## CHAPTER 1

### THE CANADIAN FINANCIAL REPORTING ENVIRONMENT

#### CHAPTER STUDY OBJECTIVES

1. ***Understand the financial reporting environment.*** Accounting provides reliable, relevant, and timely information to managers, investors, and creditors so that resources are allocated to the most efficient enterprises. Accounting also provides measurements of efficiency (profitability) and financial soundness. Investors, creditors, management, securities commissions, stock exchanges, analysts, credit rating agencies, auditors, and standard setters are some of the major stakeholders. Illustration 1-4 explains what is at stake for each one. The objective of financial reporting is to communicate information that is useful to key decision makers such as investors and creditors in making resource allocation decisions (including assessing management stewardship) about the resources and claims to resources of an entity and how these are changing. Ideally, all stakeholders should have access to the same information in order to ensure that good decisions are made in the capital marketplace. (This is known as information symmetry.) However, this is not the case—there is often information asymmetry. Of necessity, management has access to more information so that it can run the company. It must also make sure that it does not give away information that might harm the company, such as in a lawsuit where disclosure might cause the company to lose. Aside from this, information asymmetry exists because of management bias whereby management acts in its own self-interest, such as wanting to maximize management bonuses. This is known as moral hazard in accounting theory. Information asymmetry causes markets to be less efficient. It may cause stock prices to be discounted or costs of capital to increase. In addition, it might detract good companies from raising capital in the particular market where relevant information is not available (referred to as adverse selection in accounting theory). The efficient markets hypothesis is felt to exist only in a semi-strong form, meaning that only publicly available information is assimilated into stock prices.

2. ***Explain the need for accounting standards and identify the major entities that influence standard setting and financial reporting.*** The accounting profession has tried to develop a set of standards that is generally accepted and universally practised. This is known as GAAP (generally accepted accounting principles). Without this set of standards, each enterprise would have to develop its own standards, and readers of financial statements would have to become familiar with every company's particular accounting and reporting practices. As a result, it would be almost impossible to prepare statements that could be compared. In addition, accounting standards help deal with the information asymmetry problem.

The Canadian Accounting Standards Board (AcSB) is the main standard-setting body in Canada for private companies, pension plans, and not-for-profit entities. Its mandate comes from the Canada

Business Corporations Act and Regulations as well as provincial acts of incorporation. For public companies, GAAP is International Financial Reporting Standards (IFRS) as established by the International Accounting Standards Board (IASB). Public companies are required to follow GAAP in order to access capital markets, which are monitored by provincial securities commissions. The Financial Accounting Standards Board (FASB) is also important as it influences IFRS standard setting. Private companies may choose to follow IFRS. Public companies that list on U.S. stock exchanges may choose to follow U.S. GAAP.

**3. Explain the meaning of generally accepted accounting principles (GAAP) and the significance of professional judgement in applying GAAP.** Generally accepted accounting principles are either principles that have substantial authoritative support, such as the *CPA Canada Handbook*, or those arrived at through the use of professional judgement and the conceptual framework. Professional judgement plays an important role in Accounting Standards for Private Enterprises (ASPE) and IFRS since much of GAAP is based on general principles, which need to be interpreted.

**4. Discuss some of the challenges and opportunities for accounting.** Some of the challenges facing accounting are oversight in the capital markets, centrality of ethics, standard setting in a political environment, principles- versus rules-based standard setting, the impact of technology, and integrated reporting. All of these require the accounting profession to continue to strive for excellence and to understand how accounting adds value in the capital marketplace.

