	True False
10.	Role perceptions are the extent to which people understand the job duties assigned to them.
	True False
11.	Role perceptions are important because they represent how good an employee feels about their job and increase motivation.
	True False
12.	Situational factors are working conditions within the employee's control.
	True False
13.	The four elements of the MARS model affect all voluntary workplace behaviors and performance
	True False
14.	Task performance refers to goal-directed behaviors under the individual's control that support organizational objectives.
	True False

15.	Proficiency refers to how well an employee responds to, copes with, and supports new circumstances and work patterns.
	True False
16.	Organizational citizenship behaviors (OCBs) include various forms of cooperation and helpfulness to others that support the organization's social and psychological context.
	True False
17.	An employee creates unnecessary conflicts with his coworkers at his workplace. This is an example of organizational citizenship behavior.
	True False
18.	American employees are absent from scheduled work at an alarming average of 20 days per year.
	True False
19.	Employees who experience job dissatisfaction, workplace incivility, or work-related stress are more likely to be absent or late for work because taking time off is a way of temporarily withdrawing from those situations.
	True False
20.	Presenteeism refers to employees who attend work even though their capacity to work is significantly diminished by illness, fatigue, personal problems, or other factors.
	True False
21.	Personality is a relatively stable pattern of behaviors and internal states that explains a person's behavioral tendencies.
	True False

22.	Personality traits are more evident in situations where an individual's behavior is subject to social norms and reward systems.
	True False
23.	Personality is completely determined by heredity.
	True False
24.	The "Big Five" personality dimensions represent five clusters that represent most personality traits
	True False
25.	The most researched and respected clustering of personality traits is the MARS model.
	True False
26.	Phoebe, a manager at a firm, was conventional, resistant to change, and unimaginative. This implies that Phoebe possessed openness to experience.
	True False
27.	Conscientiousness refers to the extent that people are sensitive, flexible, creative, and curious.
	True False
28.	People with a high score on the neuroticism personality dimension tend to be more relaxed, secure, and calm.
	True False
29.	Agreeableness, extraversion, and conscientiousness are three of the "Big Five" personality dimensions.
	True False

30.	Conscientiousness is one of the best personality traits for predicting job performance in most job groups.
	True False
31.	Sensing, feeling, and judging are three of the "Big Five" personality traits.
	True False
32.	Extraverts are people who are quiet, cautious, and less interactive with others.
	True False
33.	The Myers-Briggs Type Indicator measures the personality traits described by Swiss psychiatrist Carl Jung.
	True False
34.	People with a perceiving orientation are less flexible and effective in their functioning.
	True False
35.	The MBTI is an excellent predictor of job performances and is recommended for employment selection.
	True False
36.	The MBTI instrument is mostly used for team building and career development.
	True False
37.	Personality traits are the best predictors of work performance.
	True False

38.	Values	are stable, evaluative beliefs about what is important in a variety of situations.
	True	False
39.	People	e arrange values into a hierarchy of preferences, called a value system.
	True	False
40.		imension of Schwartz's Values Circumplex has openness to change at one extreme and vation at the other extreme.
	True	False
41.	Values	and personality traits are related to each other and are essentially the same thing.
	True	False
42.		Schwartz's Values Complex, the value category of self-direction refers to the pursuit of ire, enjoyment and the gratification of desires.
	True	False
43.	. Work environments influence our behavior, so they necessarily encourage or discourage values consistent behavior.	
	True	False
44.		n-organization values congruence occurs when a person's values are similar to the ization's dominant values.
	True	False
45.		eal situation in organizations is to have employees whose values are perfectly congruent ne organization's values.
	True	False

