- ANS: F PTS: 1 DIF: 2 REF: 46
 NAT: AACSB Analytic | Reflective Thinking TYP: F
41. There are four components to the systems theory: inputs, outputs, feedback and the customers.
- ANS: F PTS: 1 DIF: 1 REF: 47
 NAT: AACSB Analytic | Creation of Value TYP: F
42. From a systems theory viewpoint, outputs are the material, human, financial, or information resources used to produce goods and services.
- ANS: F PTS: 1 DIF: 2 REF: 47
 NAT: AACSB Analytic | Creation of Value TYP: F

43. An open system is open to the suggestions and recommendations of its workers in systems theory.

ANS: F PTS: 1 DIF: 1 REF: 47
NAT: AACSB Analytic | Creation of Value TYP: F

44. Closed systems must interact with the environment to survive.

ANS: F PTS: 1 DIF: 1 REF: 47
NAT: AACSB Analytic | Creation of Value TYP: F

45. When the shop foreman receives and rewards valuable suggestions from its workers, and this leads to continual improvement of production, synergy has occurred.

ANS: T PTS: 1 DIF: 2 REF: 47
NAT: AACSB Analytic | Creation of Value TYP: A

46. Contingency theory suggests that managers would be more successful if they learned the best way to manage and motivate their employees, and then applied this knowledge in a universally consistent way.

ANS: F PTS: 1 DIF: 2 REF: 48
NAT: AACSB Analytic | Leadership Principles TYP: A

47. A contingency view perceives every situation as unique.

ANS: F PTS: 1 DIF: 2 REF: 48
NAT: AACSB Analytic | Strategy TYP: F

48. The inherent focus of TQM is on managing the total organization to deliver quality to the customer.

ANS: T PTS: 1 DIF: 1 REF: 49
NAT: AACSB Analytic | Creation of Value TYP: F

49. Benchmarking involves finding out what the customer wants.

ANS: F PTS: 1 DIF: 2 REF: 49
NAT: AACSB Analytic | Creation of Value TYP: F

50. The implementation of small, incremental improvements in all areas of the organization on an ongoing basis refers to continuous improvement.

ANS: T PTS: 1 DIF: 1 REF: 49
NAT: AACSB Analytic | Creation of Value TYP: F

51. In learning organizations, although team leadership is critical, the traditional boss is practically eliminated.

ANS: T PTS: 1 DIF: 2 REF: 50
NAT: AACSB Analytic | Creation of Value TYP: F

52. Managers learn to think in terms of "control over" rather than "control with" others in learning organizations.

ANS: F PTS: 1 DIF: 1 REF: 50
NAT: AACSB Analytic | Leadership Principles TYP: F

53. The fundamental unit in a learning organization is command-and-control management teams.

ANS: F PTS: 1 DIF: 2 REF: 50
NAT: AACSB Analytic | Creation of Value TYP: F

54. Supply chain management refers to the sequence of suppliers and purchasers, covering all stages of processing from obtaining raw materials to distributing finished goods to consumers.

ANS: T PTS: 1 DIF: 1 REF: 50
NAT: AACSB Analytic | Creation of Value TYP: F

55. The sequence of suppliers and purchasers, covering all stages of processing from obtaining raw materials to distributing finished goods to consumers refers to enterprise resource planning.

ANS: F PTS: 1 DIF: 2 REF: 50
NAT: AACSB Analytic | Creation of Value TYP: F

56. Customer relationship management systems collect and manage large amounts of data about customers and make them available to employees.

ANS: T PTS: 1 DIF: 1 REF: 51
NAT: AACSB Technology | Creation of Value TYP: F

CASE**Scenario - Britney Marr**

The opportunity to gain a foothold in the snack cracker industry had just been found. Britney Marr, an account executive manager for Baked Wheat Industries had developed an interest in wheat crackers two months ago when one of her newly hired account execs, Amy Bender, had convinced her about the high margins and promising future associated with that market. Marr had always believed that if you do your homework in hiring the best people then it only makes sense to listen to their recommendations and implement their suggestions.