## MULTIPLE CHOICE QUESTIONS

Answer	No.	Description
d	1.	Accounting characteristics
a	2.	Nature of financial accounting
c	3.	Definition of financial accounting
b	4.	Definition of management accounting
d	5.	Efficient use of resources
c	6.	Capital allocation process
d	7.	Importance of accounting information
d	8.	Primary exchange mechanism(s) for allocating resources
c	9.	Changing financial reporting environment
b	10.	Stakeholders in the financial reporting environment
d	11.	Preparation of audited financial statements
a	12.	Auditor's responsibility
c	13.	Causes of subprime lending crisis
a	14.	Management's <i>primary</i> responsibility with respect to financial statements
c	15.	Primary responsibility of security and exchange commissions
b	16.	Objectives of financial reporting
b	17.	Appropriate objectives of general-purpose financial reporting
b	18.	Accrual-basis accounting
c	19.	Preparation of biased information
c	20.	Existence of information asymmetry
b	21.	Efficient markets hypothesis
d	22.	Management bias
a	23.	Moral hazard
d	24.	Conservative accounting
b	25.	Reduction of information asymmetry
b	26.	Development of GAAP
c	27.	Financial reporting before 1900
c	28.	Responsibility of the AcSB
a	29.	Oversight of AcSB
c	30.	Authority over accounting standards in the U.S
d	31.	Development of financial reporting standards in Canada
b	32.	Adoption of IFRS
d	33.	Activities and authority of the Ontario Securities Commission (OSC)
b	34.	Use of ASPE
a	35.	IASB's standard-setting process

- c 36. Primary sources of GAAP under ASPE
- c 37. Sources of GAAP
- d 38. Exercise of professional judgement
- c 39. Rules-based vs. principles-based approach
- c 40. Comparison of Canadian GAAP and U.S. GAAP
- b 41. SOX
- a 42. Advancement of technology on financial reporting
- a 43. IASB principles regarding funding
- c 44. Rules-based GAAP body of knowledge

## PROBLEMS

<b>Item</b>	<b>Description</b>
P1-75	U.S. GAAP impact on Canadian GAAP
P1-76	Shortcomings of rules-based approach

## MULTIPLE CHOICE

1. The essential characteristic(s) of accounting is (are)
- a) communication of financial information to interested internal parties only.
  - b) communication of economic information to external parties.
  - c) identification and measurement of financial information only.
  - d) identification, measurement, and communication of financial information.

Answer: d

Difficulty: Easy

Learning Objective: Understand the financial reporting environment.

Section Reference: Financial Statements and Financial Reporting

CPA: Financial Reporting

Bloomcode: Knowledge

AACSB: Communication

2. Financial accounting is concerned with the process that culminates in
- a) the preparation of financial reports.
  - b) specialized reports for inventory management and control.
  - c) specialized reports for income tax calculation and recognition.
  - d) reports on changes in stock prices and future estimates of market position.

Answer: a

Difficulty: Easy

Learning Objective: Understand the financial reporting environment.

Section Reference: Financial Statements and Financial Reporting

CPA: Financial Reporting

Bloomcode: Knowledge

AACSB: Analytic

3. Financial accounting can be broadly defined as the area of accounting that prepares financial statements to be used
- a) by parties internal to the business enterprise only.
  - b) by investors only.
  - c) by parties both internal and external to the business enterprise.
  - d) primarily by external users and Canada Revenue Agency.

Answer: c

Difficulty: Easy

Learning Objective: Understand the financial reporting environment.

Section Reference: Financial Statements and Financial Reporting

CPA: Financial Reporting

Bloomcode: Knowledge

AACSB: Analytic

4. Management accounting can be broadly defined as the area of accounting that communicates financial information

a) to investors only.

b) to parties internal to the business enterprise only.

c) to parties both internal and external to the business enterprise.

d) primarily to external users and Canada Revenue Agency.

Answer: b

Difficulty: Easy

Learning Objective: Understand the financial reporting environment.

Section Reference: Financial Statements and Financial Reporting

CPA: Financial Reporting

CPA: Management Accounting

Bloomcode: Knowledge

AACSB: Analytic

5. Whether a business is successful and thrives is determined by

a) free enterprise or competition.

b) competition and markets only.

c) markets and free enterprise only.

d) markets, competition, and free enterprise.