46.		rianism suggests that we should choose the option that provides the highest degree of ction to those affected.
	True	False
47.		outive justice is sometimes known as a consequential principle because it focuses on the quences of our actions, not on how we achieve those consequences.
	True	False
48.		problem with applying the individual rights principle of ethical decision making is that one dual right may conflict with another.
	True	False
49.		stributive justice principle of ethical decision making advocates the principle that benefits d be distributed among people irrespective of their abilities and similarities.
	True	False
50.	Moral	sensitivity is the degree to which an issue demands the application of ethical principles.
	True	False
51.	-	ype of factor that can change a person's moral sensitivity is expertise or knowledge of iptive norms or rules.
	True	False
52.	Mindf	ulness refers to the level of empathy a person has when referring to their moral sensitivity.
	True	False
53.		nical code of conduct is a statement about desired practices, rules of conduct and philosophy the organization's relationship to its stakeholders and the environment.
	True	False

54.	Collectivism is a cross-cultural value describing the degree to which people in a culture emphasize personal duty to the groups in which they belong.	<u>r</u> e
	True False	
55.	Individualism and collectivism are mutually exclusive values found in certain countries and places	
	True False	
56.	In terms of cross-cultural values, people in the United States tend to have relatively high individualism, middle to high achievement orientation, and medium to low power distance.	
	True False	
57.	People with high power distance expect relatively equal power sharing.	
	True False	
58.	People with high achievement orientation tend to value assertiveness, competitiveness, and materialism.	
	True False	
59.	One limitation with some research on cross-cultural values is that it incorrectly assumes that everyone within a specific country holds similar values.	
	True False	
Mu	ltiple Choice Questions	

60.	Which of the following directly influences an employee's voluntary behavior and performance?
	A. Role perceptions B. Moral intensity C. Corporate social responsibility D. Uncertainty avoidance E. Income
61.	Which of the following identifies the four factors that directly influence individual behavior and performance?
	A. Utilitarianism  B. MARS model  C. Schwartz's model  D. Holland's model  E. Myers-Briggs Type Indicator
62.	Which of the following are external to the individual but still affect his/her behavior and performance?
	A. Motivations B. Role perceptions C. Situational factors D. Abilities E. Resolutions

63.	represents the forces within a person that affect the direction, intensity, and persistence of
	voluntary behavior.
	A. Motivation
	B. Personality
	C. Values
	D. Ethics
	E. Ability
64.	Motivation affects a person's of voluntary behavior.
	A. direction, intensity, and persistence
	B. antecedents, consequences, and reinforcers
	C. size, shape, and weight
	D. aptitudes, abilities, and competencies
	E. agreeableness, locus of control, and ethical sensitivity
65.	Which of the following refers to the fact that motivation is goal-directed, not random?
	A. Persistence
	B. Direction
	C. Intensity
	D. Aptitude
	E. Competencies
66.	Which of the following best represents the amount of effort allocated to a particular goal?
	A. Persistence
	B. Direction
	C. Intensity
	D. Aptitude
	E. Competencies

67.	Which of the following refers to the natural talents that help employees learn specific tasks more quickly and perform them better?
	A. Persistence levels
	B. Direction
	C. Intensity
	D. Aptitude
	E. Commitment
68.	Which of the following concepts consists of aptitudes, skills, and competencies?
	A. Motivation
	B. Personality
	C. Values
	D. Ethics
	E. Ability
69.	All technical employees at a paper mill take a course on how to operate a new paper-rolling machine. This course will improve job performance mainly by altering employees':
	A. aptitudes.
	B. role perceptions.
	C. motivation.
	D. organizational citizenship.
	E. learned capabilities.

- 70. Travel Happy Corporation gives simple accounts to newly hired employees, and then adds more challenging accounts as employees master the simple tasks. This practice mainly:
  - A. improves role perceptions.
  - B. increases person-job matching.
  - C. reduces employee motivation.
  - D. provides more resources to accomplish the assigned task.
  - E. improves employee aptitudes.
- 71. You have just hired several new employees who are motivated, able to perform their jobs, and have adequate resources. However, they are not sure what tasks are included in their job.

