82) *Match the definition on the left with the term on the right.*

83) *Match the example on the left with the dimension of the self on the right.*

84) *Match the terms on the left with the interpersonal needs on the right.*

85) *Match the description on the left with the area of the Johari Window model on the right.*

86) Describe the three ways of being self-aware.

Answer:

* Subjective self-awareness: our ability to differentiate ourselves from our environment.

* Objective self-awareness: our ability to be the object of our own thoughts and attentions.

* Symbolic self-awareness: unique to humans, our ability to think about ourselves and use language (symbols) to express these ideas to others.

87) Name and briefly describe the three components of the self identified by William James.

Answer:

*The *material self*, consisting of all the tangible things you possess.

*The *social self*, reflecting that part of you that interacts with others.

*The *spiritual self*, consisting of all your internal thoughts and introspections about your values and moral standards.

88) When are we most likely to incorporate the comments of others into our self-concepts?

Answer:

* We are more likely to incorporate another's statement if he or she is repeating something we have heard several times before.

* We are more likely to incorporate another's statement if he or she has already earned our confidence.

* We are more likely to incorporate another's statements if those statements are consistent with our own experiences.

89) What are the factors that shape the development of your self-concept? Briefly describe and give an example of each factor.

Answer:

Self: The sum total of who a person is; a person's central inner force.

Self-concept: A person's subjective description of who the person thinks he or she is.

Refer to Recap: "Who You Are Is Reflected in Your Attitudes, Beliefs, and Values" on page 29 of the textbook.

Attitudes: Learned predispositions to respond to a person, object, or idea in a favourable or unfavourable way (likes and dislikes).

Beliefs: The ways in which we structure reality (what is true and what is false).

Values: Enduring concepts of what is right and wrong (what is good and what is bad).

90) Explain how self-concept develops. Include examples.

Answer:

Answers will vary but should include the following five basic means and demonstrate a thorough understanding of each.

* Our interactions with other individuals

* Our associations with groups

* The roles we assume

* Our own labels

* Our personalities

92) Define and compare the concepts of self-concept and self-esteem.

Answer:

Self-concept is a subjective description of who you *think* you are. It is reflected in your attitudes, beliefs, and values. Interactions with both individuals and groups provide labels and information that shape how we see ourselves.

Self-esteem reflects an *evaluation* of who you are. It is an evaluation of your worth or value as reflected in your perception of such things such as your skills, abilities, talents, and appearance.

93) How does your self-esteem affect how you interpret the messages of others?

Answer:

* People with low self-esteem tend to be more sensitive to criticism and more critical of others. They believe they are not popular and expect to be rejected by others. They may dislike being observed and feel threatened by people who they feel are superior. They expect to lose, are overly responsive to praise and compliments, and evaluate their overall behaviour as inferior to that of others.

* Those with high self-esteem will have higher expectations for solving problems, will think more highly of others, and will be more likely to accept praise without embarrassment. They will be more comfortable being observed, will be able to admit both strengths and weaknesses, and will be more comfortable interacting with those who view themselves as highly competent. They will expect to be accepted, seek more opportunities to improve their skills, and will evaluate their overall behaviour more positively.

94) Describe Will Schutz's three primary social needs and provide examples for each.

Answer:

Answers will vary but should include the following.

* The need for inclusion suggests that we all need to be included in the activities of others. We need to be invited to join. When our friends go out, we want to be included in the invitation. We all need some social contact and to be included in the activities of others.

* The need for control suggests that we need some balance between dominating and being dominated in our relationships. We do not always want to be in control, but we do want to be in control sometimes.

* The need for affection suggests that we all need to give and receive love.

96) How does one's self-esteem affect his or her interpretation of messages?

Answer:

*Someone with low self-esteem may be more sensitive to criticism and more defensive with people whom they consider to be superior. As a result, they will tend to limit or minimize opportunities for evaluation by withdrawal.

*Someone with high self-esteem will tend to be more positive with others and with him or herself, be better able to make realistic assessments of criticism, and be more comfortable interacting with others.

97) Discuss how taking the McCroskey and Richmond's "Sociocommunicative Orientation" test can help us to be better interpersonal communicators.

Answer:

The test assesses communication style on the assertiveness and responsiveness dimensions. There is no one best style for every situation. The test can provide information to you about your preferred styles. Whether or not those styles are appropriate depends on the situation. You can learn to adapt your style to suit the appropriateness of the situation. This is a self-assessment. It may be interesting to ask another person whose opinion you value to also assess your styles. You can check if the assessments are similar or different.

98) What are some of the risks associated with self-disclosure?

Answer:

*The other person can share revealed information with others.

*The other person has additional power if the information disclosed is something you'd rather not have others know.

*There is a risk of rejection and/or disapproval.