Answer: d

Difficulty: Easy

Learning Objective: Understand the financial reporting environment.

Section Reference: Financial Statements and Financial Reporting

CPA: Financial Reporting

CPA: Strategy & Governance

Bloomcode: Knowledge

AACSB: Analytic

5. Whether a business is successful and thrives is determined by

a) free enterprise or competition.

b) competition and markets only.

c) markets and free enterprise only.

d) markets, competition, and free enterprise.

Answer: d

Difficulty: Easy

Learning Objective: Understand the financial reporting environment.

Section Reference: Financial Statements and Financial Reporting

CPA: Financial Reporting

CPA: Strategy & Governance

Bloomcode: Knowledge

AACSB: Analytic

6. Which of the following is correct?

- a) Reported accounting numbers do not affect the transfer of resources.
- b) Credit rating agencies use accounting information to assess only assets.
- c) Efficient capital markets promote productivity and encourage innovation.
- d) Efficient capital markets promote productivity but do not encourage innovation.

Answer: c

Difficulty: Easy

Learning Objective: Understand the financial reporting environment.

Section Reference: Financial Statements and Financial Reporting

CPA: Financial Reporting

CPA: Strategy & Governance

Bloomcode: Knowledge

AACSB: Analytic

7. Information provided by accounting is important because it enables investors and creditors to

- a) compare income and assets of companies.
- b) assess the relative risks and returns of investment opportunities.
- c) channel their resources more effectively.
- d) all of the above

Answer: d

Difficulty: Easy

Learning Objective: Understand the financial reporting environment.

Section Reference: Financial Statements and Financial Reporting

CPA: Financial Reporting

CPA: Strategy & Governance

Bloomcode: Knowledge

AACSB: Analytic

8. In Canada, the primary exchange mechanism(s) for allocating resources is (are)

- a) debt and equity markets.
- b) financial institutions such as banks.
- c) government authorities such as the Canada Revenue Agency (CRA).
- d) both a and b

Answer: d

Difficulty: Easy

Learning Objective: Understand the financial reporting environment.

Section Reference: Financial Statements and Financial Reporting

CPA: Financial Reporting

Bloomcode: Knowledge

AACSB: Analytic

9. Which of the following is/are major factors in the rapidly changing financial reporting environment in Canada?

- a) increased demand for accountants and the impact of technology
- b) globalization and the unethical actions of accountants
- c) the growing number of institutional investors who want more information regarding environmental and social issues
- d) increased use of the Internet

Answer: c

Difficulty: Easy

Learning Objective: Understand the financial reporting environment.

Section Reference: Financial Statements and Financial Reporting

Learning Objective: Discuss some of the challenges and opportunities for accounting.

### Ex 1-46 Financial statements in practice and theory

What are the four most frequently provided financial statements? Provide two terminologies used to refer to each statement.

### Solution 1-46

1. Statement of financial position/Balance sheet
2. Statement of income/comprehensive income/Income statement/ Profit and loss statement
3. Statement of cash flows/ Cash flow statement
4. Statement of changes in equity/ Statement of retained earnings

**Ex. 1-47** Stakeholders in the financial reporting environment

Briefly describe the much-publicized subprime lending crisis in the United States, and identify the stakeholders and how they were affected.

**Solution 1-47**

At the centre of this issue were securitized mortgage assets that were sold to investors. These assets were based on mortgages that had been extended to high-risk borrowers who could no longer afford their mortgage payments once interest rates rose. This led to a flooding of the housing market as borrowers walked away from their houses (and debt). The primary stakeholders were the lenders, borrowers, and investors. Lenders (acting in their own self-interest) sold these investments to investors who may not have fully understood the high-risk nature of their investment. Borrowers lost their homes they could no longer afford, and investors suffered large losses due to the defaulted loans.

**Ex. 1-48** Sources of capital and stages of company growth

Briefly describe how the sources of capital a company relies upon for funding might vary according to their stage of growth.