  According to the MARS model, these new employees will likely:
  - A. emphasize the utilitarianism principle in their decision making.
  - B. have lower job performance due to poor role perceptions.
  - C. have high job performance because they are motivated and able to perform the work.
  - D. have above-average organizational citizenship.
  - E. have a high degree of differentiation according to Holland's classification of occupations.
- 72. Which of the following refers to a person's beliefs about what behaviors are appropriate or necessary in a particular situation?
  - A. Natural aptitudes
  - B. Role perceptions
  - C. Competencies
  - D. Locus of control
  - E. Situational factors

73.	To reduce the amount of non-recyclable waste that employees throw out each day, a major computer company removed containers for non-recyclable rubbish from each office and workstation. This altered employee behavior mainly by:
	A. increasing employee motivation to be less wasteful.
	B. helping employees to learn how to be less wasteful.
	C. altering situational factors so that employees have more difficulty practicing wasteful behavio
	D. increasing aptitudes that make employees less wasteful.
	E. increasing organizational citizenship so that employees will be less wasteful.
74.	refers to goal-directed behaviors under the individual's control that support organizationa objectives.
	A. Organizational citizenship
	B. Counterproductive behavior
	C. Task performance
	D. Maintaining attendance
	E. Intensity
75.	Assisting coworkers with their work problems, adjusting work schedules to accommodate coworkers, and showing genuine courtesy toward coworkers are some of the forms of:
	A. role perception.
	B. counterproductive behavior.
	C. task performance.
	D. organizational citizenship.
	E. job matching.

76.	. Lawrence stole a clock from his workplace. Which of the following refers to Lawrence's activity?	
	A. Productive behavior	
	B. Counterproductive behavior	
	C. Task performance	
	D. Organizational citizenship behavior	
	E. Job matching	
77.	Absenteeism is higher in organizations where there is(are):	
	A. weak absence norms.	
	B. low workplace incivility.	
	C. high amounts of presenteeism.	
	D. meager sick leave benefits.	
	E. high work-related stress.	
78.	Presenteeism is more common among employees with:	
	A. sick leave pay.	
	B. financial buffers.	
	C. low centrality.	
	D. high centrality.	
	E. high job security.	
79.	is the relatively stable pattern of behaviors and consistent internal states that explain a person's behavioral tendencies.	
	A. personality	
	B. values	
	C. motivation	
	D. locus of control	
	E. job satisfaction	

80.	An individual's personality:
	A. changes several times throughout the year.
	B. is formed only from childhood socialization and the environment.
	C. is less evident in situations where social norms, reward systems, and other conditions constrain behavior.
	D. does not provide an enduring pattern of processes.
	E. is more prominent when rewards for behavior are substantial.
81.	Personality develops and changes mainly when people are young; it stabilizes by about age
	A. 15
	B. 20
	C. 30
	D. 35
	E. 40
82.	The "Big Five" personality dimensions represent:
	A. all of the personality traits found in an ideal job applicant.
	B. the aggregated clusters representing most known personality traits.
	C. the personality traits caused by the environment rather than heredity.
	D. the necessary conditions for a person to have extraversion.
	E. the characteristics of employees with low levels of motivation.
83.	Which of the following acronyms identifies the "Big Five" personality dimensions?
	A. MBTIA
	B. CANOE
	C. VALUE
	D. MARSE
	E. SMART

84.	Being good-natured, empathetic, caring, and courteous are characteristics of people with personality trait.
	A. openness to experience
	B. agreeableness
	C. locus of control
	D. emotional stability
	E. extraversion
85.	Conscientiousness is a dimension of:
	A. the MARS model.
	B. Schwartz's values model.
	C. Myers-Briggs Type Indicator.
	D. Jungian personality theory.
	E. the Five-Factor model of personality.
86.	Which of the following explicitly identifies neuroticism?
	A. MARS model
	B. Schwartz's Values Circumflex model
	C. The Five-Factor model of personality
	D. Holland's theory of vocational choice
	E. Myers-Briggs Type Indicator

