KEYWORDS: Bloom's: Comprehension

17. Jack is a lawyer and Jeri is a child psychologist. Jack prepares Jeri's estate planning at no charge and Jeri agrees to counsel Jack's daughter six times at no charge in return for the estate planning. The value of the estate planning is \$1,000 and the value of the therapy sessions is \$1,000.

a. How much income does Jack have? Why?

b. How much income does Jeri have? Why?

ANSWER: a. **\$1,000.** Taxable income includes "all income from whatever source derived." The value of the therapy for his child is income to him for the performances of services. There is no taxable income exception in the tax law for "barter income."

Chapter 2 Gross Income and Exclusions

b. **\$1,000.** Taxable income includes “all income from whatever source derived.” The value of the estate planning is income to her for the performances of services. There is no taxable income exception in the tax law for “barter income.”

32. Craig, a single taxpayer, received the following items in 2016: dividends of \$450, wages of \$32,000, child support from his ex-spouse of \$400 per month, a new television worth \$1,200 from a door prize at a conference he attended, a gift of \$3,000 from Craig's parents, and \$200 of interest on bonds issued by the State of Arizona. Craig put \$4,000 of his wages into his employer's dependent care flexible spending account (the \$4,000 has not been deducted from the \$32,000 of wages listed previously). He also receives a reimbursement of \$270 per month to pay for public transportation passes each month (the monthly reimbursement of \$270 has not been deducted from the \$32,000 of wages). Based on the above, what is Craig's gross income in 2016?

ANSWER: Gross income equals
\$26,590.

Item	Amount	Explanation
Dividends	\$450	Included
Wages	\$32,000	Included
Child Support	\$0	Excluded
Door Prize	\$1,200	Included
Gift	\$0	Excluded
Muni Bond Interest	\$0	Excluded

Chapter 2 Gross Income and Exclusions

Child Care	(\$4,000)	Excluded up to \$5,000
Public Transportation	(\$3,060)	Excluded up to \$255 per month
Gross Income	\$26,590

Chapter 2 Gross Income and Exclusions

50. Richard and Alice are divorced and under the terms of their written divorce agreement signed on December 30, 2009, Richard was required to pay Alice \$1,500 per month of which \$600 was designated as child support. He made 12 such payments in 2016. Additionally, Richard voluntarily paid Alice \$1,200 per month for 12 months of 2016, no portion of which was designated as child support. Assuming that Alice has no other income, her tax return for 2016 should show gross income of:

- a. \$0
- b. \$9,600
- c. \$10,800
- d. \$18,000
- e. None of the above

ANSWER: c
RATIONALE: [12 x (\$1,500 - \$600)]

KEYWORDS: Bloom's: Knowledge

68. Richard, who retired on April 30, 2016, receives a monthly employee annuity benefit of \$1,400 payable for life, beginning May 1, 2016. During his years of employment, Richard contributed \$29,400 to the company's plan. Richard's age on May 1 is 66. Using the simplified method, how much of the \$11,200 annuity payment received during 2016 may Richard exclude from gross income?

- a. \$427
- b. \$1,120
- c. \$1,680
- d. \$11,200
- e. None of the above

ANSWER: b

RATIONALE: Simplified method:

$$\text{\$ } 29,400 \div 210 \text{ (factor for age 66) = } \$140 \times 8 \text{ months = } \$1,120$$

69. Martin retired in May 2016. His pension is \$1,000 per month from a qualified retirement plan to which he contributed \$42,000, and to which his employer contributed \$12,000. Martin was 67 when the plan payments started. During 2016, he received 8 months of payment for a total of \$8,000 from the plan.

- a. Using the simplified method, calculate Martin's taxable income for 2016 from the retirement plan distributions.
- b. If Martin's contributions to the plan had been \$25,200, instead of \$42,000, using the simplified method, how much taxable income would he have to report in 2016 from the plan distributions?

ANSWER:

- a. **\$6,400.** $\$42,000 \div 210$ (factor for age 67) = \$200 x 8 months = \$1,600. $\$8,000 - \$1,200 = \$6,400$
- b. **\$7,040.** $\$25,200 \div 210 = \120 x 8 months = \$960. $\$8,000 - \$960 = \$7,040$

70. Cynthia, age 64, retired in June. Starting in July, Cynthia received \$2,000 per month from an annuity. She has contributed \$260,000 to the annuity. Her life expectancy is 20 years. How much is excluded from income using the simplified method? Use 260 as the factor to divide by.

1. Enter total amount received this year
2. Enter cost in plan at the annuity starting date
3. Factor at annuity starting date 260
4. Divide line 2 by line 3
5. Multiply line 4 by the number of monthly payments this year
6. Amount, if any, recovered tax free in prior years
7. Subtract line 6 from line 2
8. Enter the smaller of line 5 or 7
9. Taxable amount this year. Subtract line 8 from line 1

ANSWER: \$6,000 is excluded from income. See calculation below.