**Solution 1-48**

As per Illustration 1-2, in the early project/idea stages a company will acquire its initial capital from founders, family, and friends. As they progress to the research and development or prototype stage, private and public venture capital may be introduced, and includes capital provided by angel investors, venture capitalists, and public exchanges such as the TSX Venture Exchange or TSX. Venture capitalists and these public exchanges become the dominant capital sources as greater amounts of capital are required and as a company progresses through commercialization and into stable production.

**Ex. 1-49** Objectives of financial reporting

What are the objectives of financial reporting by business enterprises?

**Solution 1-49**

The objectives of financial reporting are to provide information

1. that is useful to investors, members, contributors, creditors and other users in making their resource allocation decisions and/or assessing management stewardship.
2. to help users in evaluating an entity’s economic resources, obligations, and equity/net assets, and the changes to these items.
3. to help users evaluate the economic performance of an entity.

**Ex. 1-51** Imperfection of the stakeholder ecosystem

The stakeholder ecosystem (depicted in Illustration 1-3) provides checks and balances to ensure that the people with capital—investors and creditors—have good information to use when deciding where

best to invest and allocate capital. However, the system does not always work. Explain why this is the case.

**Solution 1-51**

The stakeholder ecosystem does not always provide perfect information for people with capital because it involves people, and human behaviour is an unpredictable variable. People often act in their own self-interest rather than in the best interest of the capital marketplace, and by extension, the economy.

**Ex. 1-52** Entity vs. proprietary perspective

Explain the difference between the entity perspective and the proprietary perspective.

**Solution 1-52**

The entity perspective views companies as separate and distinct from their owners, e.g., corporate assets are viewed as assets of the company and not of a specific creditor or shareholder. Investors and creditors have liability or equity claims. On the other hand, the proprietary perspective holds that financial reporting should focus only on the needs of the shareholders, and is not considered appropriate. The entity perspective is adopted as part of the objective of general-purpose financial reporting.

**Ex. 1-53** User needs

Explain why providing information to users is a challenging task.

**Solution 1-53**

First, users have very different knowledge levels. Some users have accounting designations or have worked in the finance industry for several years. Others have limited knowledge of how the information is gathered and reported. Secondly, users have very different needs. Some users are institutional investors who hold a large percentage of equity shareholdings and generally devote significant resources to managing their investment portfolios. Others are credit managers at banks or

credit unions who deal mainly with small business or personal loans. Still others are labour negotiators whose knowledge of financial reporting is limited to periodic reviews of financial information for the purpose of negotiations.

**Ex. 1-55** Merits of accrual- vs. cash-basis accounting

Investors are interested in assessing a company’s ability to generate net cash inflows, as well as its ability to protect and enhance capital investments. Briefly explain how each of the accrual- and cash-basis methods, respectively, might enhance these objectives.

**Solution 1-55**

Cash-basis accounting provides better information for assessing the timing and amounts of cash flows, which assist with the first objective. The second objective, concerning long-term performance of the company, may be better served by accrual-based accounting, which generally provides better information about future ability to generate favourable cash flows. It also ties operations to events and the surrounding environment, which are better indicators of performance, and the company’s ability to continue operating as a going concern.

**Ex. 1-56** Information asymmetry

In markets where information asymmetry exists, there can be adverse selection and moral hazard. Explain what these terms mean.

**Solution 1-56**

Adverse selection refers to *hidden knowledge*, where the capital marketplace may attract the wrong type of company, such as companies who have the most to gain from not disclosing information. Given this situation, companies who do fully disclose all information may choose not to enter the marketplace if they are aware of the presence of adverse selection.

Moral hazard refers to *hidden actions*, and occurs as a result of human nature. People or companies may shirk their responsibilities if they think they can get away with it, e.g., not disclose negative information since they know it may be detrimental to their share price. This is a form of management bias.