87.	Most employees in the social services section of a government department have frequent interaction with people who are unemployed or face personal problems. Which of the following personality characteristics is best suited to employees working in these jobs?
	A. High neuroticism
	B. External locus of control
	C. High introversion
	D. High agreeableness
	E. Low motivation
88.	Eric is the advertising head of a firm. He is extremely imaginative, creative, and curious. Which of
	the following personality dimensions does Eric possess?
	A. Customary thinking
	B. Openness to experience
	C. Resistance to change
	D. Neuroticism
	E. Cautiousness
89.	characterizes people with high levels of anxiety, hostility, depression, and self-consciousness.
	A. Extraversion
	B. Openness to experience
	C. Conscientiousness
	D. Neuroticism
	E. Agreeableness

90.	People with high agreeableness are more sensitive to others and experience more	and less
	·	
	A. dependability; conflict	
	B. empathy; dependability	
	C. empathy; conflict	
	D. upbeat attitudes; dependability	
	E. extroversion; conflict	
91.	Which "Big Five" personality dimension is most valuable for predicting job performance?	
	A. Extraversion	
	B. Openness to experience	
	C. Conscientiousness	
	D. Neuroticism	
	E. Agreeableness	
92.	characterizes people who are quiet, shy, and cautious.	
	A. Introversion	
	B. Openness to experience	
	C. Conscientiousness	
	D. Neuroticism	
	E. Agreeableness	

93.	3. Barney, a manager, is very conventional, resistant to change, habitual, and does not accept new ideas very easily. This implies that Barney has:	
	A. low neuroticism.	
	B. low customary thinking.	
	C. high extraversion.	
	D. high agreeableness.	
	E. low openness to experience.	
94.	Jung's psychological types are measured through the:	
	A. "Big Five" personality types.	
	B. locus of control scale.	
	C. instrument that also measures neuroticism.	
	D. Myers-Briggs Type Indicator.	
	E. self-monitoring personality test.	
95.	People with perceiving orientation are:	
	A. quiet.	
	B. curious.	
	C. caring.	
	D. realistic.	
	E. all of these.	

96. Which of the following statements about the Myers-Briggs Type Indicator (MBTI) is true? A. It advocates the view that thinking and feeling are not important in decision making. B. It is no longer used in organizations. C. Research has concluded that the MBTI does a poor job of measuring Jung's psychological types. D. Research suggests that the MBTI is more useful for career development and self-awareness than for selecting job applicants. E. The MBTI combines 16 pairs of traits into four distinct types. 97. Various studies have reported that specific Big Five dimensions predict: A. overall job performance. B. leadership. C. counterproductive work behaviors. D. organizational citizenship. E. all of these. 98. One worry about using most personality tests to select job applicants is that applicants might fake their answers because: A. people are naturally dishonest when seeking employment. B. they are self-reported scales. C. no one truly understands themselves. D. the scales are inaccurate. E. personality instruments are discriminatory.

99. Which of the following statements about values is true?		
A. They have fairly low conflict with each other.		
B. They describe what we naturally tend to do.		
C. They are not influenced much by socialization.		
D. They guide our decisions and actions.		
E. A person's hierarchy of values typically changes a few times each year.		
100. Beliefs about what is good or bad, right or wrong are referred to as:		
A. organizational citizenship.		
B. values.		
C. collectivism.		
D. moral intensity.		
E. extraversion.		
101. Schwartz's model organizes values into:		
A. six dimensions.		
B. a hierarchy.		
C. three statistical formulas.		
D. ten broader domains.		
E. a time line.		
102. Which of the following is a domain in Schwartz's model?		
A. Personality trait		
B. Emotion		
C. Conscientiousness		
D. Neuroticism		
E. Stimulation		