1. Enter total amount received this year: \$12,000
2. Enter cost in plan at the annuity starting date: \$260,000
3. Factor at annuity starting date: 260
4. Divide line 2 by line 3: \$1,000
5. Multiply line 4 by the number of monthly payments this year: \$6,000
6. Amount, if any, recovered tax free in prior years: \$0
7. Subtract line 6 from line 2: \$260,000
8. Enter the smaller of line 5 or 7: \$6,000
9. Taxable amount this year. Subtract line 8 from line 1: \$6,000

NATIONAL STANDARDS: United States - BUSPROG: Analytic
STATE STANDARDS: United States - AK - AICPA: FN-Reporting
KEYWORDS: Bloom's: Knowledge

108. An investor is comparing the following two bonds: a bond from ABC Corp which pays an interest rate of 9 percent per year and a municipal bond which pays an interest rate of 7.9 percent per year. The investor is in the 15 percent tax bracket. Which bond will give the investor a higher *after-tax* interest rate and for which reason?

- a. The ABC bond because it pays a 9 percent interest rate, while the municipal bond only pays 7.9 percent .
- b. The ABC bond because it pays an equivalent after-tax rate of 10.6 percent, while the municipal bond pays out an equivalent after-tax rate of 9.3 percent.
- c. The municipal bond because it pays an equivalent after-tax rate of 9.3 percent, while the ABC bond pays out a 9 percent interest rate.
- d. The municipal bond because it pays an equivalent after-tax rate of 7.9 percent, while the ABC bond pays out an equivalent after-tax rate of 7.65 percent.
- e. None of the above is correct.

ANSWER: d
RATIONALE: The municipal bond has the same after-tax and pre-tax rate of return (7.9%) since interest on this bond is tax-exempt. The after-tax rate on the ABC bond is lower at 7.65% ($9\% \times (1 - 15\%)$).

123. William, a single taxpayer, works for the men's clothing division of a large corporation. During the year, William received the following fringe benefits:

	<u>Value</u>
20 percent discount on men's clothing (the usual markup is 40 percent)	\$350
15 percent discount on toys from the toy division of the company (the usual markup is 25 percent)	\$100
Personal copies on the company's copier	\$ 15
A subscription to <i>Men's Clothing Weekly</i>	\$ 35
Use of the company's athletic facilities	\$ 50

As a result of receiving the above fringe benefits, what amount must William include in his current year gross income?

ANSWER: **\$100**, the discount on toys from the toy division.

124. Curt's tax client, Terry, is employed at a large company that offers medical flexible spending accounts to its employees. Terry must decide at the beginning of the year whether he wants to put as much as \$2,550 of his salary into the medical flexible spending account. Terry has excellent insurance through the company and is very healthy. He does not expect to have any medical expenses during the year. Terry does not itemize deductions. Should Curt recommend that Terry put the maximum in his medical flexible spending account? Why or why not?

ANSWER: No. Terry will be better off keeping his salary \$2,550 higher and paying tax on the salary, since he will likely have no medical costs to reimburse from a medical spending account during the year. If Terry has no medical expenses, he could lose part of the \$2,550 in the account after the end of the year.

130. Answer the following questions regarding the taxability of Social Security payments.

- a. Will a taxpayer with no income other than Social Security have to include the Social Security in taxable income?
- b. Will a taxpayer with a large amount of municipal bond income, but no taxable income, likely have to pay tax on part of his or her Social Security?
- c. What is the maximum percentage of Social Security benefits which may be subject to tax on an individual's tax return?

ANSWER:

- a. No. The taxpayer's income is below the threshold amount used in the formula to determine whether Social Security is taxable.
- b. Yes. Tax-free municipal bond income is added to AGI in the formula to determine the amount of taxable Social Security.
- c. 85 percent. High-income taxpayers must include 85 percent of Social Security receipts in taxable income.

NATIONAL STANDARDS: United States - BUSPROG: Analytic
STATE STANDARDS: United States - AK - AICPA: FN-Reporting
KEYWORDS: Bloom's: Comprehension

132. During the current year, Margaret and John received \$24,000 in Social Security benefits. The amount of their adjusted gross income for the year before any Social Security income was \$140,000 and they received \$19,000 in tax-exempt income.

Explain the treatment of their Social Security income for tax purposes and the likely percentage of the Social Security income that will be taxable to Margaret and John.

ANSWER: Social Security income is partially taxed based on the taxpayer's modified adjusted gross income. Modified adjusted gross income includes adjusted gross income plus tax exempt interest plus half of the Social Security received. For low income taxpayers, no Social Security income is taxable. Higher income taxpayers must include 50 percent to 85 percent of the Social Security receipts in income. Given the high level of income reported by Margaret and John, it is safe to say they would have to include 85 percent of the Social Security payments in taxable income. To be certain, the IRS Social Security worksheet should be used to calculate the taxable amount.