**Ex. 1-57** Maintaining competitive advantage

In the most efficient and effective marketplace possible, all stakeholders would have equal access to all relevant information. However, a company may feel that complete disclosure may hurt their competitive advantage or position. Offer an example of a circumstance where this may be the case. What do you think the company should do?

**Solution 1-57**

An example where disclosure may hurt the company's competitive advantage or position would be a legal battle. If the company were in the middle of a lawsuit, the company would want to be careful about how much information was disclosed because it might affect the outcome of the lawsuit. This is an ethical dilemma. The company must weigh the costs and benefits of sharing information. If the financial impact of the lawsuit is expected to be material, they should, at minimum, disclose its existence in the notes to the financial statements. If the amount and timing of any financial impact are sufficiently known and certain, an accrual of these amounts may be necessary.

**Ex. 1-59** Financial versus managerial accounting

Distinguish between financial and managerial accounting.

**Solution 1-59**

**Financial accounting (financial reporting)** is the process that culminates in the preparation of financial reports that cover all of the enterprise's business activities and that are used by both **internal and external** parties. Users of these financial reports include investors, creditors, and others.

In contrast, **managerial accounting** is the process of identifying, measuring, analyzing, and communicating financial information to internal decision-makers. This information may take varied forms, such as cost-benefit analyses and forecasts that management uses to plan, evaluate, and control an organization's operations.

AACSB: Analytic

**Ex. 1-65 Sources of GAAP**

International Financial Reporting Standards (IFRS) are the primary source of GAAP for public enterprises in Canada. They are, however, insufficient to address all of the accounting issues facing accountants. Explain why this is so and outline some other sources of GAAP that accountants use.

**Solution 1-65**

Although IFRS outline the specific accounting treatment for a multitude of items, for some items the guidelines are very general. Also, the business environment is complex and constantly changing and, therefore, some items may not be discussed at all. Thus, accountants must use IFRS in conjunction with other sources like professional judgement, pronouncements of other standard-setting bodies, accounting literature, and accepted industry practices.

Difficulty: Easy

Learning Objective: Explain the meaning of generally accepted accounting principles (GAAP) and the significance of professional judgement in applying GAAP.

Section Reference: Generally Accepted Accounting Principles

CPA: Communication

CPA: Financial Reporting

Bloomcode: Knowledge

AACSB: Communication

**Ex. 1-66 Sources of GAAP**

The Canadian principles-based GAAP does not offer specific standards for every transaction. When specific guidance cannot be found in primary sources such as the Handbook and Accounting guidelines, what process should the accountant follow in their consultation of other sources?

**Solution 1-66**

If primary sources do not deal with the specific issue, the entity should use accounting policies that are consistent with primary sources. The policies should be developed through use of professional judgement in accordance with the conceptual framework. The accountant might consider pronouncements of other standard setters, accepted industry practices, and other literature, with the goal of producing information that is as relevant and reliable.

Difficulty: Easy

Learning Objective: Explain the meaning of generally accepted accounting principles (GAAP) and the significance of professional judgement in applying GAAP.

CPA: Financial Reporting

Bloomcode: Knowledge

AACSB: Communication

**Ex. 1-67 Professional judgement**

Explain the principle of professional judgement. When or why might it be necessary to employ professional judgement, even in a rules-based system?

**Solution 1-67**

Professional judgement is the process by which professional accountants with significant education and experience apply general principles appropriately as they see fit. This is important in Canada because IFRS and ASPE are based primarily on general principles rather than on specific rules. It may also be useful in a rules-based system, as novel circumstances and transactions are bound to arise for which a rule does not yet exist. In these scenarios, the professional accountant must make use of professional judgement to decide which treatment/record-keeping approach to a transaction will provide the most relevant, reliable, and timely information to financial statement stakeholders.

