Multiple Choice Questions

16. Pursuant to the Uniform Arbitration Act:

(p. 28)

- A. a court will review the wisdom of the decision of an arbitrator.
- B.** both the agreement of parties to arbitrate and the arbitration award are enforceable in court.
- C. the agreement of parties to arbitrate is enforceable in court, but the arbitration award is unenforceable.
- D. the arbitration award is enforceable in court, but the agreement of parties to arbitrate is unenforceable.

Most states have passed the Uniform Arbitration Act, which makes both the agreement of parties to arbitrate and the arbitration award enforceable in court. A court will not review the wisdom of the decision of an arbitrator. It may, however, hold that the dispute was not arbitratable under the agreement of the parties, or that the arbitrator exceeded his or her authority, or acted arbitrarily, capriciously, or in a discriminatory manner.

17. Which of the following statements is true about a minitrial?

(p. 29)

- A. A minitrial involves a six-member mock jury empaneled by the court that hears a shortened presentation of the case by the lawyers for each side and renders an advisory verdict.
- B.** A minitrial often involves a neutral third-party advisor who will render a nonbinding opinion, if a settlement is not reached, regarding how a dispute is likely to be resolved if it goes to trial.
- C. A minitrial is conducted under court guidance.
- D. A minitrial differs from mediation in that the third-party to whom the dispute is submitted decides the outcome.

The minitrial often involves a neutral third-party advisor. If a settlement is not reached, she or he will render a nonbinding opinion regarding how the dispute is likely to be resolved if it goes to trial, and how the court is likely to rule on factual and evidentiary issues.

- B. executives of the disputing companies, who have settlement authority, hear a shortened presentation of the case by the lawyers for each side
- C. a six-member mock jury empaneled by the court hears a shortened presentation of the case by the lawyers for each side
- D. executives of the disputing companies meet with lawyers for each side to negotiate a settlement

21. Adia filed a case against Chang in the court at Ohio. However, Chang had never visited Ohio (p. 37) and had no personal ties with anyone in Ohio. Chang could successfully argue that the court:

- A. lacked personal jurisdiction.
- B. was in proximity to the place where Chang resides.
- C. was limited by subject matter jurisdiction.
- D. did not have judges that would understand the language spoken by him.

In this scenario, Chang can successfully argue that the court lacks personal jurisdiction. A court may not decide a legal dispute unless it has personal jurisdiction over the defendant. Personal jurisdiction generally does not exist unless the defendant has some close connection with the territory where the suit is brought. Personal jurisdiction is likely to exist if the defendant is a resident of the territory where the court is located or if a nonresident defendant is physically present in that territory.

- D. are called municipal courts in urban areas.

Trial courts differ from inferior courts in that the trial courts are courts of general jurisdiction; they are not limited by the amount of civil damages that can be awarded or the criminal penalties that can be imposed. Their geographic jurisdiction is often a county. In addition, trial courts are courts of record. Thus, an appeal can be taken from a trial court decision.

- B. establish new facts for all cases.
- C. accept the findings of the trial court with minor changes even if it goes against all the evidence.
- D. review the proceedings in the trial court and correct legal errors made by the trial judge.

As the name implies, state appeals courts hear cases that have been appealed from trial court decisions or state administrative agency rulings. Generally, appellate courts do not hear witnesses or determine facts. Their job is to review the proceedings in the trial court and correct legal errors made by the trial judge. Appellate courts must accept the trial court's findings of fact unless it goes against all the evidence.

(p. 34-35)

- A. Small claims court
- B. Tax court
- C. District court
- D. Justice of peace court

Karl's case should be filed in a district court. Cases heard in the federal courts fall into one of two classes: They are either cases involving a federal question or cases in which there is diversity of citizenship between the parties. If the parties are from different states, and the amount involved in the dispute is \$75,000 or more, the plaintiff may choose to bring suit in either state or federal court. With few exceptions, lawsuits brought in federal courts must be started in district courts. These are the federal trial courts.

- D. are specialized courts in the federal court system.

With few exceptions, lawsuits brought in federal courts must be started in district courts. These are the federal trial courts. Like state trial courts, they have both fact finding (by the judge or jury) and law-finding (by the judge) functions.

- B. review legal conclusions reached by lower federal courts.
- C. hear cases that have been appealed from Supreme Court decisions.
- D. take the final responsibility for interpretation of the Constitution and federal statutes.

An appeal from a district court is taken to a U.S. court of appeals. Like state intermediate appellate courts, the U.S. courts of appeals generally do not have a fact-finding function. They only review the legal conclusions reached by lower federal courts. The courts of appeal also hear appeals from many federal administrative agency decisions.

31. Which of the following statements about the adversary system is true?

(p. 36)

- A. The adversary system represents the idea that truth is best discovered through the presentation of competing ideas.
- B. The judge, in an adversary system, is actively involved in determining the facts of a case.
- C. The lawyers, in an adversary system, do not persuade the judge that the other party's view of the facts is in error.
- D. The judges have a duty to direct the search for truth rather than expecting it to emerge from the efforts of the lawyers for the parties.