103.In Schwartz's Values Circumplex, the quadrant that includes hedonism, stimulation and self-direction is called:		
A. Openness to change		
B. Self-enhancement		
C. Conservation		
D. Self-transcendence		
E. Self-awareness		
104. Under Schwartz's Values Circumplex, hedonism is a part of two different quadrants, and		
A. Self-transcendence; Self-enhancement		
B. Self-transcendence; Conservation		
C. Self-enhancement; Conservation		
D. Openness to change; Conservation		
E. Openness to change; Self-enhancement		
105. Which of the following is ethics most closely related to?		
A. Values		
B. Locus of control		
C. Myers-Briggs type Indicator		
D. Personality		
E. Ability		

106. Which of the following represents values that determine whether actions are right or wrong and	
outcomes are good or bad?	
A. Conscientiousness	
B. Sensing	
C. Moral intensity	
D. Self-monitoring	
E. Ethics	
107. Which of the following is identified as an ethical principle?	
A. Utilitarianism	
B. Power distance	
C. Conservation	
D. Self-enhancement	
E. Power	
108. A problem with the utilitarian principle of ethical decision making is that:	
A. it focuses on the consequences of our actions, not on how we achieve those consequences.	
B. there is no agreement on what activities are of the greatest benefits to the affected.	
C. it is difficult to predict the "trickle down" benefits to those people who are least well off in society.	
D. it is almost impossible to evaluate the benefits or costs of many decisions.	
E. it chooses the option that provides the minimum acceptable degree of satisfaction to those affected.	

109	109. Which ethical principle reflects the idea that people have entitlements that let them act in a certain		
	way?		
	A. Utilitarianism		
	B. Individual rights		
	C. Moral intensity		
	D. Distributive justice		
	E. Care		
110.	One of the limitations of the individual rights principle is that:		
	A. it really is not an ethical principle at all.		
	B. some individual rights conflict with other individual rights.		
	C. it does not protect the right to physical security and freedom of speech of the employees.		
	D. it is almost impossible to evaluate the benefits or costs of decisions when many stakeholders are affected.		
	E. it can degenerate into unjust favoritism.		
111.	Senior executives at CyberForm must make a decision that will affect many people, and the decision may produce good or bad consequences for those affected. This decision:		
	A. has a high degree of ethical sensitivity.		
	B. is one in which decision makers should rely only on the utilitarianism rule of ethics.		
	C. has a low degree of ethical sensitivity.		
	D. has a high degree of moral intensity.		

E. should be taken with complete conscience.

112. The ability to recognize the presence and determine the relative importance of an ethical issue is		
known as:		
A. neuroticism.		
B. moral intensity.		
C. moral sensitivity.		
D. utilitarianism.		
E. uncertainty avoidance.		
113. People who have high moral sensitivity:		
A. tend to have more information about a specific situation.		
B. tend to have lower levels of empathy.		
C. are always more ethical than people with a moderate or low level of ethical sensitivity.		
D. are individualistic and achievement oriented.		
E. cannot estimate the moral intensity of an issue.		
E. carrier estimate the moral intensity of all issue.		
114. People who value their independence and personal uniqueness have:		
A. high individualism.		
B. high collectivism.		
C. high power distance.		
D. low uncertainty avoidance.		
E. low openness to experience.		
115 is the extent to which we value our duty to groups to which we belong and group harmony.		
A. Individualism		
B. Collectivism		
C. Power distance		
D. Uncertainty avoidance		
E. Achievement orientation		

116. Which of the following statements about cross-cultural values	s is true?
A. People with a high achievement-orientation emphasize relation others.	ationships and the well-being of
B. People with high individualism can have any level (high or l	low) of collectivism.
C. People with high power distance value independence and	personal uniqueness.
D. People with low uncertainty avoidance must also have high	n power distance.
E. People in almost all cultures have high uncertainty avoidan	ce.
117. People with high collectivism:	
A. accept unequal distribution of power.	
B. also have low individualism.	
C. value harmonious relationships in the groups to which they	/ belong.
D. value thrift, savings, and persistence.	
E. appreciate the unique qualities that distinguish themselves	from others.
118. Americans tend to have high:	
A. power distance.	
B. nurturing-orientation.	
C. long-term orientation.	
D. individualism.	
E. uncertainty avoidance.	
119. Which of the following countries generally has the strongest of	collectivist value orientation?
A. United States	
B. Japan	
C. Taiwan	
D. Egypt	
E. France	