**Ex. 1-68 SOX and standard setting**

After several highly publicized accounting scandals in the U.S. such as Enron, Sunbeam, and WorldCom, all of whom, coincidentally, were clients of the former public accounting firm of Arthur Andersen, the U.S. regulators enacted the Sarbanes-Oxley Act (SOX). Pressure was put on Canada to follow a similar course. Explain what Canada has done to make public companies more accountable.

**Solution 1-68**

First, the Canadian Public Accountability Board (CPAB) was created to supervise accounting issues similar to those addressed by SOX. These included establishing auditing, quality control, and independence standards and rules.

The Canadian Securities Administrators (CSA) has issued guidelines/rules that require (among other things)

1. company management to take responsibility for the appropriateness and fairness of the financial statements
2. public enterprises to have independent audit committees
3. public accounting firms to be subject to CPAB
4. greater disclosures including ratings from rating agencies, legal proceedings, payments to stock promoters, and details about corporate directors.

Difficulty: Easy

Learning Objective: Discuss some of the challenges and opportunities for accounting.

Section Reference: Challenges and Opportunities for the Accounting Profession

CPA: Communication

CPA: Financial Reporting

Bloomcode: Knowledge

AACSB: Communication

**Ex. 1-69** Challenges facing financial reporting

In North America, the financial reporting environment is changing at a very rapid pace. Briefly describe four challenges facing the accounting profession today.

**Solution 1-69**

1. Oversight in the capital marketplace. The Sarbanes-Oxley Act (SOX) instituted the Public Company Accounting Oversight Board (PCAOB), stronger independence rules for auditors, reporting on the effectiveness of the financial reporting internal control system, and disclosure of a code of ethics for senior financial officers.

Canada has followed suit and developed the Canadian Public Accountability Board (CPAB). As well, the Canadian Securities Administrators (CSA) requires company management to take responsibility for the appropriateness and fairness of the financial statements, public companies to have independent audit committees, and public accounting firms to be subject to the CPAB. The CSA also requires much greater disclosures. The overall impact of these financial reforms has been to put more emphasis on government regulation and less on self-regulation.

2. Centrality of ethics. Accountants are central in making the capital marketplace efficient and effective. However, ethical dilemmas are common, often precipitated by management bias. It is not always easy to “do the right thing.” Pressure to “bend the rules,” “play the game,” or “just ignore it” are often there. There is no consensus (yet) among accounting professionals as to what a comprehensive ethical system is, and so it is up to the individual accountant to maintain a high standard of ethics at all times.
3. Standard setting in a political environment. Since standard setting is part of the real world, accounting standards often arise from political action. The stakeholders who lobby the hardest may unduly influence new or revised accounting standards. This is not surprising since many accounting standards have economic consequences. Thus standard setters such as the IASB must consider the needs of all stakeholders when creating or changing standards. The challenge is to find a balance between letting stakeholders have a say while not bowing to undue political pressure.
4. Principles vs. rules. Rules-based, prescriptive systems (such as U.S. GAAP or the Canadian income tax system) have a significantly larger body of knowledge than a principles-based approach such as IFRS and ASPE. However, there is a tendency to interpret the rules literally with a rules-based approach, possibly because it may be easier to defend the accounting for a particular item. A disadvantage of the rules-based approach is that it may not always communicate the best information to the user. The principles-based approaches are based on professional judgement, resulting in carefully reasoned application of the principle to the business facts. Since the body of knowledge is smaller with principles-based approaches, the standard setters must ensure it rests on a cohesive set of principles and conceptual framework, which is sufficiently flexible, and sufficiently detailed to provide good guidance.

Other challenges are the impact of technology and integrated reporting.

**Ex. 1-70** Role of executives and management in a post-SOX world

SOX introduced sweeping changes to the institutional structure of the accounting profession. What key provision was introduced relating to the role of management and executive officers, and their relationship to financial reporting? Why?

