67. What is the most efficient way to replace a specific word or a font in PowerPoint?

ANSWER: As you review your presentation, you may decide to replace certain text or fonts throughout the entire presentation using the Replace command. Text can be a word, phrase, or sentence. To replace specific text, click the HOME tab on the Ribbon, then click the Replace button in the Editing group. In the Replace dialog box, enter the text you want to replace, then enter the text you want to use as its replacement. You can also use the Replace command to replace one font for another. Simply click the Replace button list arrow in the Editing group, then click Replace Fonts to open the Replace Font dialog box.

68. Explain how to edit the points of a shape.

ANSWER: If you want to customize the form (or outline) of any shape in the shapes gallery, you can modify its edit points. To display a shape's edit points, select the shape you want to modify, click the DRAWING TOOLS FORMAT tab on the Ribbon, click the Edit Shape button in

PowerPoint 2016 - Module 2: Modifying a Presentation

the Insert Shapes group, then click Edit Points. Black edit points appear on the shape. To change the form of a shape, drag a black edit point. When you click a black edit point white square edit points appear on either side of the black edit point, which allow you to change the curvature of a line between two black edit points. When you are finished with your custom shape, you can save it as picture and reuse it in other presentations or other files. To save the shape as a picture, right-click the shape, then click Save as Picture.

69. Describe how to create superscript and subscript text in PowerPoint.

ANSWER: Superscript or subscript text is a number, figure, symbol, or letters that appears smaller than other text and is positioned above or below the normal line of text. A common superscript in the English language is the sign indicator next to number, such as, 1st or 3rd. Other examples of superscripts are the trademark symbol™ and the copyright symbol©. To create superscript text in PowerPoint, select the text, number, or symbol, then press [CTRL] [SHIFT] [+] at the same time. Probably the most familiar subscript text are the numerals in chemical compounds and formulas, for example, H₂O and CO₂. To create subscript text, select the text, number, or symbol, then press [CTRL] [=] at the same time. To change superscript or subscript text back to normal text, select the text, then press [CTRL] [Spacebar].