120. Employees from cultures with a high power distance are more likely to:		
Α. ι	use their existing power to gain more power.	
В. е	encourage consensus-oriented decision making.	
C. á	avoid people in positions of power.	
D. 1	readily accept the high status of other people in the organization.	
Е. с	give their power to others as a sign of friendship.	
121	_ is the extent to which people either tolerate ambiguity or feel threatened by ambiguity.	
A. I	Individualism	
В. (	Collectivism	
C. I	Power distance	
D. I	Uncertainty avoidance	
E. <i>A</i>	Achievement orientation	
122. Etoni is a new employee who comes from a culture that values respect for people in higher		
pos	sitions and values the wellbeing of others more than goal achievement. Etoni's culture has:	
ΔΙ	high power distance and strong nurturing orientation.	
	nigh collectivism and a short-term orientation.	
	ow uncertainty avoidance and high individualism.	
	low power distance and strong nurturing orientation.	
	nigh power distance and weak nurturing orientation.	
123. Ped	ople with a high value assertiveness, competitiveness, and materialism.	
A. i	individualism	
В. с	collectivism	
C. <sub>I</sub>	power distance	
D. (	uncertainty avoidance	
E. a	achievement orientation	

## 124. Scenario: Kleen Waterproofing

Dave Docket, the installation manager at Kleen Waterproofing, has been receiving customer complaints that several crewmembers either come late to the job or they do not show up at all, without any communication with the customers. The job completion dates keep getting delayed and customer dissatisfaction keeps increasing. Dave has also just hired several new employees who are motivated, able to perform their jobs, and have adequate resources. However, they are not sure what tasks are included in their job. Dave is wondering how he can understand what is going on with his crew behavior and what can he do to improve the situation.

Dave organizes a training program for his employees to teach them how to operate the machines used for working. Which of the following attributes will show a direct improvement because of this training?

- A. Motivation
- B. Role perception
- C. Ethical sensitivity
- D. Moral intensity
- E. Ability

#### 125. Scenario: Kleen Waterproofing

Dave Docket, the installation manager at Kleen Waterproofing, has been receiving customer complaints that several crewmembers either come late to the job or they do not show up at all, without any communication with the customers. The job completion dates keep getting delayed and customer dissatisfaction keeps increasing. Dave has also just hired several new employees who are motivated, able to perform their jobs, and have adequate resources. However, they are not sure what tasks are included in their job. Dave is wondering how he can understand what is going on with his crew behavior and what can he do to improve the situation.

According to the MARS model, the new employees Dave has hired will likely:

- A. emphasize the utilitarianism principle in their decision making.
- B. have lower job performance due to poor role perceptions.
- C. have better job performance because they are motivated and able to perform the work.
- D. have above-average organizational citizenship.
- E. have a high degree of differentiation according to Holland's classification of occupations.

#### 126. Scenario: Electronika International

Electronika International is a fast growing small company specializing in consumer electronics. Managers at Electronika International are exploring the idea of using the "Big Five" personality dimensions in hiring and improving work-related behaviors and job performance.

Electronika managers want to hire people who are dependable, goal-focused, thorough, and disciplined. Which of the following "Big Five" personality dimensions is desirable for individuals to be hired?

- A. Openness to experience
- B. Agreeableness
- C. Conscientiousness
- D. Locus of control
- E. Extraversion

## 127. Scenario: Electronika International

Electronika International is a fast growing small company specializing in consumer electronics. Managers at Electronika International are exploring the idea of using the "Big Five" personality dimensions in hiring and improving work-related behaviors and job performance.

Electronika managers should be aware that being good-natured, empathetic, caring, and courteous are characteristics of people with:

- A. openness to experience.
- B. agreeableness.
- C. locus of control.
- D. emotional stability.
- E. extraversion.