**Solution 1-70**

Chief executive officers (CEOs) and chief financial officers (CFOs) are required to certify that the financial statements and company disclosures are appropriate and fairly presented. In many cases, they must forfeit bonuses and profits if there is a restatement of their companies' accounting disclosures. Management must report on the effectiveness of financial reporting internal control systems. Requiring management and executives to make these attestations holds them accountable, and creates a greater sense of ownership over the financial statements. When this is done, management and executives are unable to claim ignorance if intentional misrepresentations or frauds present in the financial reports are uncovered, as many were in the pre-SOX era.

**Ex. 1-71** Technology and financial information

Explain how technology impacts the accountants' role as providers of information.

**Solution 1-71**

Technology impacts the process of identifying, measuring, and communicating useful information to users in profound ways. Information is increasingly abundant and available through technology. Companies are required to file disclosures electronically through securities commissions. Investors have access to a greater abundance of information as well. This includes earnings calls, analyst briefings, interviews with management and regulators, and much more. The Internet allows disclosure of and access to a much larger group of users while reducing the cost of said communication. As technology advances at a rapid pace, information may even be available in real time. This raises the concern of equal access to information, as it exposes companies to additional risks as they pertain to information security.

**Ex. 1-74** Principles- versus rules-based approaches

Explain the difference between the principles- versus rules-based approaches regarding GAAP.

### Solution 1-74

In a **rules-based** approach—much like the Canadian tax system—there is a rule for most things (even though the rule may be based on a principle). The result is that the body of knowledge in a rules-based approach is significantly larger than that in a principles-based approach.

IFRS and ASPE are more **principles-based**. The body of knowledge is smaller and the idea is that one or more principles form the basis for decision-making in many differing scenarios. In addition, professional judgement is fundamental. There is less emphasis on right and wrong answers. Rather, the financial reporting is a result of carefully reasoned application of the principle to the business facts.

## PROBLEMS

### P1-75 U.S. GAAP on Canadian GAAP

Explain why U.S. GAAP has and will continue to have a significant impact on GAAP in Canada.

### Solution 1-75

U.S. GAAP has and will continue to have a significant impact on GAAP in Canada for three reasons:

Given that Canadian GAAP is based on principles and is fairly open to interpretation, accounting professionals have often (in past) relied on the more prescriptive, specific guidance provided in U.S. GAAP.

1. Many public Canadian companies are also listed on U.S. stock markets and exchanges and to be listed on a U.S. exchange, these companies must follow U.S. GAAP or IFRS. As we move toward international harmonization in accounting standards, the U.S. standards will continue to influence Canadian and international standards due to the significant capital pool of these markets.
2. The United States has not adopted IFRS. In October 2002, the FASB and IASB signed an agreement (the Norwalk Agreement) that formalized their commitment to converge U.S. and international accounting standards. In 2008, the FASB and IASB reaffirmed their commitment to continue to work together, although it is not clear whether this relationship will continue. In addition, the SEC issued a document known as the “Roadmap,” outlining issues regarding the convergence initiative. More recently, the United States has been examining just how moving to IFRS might work from a practical perspective, if at all. It is uncertain as to how the FASB will proceed in terms of IFRS.

Difficulty: Easy

Learning Objective: Explain the need for accounting standards and identify the major entities that influence standard setting and financial reporting.

Section Reference: Standard Setting

CPA: Financial Reporting

Bloomcode: Knowledge

AACSB: Analytic

**P1-76** Shortcomings of rules-based approach

Discuss the shortcomings of the rules-based approach regarding GAAP.

### **Solution 1-76**

In a **rules-based** approach there is a tendency for companies to interpret the rules literally and many companies take the view that, if there is no rule for a particular situation, they are free to choose whatever treatment they think is appropriate (within reason). Similarly, many believe that as long as they comply with a rule, even in a narrow sense, they are in accordance with GAAP. Consequently, the rules-based approach does not always emphasize the importance of communicating the **best** information for users. Just because a practice is defensible does not mean it provides the best information. This particular issue is a significant one for the United States as it continues to debate whether to adopt IFRS which is principles-based rather than rules-based.
