ESSAY

1. Answering a few key questions will help you create a presentation using appropriate presentation media that successfully delivers its message or motivates the audience to take an action. Seven planning questions were listed in the text. Please list four of these questions.

ANS:

- What is the purpose of your presentation?

- Who is your audience?
- What are the main points of your presentation?
- What presentation media will help your audience absorb the information and remember it later?
- What is the format for your presentation?
- How much time do you have for the presentation?
- Will your audience benefit from handouts?

PTS: 1 REF: PPT 4 TOP: Critical Thinking

2. Please briefly describe a bulleted list, a numbered list, and an unnumbered list.

ANS:

A bulleted list is a list of items with some type of bullet symbol in front of each item or paragraph.

A numbered list is similar to a bulleted list except that numbers appear in front of each item instead of bullet symbols. Generally you should use a numbered list when the order of the items is important—for example, if you are presenting a list of step-by-step instructions that need to be followed in sequence in order to complete a task successfully.

An unnumbered list is a list that does not have bullets or numbers preceding each item. Unnumbered lists are useful in slides when you want to present information on multiple lines without actually itemizing the information. For example, contact information for the presenter, including his or her email address, street address, city, and so on would be clearer if it were in an unnumbered list.

PTS: 1 REF: PPT 14 - PPT 17 TOP: Critical Thinking

3. Briefly explain how to undo and redo actions.

ANS:

If you make a mistake or change your mind about an action as you are working, you can reverse the action by clicking the Undo button on the Quick Access Toolbar. You can undo up to the most recent 20 actions by continuing to click the Undo button, or by clicking the Undo button arrow and then selecting as many actions in the list as you want. You can also Redo an action that you undid by clicking the Redo button on the Quick Access Toolbar.

When there are no actions that can be redone, the Redo button changes to the Repeat button. You can use the Repeat button to repeat an action, such as formatting text as bold. If the Repeat button is light gray, this means it is unavailable because there is no action to repeat (or to redo).
