#### 53. Discuss adding or deleting a table in a query.

ANSWER: You might want to add a table's field list to the upper pane of Query Design View to select

fields from that table for the query. To add a new table to Query Design View, drag it from the Navigation Pane to Query Design View, or click the Show Table button on the Design tab, then add the desired table(s). To delete an unneeded table from Query Design View,

click its title bar, then press [Delete].

#### 54. Compare the capabilities of queries and filters.

ANSWER: \* Queries are saved as objects in the database. Filters are not.

- \* Both can be used to select a subset of records in a datasheet.
- \* Only queries are used to select a subset of fields in a datasheet.
- \* The resulting datasheet from both filters and queries can be used to enter and edit data.

  \* The resulting datasheet from both filters and queries can be used to sort, filter, and find

records.

- \* Queries but not filters are commonly used as the source of data for a form or report.
- \* Queries but not filters can be used to create calculations across records.
- \* Oueries but not filters can be used to create calculated fields.