Marr had given her approval to Bender to explore opportunities to move into this promising new market. This morning, Bender had reported that the Jackson Corporation had severed its contract with Feel Good Crackers Incorporated. Apparently, the Feel Good salesman had shared sensitive information about Jackson at a cocktail party. Bender had already established a good relationship with Feel Good buyers and so recognized this as an opportunity to expand her market into wheat crackers.

SHORT ANSWER

1. List three of the basic ideas of scientific management.

ANS:

Any three of the following develop standard methods for doing each job; select workers with appropriate abilities; train workers in standard methods; support workers and eliminate interruptions; and provide wage incentives.

2. List the three assumptions associated with McGregor's Theory X.

ANS:

(1) Individuals have an innate dislike of work and will try to avoid it; (2) Most people must be coerced to get them to put out a reasonable level of effort; and (3) The typical person prefers to be told what to do.

ESSAY

1. The writings of Fayol, Taylor, and Weber provide the foundation for modern management. Identify the school of thought associated with each writer and compare the focus that each writer takes in relation to the organization.

ANS:

Fayol is associated with the Administrative School, focusing on the manager level. Taylor is associated with Scientific Management, and focused on the work level. Weber is associated with the Bureaucratic Model, and his focus was on the level of the organization.

PTS: 1 DIF: 2 REF: 37-40
NAT: AACSB Analytic | Creation of Value TYP: F

2. Discuss the advantages and disadvantages of Taylor's Scientific Management.

ANS:

The advantages of scientific management included the standardization of work, the systematic study of work, the linking of performance and pay, and improved productivity. The disadvantages included its failure to consider the social context within which work took place and its failure to appreciate workers' needs, other than their need for money.

PTS: 1 DIF: 2 REF: 37-38
NAT: AACSB Analytic | Creation of Value TYP: F

3. Briefly describe what happened in the Hawthorne Studies and explain the results and conclusions of these studies.

ANS:

Harvard researchers, working under the direction of Elton Mayo, were studying the effects of various lighting conditions on worker performance at the Western Electric plant in Hawthorne, Illinois. Each time an experimental change was made, performance improved, regardless of the change. The early conclusion was that workers perceived that their work was important enough to hire researchers to work with them, and this recognition of importance was sufficient to motivate improved performance. This conclusion led to the development of the Human Relations Movement, stressing the importance of satisfied, happy workers. Recent analysis suggests that money may have been the single most important motivating factor.

NAT: AACSB Analytic | Creation of Value TYP: F

4. Describe the assumptions behind McGregor's Theory X and Theory Y. How do the theories relate to the classical perspective on management and early human relations ideas?

ANS:

Refer to Exhibit 2.4 in the text for the assumptions behind each theory. McGregor believed that the classical perspective was based on Theory X assumptions about workers. He also felt that a slightly modified version of Theory X fit early human relations ideas. He proposed Theory Y as a more realistic view of workers for guiding management thinking.

PTS: 1 DIF: 3 REF: 43
NAT: AACSB Analytic | Creation of Value TYP: F

5. Briefly describe systems theory, including synergy.

ANS:

Systems theory suggests that an organization can be considered a system composed of a number of interrelated subsystems. These subsystems include people, structure, technology, and goals. A change in one subsystem results in a rippling effect on the other subsystems. Managed properly, the subsystems work well together and produce more as a whole system than the parts could produce working alone. This is synergy.

PTS: 1 DIF: 2 REF: 47
NAT: AACSB Analytic | Creation of Value TYP: F

6. Discuss the differences between the case view, the universalist view, and the contingency view.

ANS:

These viewpoints relate to the applicability of management principles. The case view holds that every situation is unique, thus there are no universal principles. Conversely, the universalist view believes that the same management principles will work across every situation in every organization. The contingency view is an integration of these two, i.e., while there are no universal principles, there are common patterns and characteristics. The manager's task is to identify what principles will work when, based on an analysis of key contingencies.