128. Scenario: Electronika International Electronika International is a fast growing small company specializing in consumer electronics. Managers at Electronika International are exploring the idea of using the "Big Five" personality dimensions in hiring and improving work-related behaviors and job performance.  Electronika managers must pay attention to when hiring new employees because it characterizes people with high levels of anxiety, hostility, depression, and self-consciousness.
A. extraversion B. openness to experience C. conscientiousness D. neuroticism
E. locus of control
129. Scenario: Electronika International  Electronika International is a fast growing small company specializing in consumer electronics.  Managers at Electronika International are exploring the idea of using the "Big Five" personality dimensions in hiring and improving work-related behaviors and job performance.  When hiring new employees, e-commerce managers should look for people who have a high leve of, which is the most valuable "Big Five" personality dimension for predicting job performance.
A. extraversion B. openness to experience

C. conscientiousness

D. neuroticism

E. locus of control

## 130. Scenario: International Manufacturing & Trading

International Manufacturing & Trading (IMT) is a medium-sized U.S. company rapidly expanding in the Asian and Far East markets. The company has decided to open a manufacturing plant in Japan, Taiwan, and Malaysia. IMT will send key top managers from the U.S. office and will hire the lower-level managers and employees from the local markets. IMT managers realize that there will be some cultural differences but are unsure of what and how much.

IMT managers should make themselves aware that people in Japan tend to have:

- A. high individualism.
- B. high collectivism.
- C. medium power distance.
- D. low achievement orientation.
- E. medium uncertainty distance.

# 131. Scenario: International Manufacturing & Trading

International Manufacturing & Trading (IMT) is a medium-sized U.S. company rapidly expanding in the Asian and Far East markets. The company has decided to open a manufacturing plant in Japan, Taiwan, and Malaysia. IMT will send key top managers from the U.S. office and will hire the lower-level managers and employees from the local markets. IMT managers realize that there will be some cultural differences but are unsure of what and how much.

IMT managers should know that employees from cultures with a high power distance are more likely to:

- A. use their power to obtain undue favors.
- B. encourage consensus-oriented decision making.
- C. avoid people in positions of power.
- D. readily accept the high status of other people in the organization.
- E. give their power to others as a sign of friendship.

132. Scenario: International Manufacturing & Trading

International Manufacturing & Trading (IMT) is a medium-sized U.S. company rapidly expanding in the Asian and Far East markets. The company has decided to open a manufacturing plant in Japan, Taiwan, and Malaysia. IMT will send key top managers from the U.S. office and will hire the lower-level managers and employees from the local markets. IMT managers realize that there will be some cultural differences but are unsure of what and how much.

U.S. managers tend to be:

- A. more individualistic.
- B. high in nurturing.
- C. more collectivist.
- D. low in achievement orientation.
- E. high in uncertainty avoidance.

# **Essay Questions**

133. The sales office of a large industrial products wholesale company has an increasing problem that salespeople are arriving late at the office each morning. Some sales reps go directly to visit clients rather than showing up at the office as required by company policy. Others arrive several minutes after their appointed start time. The vice president of sales does not want to introduce time clocks, but this may be necessary if the lateness problem is not corrected. Using the MARS model of individual behavior, diagnose the possible reasons why salespeople may be engaging in this "lateness" behavior.

134	1. Store #34 of CDA Hardware Associates has had below average sales over the past few years. As
	head of franchise operations, you are concerned with the continued low sales volume. The store
	manager wants you to diagnose the problem and recommend possible causes. Use the MARS
	model of individual behavior and performance to provide four different types of reasons why
	employees at Store #34 might be performing below average. Provide one example for each type
	of explanation.

135. Employees in a company's warehouse are making several errors in inventory control and breaking items shipped. An analysis of the situation reveals that individual competencies are poorly matched with the job requirements. Describe three different strategies that would potentially improve this kind of person-job matching.

