4. If it takes 30 seconds to go from the 1st floor to the 3rd floor

then it takes 15 seconds to go from 1st to second and

15 seconds to go from 2nd to 3rd.

So it is 15 seconds from floor to floor.

So to go from 1st to 6th, it would take:

$15 \text{ s} \times 5 = 75 \text{ s}$

$$5. \text{ The mean} = \bar{X} = \frac{\sum X}{n}$$

$$6. \text{ It will take you } \frac{1232 \text{ pages}}{11 \text{ pg/h}} = 112 \text{ h to read the book}$$

You have 5 days or 120 h until the book must be read

120 h - 112 h would only give you 8 h left

No, you will not be able to finish the book before the exam

7. The flagpole and rope form a right triangle with the rope being the hypotenuse. Since the hypotenuse cannot equal a leg, the flagpoles have 0 ft between them.

8. $\$700 - \$600 = \$100$ profit after first transaction

$\$900 - \$800 = \$100$ profit after second transaction

$$0.01x = 100$$

$$x = \$10,000 \text{ in each}$$