The adversary system represents the idea that truth is best discovered through the presentation of competing ideas. It is the lawyer's job to present the client's view of the facts to the judge, or to the jury if one is used. The judge's role, under the adversary system, is viewed as not only unbiased but also essentially passive. In essence, a trial judge acts as a referee.

- A. unbiased; passive
- B. biased; passive
- C. unbiased; active
- D. biased; active

The judge's role under the adversary system is viewed as not only unbiased but also essentially passive. The trial judge is to keep order in the court and, when a jury is present, to see that the lawyers do not use improper methods to influence the jury. Generally, the judge stops questions from lawyers or orders witnesses to change their behavior only when asked to do so by one of the lawyers.

When a lawsuit (p. 37) was filed against the hotel for serving stale food to its guests, the managers of the hotel decided to hire a lawyer who practices in an adversary system. How is this situation advantageous to Smith Hotels Inc.?
- A. The system makes it easier for a biased judge to control the outcome of a case.
 - B.** The wealthy can hire better lawyers as the system does not work when the opposing lawyers are of unequal skill.
 - C. The system lays emphasis on the competition to win which discourages overstatement of the truth.
 - D. The adversary system resents the idea that truth is best discovered through the presentation of competing ideas.

- B.** These are the first documents filed with the court, and they start and define the lawsuit.
- C. The case is set for trial on the court calendar once the pleadings have commenced.
- D. Both disputed and undisputed matters in the pleadings are tried in court.

Pleadings include complaints, answers, and replies. These are the first documents filed with the court, and they start and define the lawsuit. An answer that responds to a complaint may also state an affirmative defense. An affirmative defense is a rule of law enabling the defendant to win even if all of the plaintiff's allegations are true. For example, the plaintiff may allege that the defendant breached their contract. The defendant might respond by admitting that the contract had been breached but that he or she should not be held liable because the contract had been induced by the plaintiff's fraudulent misrepresentations.

- C. A defendant's attorney may conduct a redirect examination to clarify the plaintiff's view of the facts.
- D. During a witness's testimony, the opposing attorney cannot object to the presentation of certain evidence.

A plaintiff's attorney presents the evidence through witnesses and exhibits. Each witness is sworn and then examined by the plaintiff's attorney; this is called direct examination. The defendant's attorney may cross-examine each witness, trying to raise doubts as to the person's credibility or trustworthiness. The plaintiff's attorney may then conduct a redirect examination to clarify the plaintiff's view of the facts and perhaps to minimize whatever negative effect was created in the cross-examination. - B. It is placed on the defendant.
- C. During the closing of a case, when the defendant's attorney goes first, he or she has the burden of proof.
- D. It is similar to that for civil cases.

The attorneys make closing arguments that sum up a case. Normally the defendant's attorney goes first. This gives the plaintiff, who has the burden of proof, the last word. The burden of proof for a criminal case is different from that for a civil case. Short Answer Questions

47. The employees of Claudio Inc. were on strike for 30 days and that led to huge losses for the business. Owing to loss of business and wages, both parties wanted to settle the dispute but were unable to negotiate successfully. Which method of alternative dispute resolution is best suited to them? Why?

The alternative dispute resolution method that is best suited to them is mediation. Mediation is the best suited method to resolve the dispute in the given case because a mediator often tries first to communicate the positions of the parties to each other. It allows the parties to settle the case by appointing a mediator who merely facilitates the negotiation by proposing a basis for settlement and does not give awards or opinions on the merits of the dispute. It is a suitable method when the two parties, here the employees of Claudio Inc. and the management, have a continuing relationship because it allows them to compromise and to reach a solution themselves.

Trial courts differ from inferior courts in that the trial courts are courts of general jurisdiction; they are not limited by the amount of civil damages that can be awarded or the criminal penalties that can be imposed. Their geographic jurisdiction is often a county. They also differ in that the judge must be a lawyer, and juries are provided for. The juries decide the facts and, under instructions from the judge about the applicable law, reach a verdict. In addition, trial courts are courts of record. Thus, an appeal can be taken from a trial court decision.

49. What are the advantages and disadvantages of the adversary system?

(p. 37)

Advocates of the adversary system believe that truth is most effectively determined as a result of each lawyer presenting his or her client's "case" through witnesses, and that deception and misperception are best exposed through cross-examination. In addition, the system makes it more difficult for a dishonest or biased judge to control the outcome of a case. Critics argue that honest witnesses can be confused by hostile questioning. They say that the system does not work when the opposing lawyers are of unequal skill. This gives an advantage to the wealthy, who can hire better lawyers. Furthermore, the competition to win can encourage suppression of unfavorable facts and overstatement, if not misstatement, of the truth.

50. Under what conditions can one or more members of a class sue or be sued as representative of (p. 38) a class? What type of lawsuit can their claims be consolidated into?

Lawsuits can have more than one plaintiff and/or defendant. Sometimes, when a defendant's actions have injured many plaintiffs, their claims may be consolidated into a class action lawsuit. One or more members of a class may sue or be sued as representative of a class if (1) the class is so numerous that joinder of all members is impracticable, (2) there are questions of law or fact common to the class, (3) the claims or defenses of the representative parties are typical of the claims or defenses of the class, and (4) the representative parties will fairly and adequately protect the interests of the class.
