June 13, Modern Designer purchased \$1,000 worth of office supplies for cash. (The supplies are not used by June 30.)
- On June 22, it received \$2,000 on account from a client and deposited it into the business account.
- On June 23, it incurred \$1,300 for a legal expense and paid cash.
- On June 30, Modern Designer made a payment of \$500 to one of the web sites that it owed for advertising provided earlier in the month.
- No withdrawals were made during the month.

Required:

1. Prepare a transaction analysis of the transactions. Determine the effects of the transactions on the accounting equation.
2. Prepare an income statement and a statement of owner's equity for the month ended June 30, 2019.
3. Prepare a balance sheet at June 30, 2019.

12) Regent Plumbing Company provides plumbing services. The company is a sole proprietorship. Selected transactions of Regent Plumbing Company are described as follows:

- a) Sharon Regent, the owner, contributed \$6,000 cash in exchange for capital.
- b) Paid \$4,000 cash for equipment to be used for plumbing repairs.
- c) Borrowed \$10,000 from a local bank and deposited the money in the checking account.
- d) Paid \$700 rent for the year.
- e) Paid \$200 cash for plumbing supplies to be used next year.
- f) Completed a plumbing repair project for a local lawyer and received \$3,000 cash.

Calculate the net income. Assume plumbing supplies of \$200 are left at the end of the accounting period.

- A) \$500
- B) \$2,800
- C) \$3,000
- D) \$2,300

Answer: D

Explanation: D) Net income = Revenues - Expenses

Net income = \$3,000 - \$700 = \$2,300

H2: Return on Assets (ROA)

16) Assume Metro Company had a net income of \$2,100 for the year ending December 2018. Its beginning and ending total assets were \$33,500 and \$19,500, respectively. Calculate Metro's return on assets (ROA). (Round your percentage answer to two decimal places.)

- A) 6.27%
- B) 10.77%
- C) 7.92%
- D) 3.96%

Answer: C

Explanation: C) Return on assets (ROA) = $\$2,100 / [(\$33,500 + \$19,500) / 2] = 7.92\%$

H2: Return on Assets (ROA)

17) McAlister Repair Service had net income for the year of \$125,000. In addition, the balance sheet reports the following balances:

	Jan. 1, 2018	Dec. 31, 2018
Accounts Receivable	\$ 5,600	\$ 14,200
Accounts Payable	12,000	9,500
Building	125,000	125,000
Cash	37,500	35,000
Office Furniture	25,000	50,000
Office Supplies	3,200	1,500
Notes Payable	60,000	75,000
Total Owner's Equity	124,300	141,200

Calculate the return on assets (ROA) for McAlister Repair Service for the year ending December 31, 2018.

Answer:

Total Assets	1/1/2018	12/31/2018
Accounts Receivable	\$ 5,600	\$ 14,200
Building	125,000	125,000
Cash	37,500	35,000
Office Furniture	25,000	50,000
Office Supplies	3,200	1,500
Total Assets	<u>\$ 196,300</u>	<u>\$ 225,700</u>

Return on Assets = Net Income / Average total assets

Average total assets = (Beginning total assets + Ending total assets) / 2

$$\begin{aligned}
 \text{Return on Assets} &= \$125,000 / [(\$196,300 + \$225,700) / 2] \\
 &= \$125,000 / \$211,000 \\
 &= 59.24\%
 \end{aligned}$$

H2: Return on Assets (ROA)

18) Adams Service Company had a net income of \$14,500 for the year ending December 31, 2018. The total assets on January 1, 2018 were \$28,000. The total assets on December 31, 2018 were \$16,000.

Calculate Adam's return on assets (ROA). Show your computations and label your work. Round your answer to two decimal places.

Answer: Return on Assets = Net Income / Average total assets

Average total assets = (Beginning total assets + Ending total assets) / 2

$$\begin{aligned}\text{Return on Assets} &= \$14,500 / [(\$28,000 + \$16,000) / 2] \\ &= \$14,500 / \$22,000 \\ &= 65.91\%\end{aligned}$$

PE Question Type: Application

H2: Return on Assets (ROA)

19) What is the calculation for return on assets (ROA)? What does ROA measure?

Answer: Return on Assets = Net income / Average total assets. Average total assets equal beginning total assets plus ending total assets divided by two.

ROA measures how profitably a company uses its assets.

PE Question Type: Concept

H2: Return on Assets (ROA)

20) Selected information for Uptown Spa Services and Downtown Spa Services follows:

Uptown Spa Services		Downtown Spa Services	
Total Assets	\$125,000	Total Assets	\$162,000
Total Owner's Equity	\$90,000	Total Owner's Equity	\$137,000
Total Revenues	\$82,000	Total Revenues	\$70,000
Net Income	\$12,000	Net Income	\$18,000

The total assets and total owner's equity balances are at December 31, 2018. Total revenues and net income are for the year ended December 31, 2018. There were no new capital contributions during the year. No owner withdrawals were taken. Average net assets are \$128,000 for Uptown and \$178,000 for Downtown.

Provide answers for the following questions. Show your work and explain your answer.

1. Which business owes more to creditors?
2. Which business has more owner's equity at the end of the year?
3. Which business had more expenses?
4. What is the ROA for each business? (Show this as a percentage and round to one decimal place) Based on ROA, which company is more profitable?

Answer:

1. Uptown has liabilities of \$35,000 (Assets \$125,000 - Total Owner's Equity \$90,000 = Liabilities \$35,000)

Downtown has liabilities of \$25,000 (Assets \$162,000 - Total Owner's Equity \$137,000 = Liabilities \$25,000)

Uptown owes more to creditors.

2. The end of year owner's equity for Uptown is \$90,000 and for Downtown is \$137,000, thus Downtown has more owner's equity at the end of the year.

3. The expenses for Uptown are \$70,000 (Total Revenues \$82,000 - Net Income \$12,000 = Total Expenses \$70,000).

The expenses for Downtown are \$52,000 (Total Revenues \$70,000 - Net Income \$18,000 = Total Expenses \$52,000).

Uptown has more expenses.

4. ROA: Uptown (Net Income \$12,000/Average Total Assets \$128,000 = ROA 9.4%)

Downtown (Net Income \$18,000/Average Total Assets \$178,000 = ROA 10.1%)

Based on ROA, Downtown is more profitable because its ROA is higher.