136. Identify and define the five types of individual behavior in the workplace.
137. An ongoing debate in organizational behavior is whether we should consider the personality traits of job applicants when selecting them into the organization. Take the view that personality traits should be considered in the selection process and provide arguments for your position.
138. Describe (and/or draw) and explain Schwartz's Values Circumplex model.

139. The textbook states, "there is often a 'disconnect' between personal values and individual behavior. What does this mean? What influences this disconnect?
140. Explain the three distinct types of ethical principles.
141. Several international sales representatives in your organization have faced the murky question of paying foreign government officials under the table in order to do business in other countries.  Describe three strategies that the organization should consider to resolve these and other ethical dilemmas for foreign sales representatives.

142. What have we learned from research about differences in values across cultures? What warning flags do we need to pay attention to?

Chapter 02 Individual Behavior, Personality, and Values Answer Key

True / False Questions

1. According to the MARS model of individual behavior and performance, employee performance

will remain high even if one of the four factors is low in a given situation.

<u>FALSE</u>

All four factors in the MARS model are critical influences on an individual's voluntary behavior

and performance; if any one of them is low in a given situation, the employee would perform

the task poorly.

Learning Objective: 02-01 Describe the four factors that directly influence individual behavior and performance.

Level of Difficulty: 2 Medium

Topic: Ability

- 70. Travel Happy Corporation gives simple accounts to newly hired employees, and then adds more challenging accounts as employees master the simple tasks. This practice mainly:
  - A. improves role perceptions.
  - **<u>B.</u>** increases person-job matching.
  - C. reduces employee motivation.
  - D. provides more resources to accomplish the assigned task.
  - E. improves employee aptitudes.

A good person-job match produces higher performance; it also tends to increase the employee's well-being. One of the person-job matching strategies is to redesign the job so that employees are given only tasks that reflect their current learned capabilities. A complex task might be simplified—with some aspects of the work transferred to others—so that a new employee performs only those tasks that he/she is currently able to perform. As the employee becomes more competent at these tasks, other tasks are added back into the job.

AACSB: Analytic Accessibility: Keyboard Navigation Blooms: Apply Learning Objective: 02-01 Describe the four factors that directly influence individual behavior and performance. Level of Difficulty: 2 Medium Topic: Ability

- 71. You have just hired several new employees who are motivated, able to perform their jobs, and have adequate resources. However, they are not sure what tasks are included in their job.

  According to the MARS model, these new employees will likely:
  - A. emphasize the utilitarianism principle in their decision making.
  - **B.** have lower job performance due to poor role perceptions.
  - C. have high job performance because they are motivated and able to perform the work.
  - D. have above-average organizational citizenship.
  - E. have a high degree of differentiation according to Holland's classification of occupations.

Role perceptions are the extent to which a person accurately understands the job duties (roles) assigned to or are expected of him/her.

- 77. Absenteeism is higher in organizations where there is(are):
  - A. weak absence norms.
  - B. low workplace incivility.
  - C. high amounts of presenteeism.
  - D. meager sick leave benefits.
  - E. high work-related stress.

Employees who experience job dissatisfaction, workplace incivility, or work-related stress are more likely to be absent or late for work because taking time off is a way of temporarily withdrawing from those difficult conditions. Absenteeism is also higher in organizations with generous sick leave because this benefit minimizes the financial loss of taking time away from work. Another factor in absenteeism is the person's values and personality. Finally, studies report that absenteeism is higher in teams with strong absence norms, meaning that team members tolerate and even expect coworkers to take time off.

**Essay Questions** 

133. The sales office of a large industrial products wholesale company has an increasing problem that salespeople are arriving late at the office each morning. Some sales reps go directly to visit clients rather than showing up at the office as required by company policy. Others arrive several minutes after their appointed start time. The vice president of sales does not want to introduce time clocks, but this may be necessary if the lateness problem is not corrected. Using the MARS model of individual behavior, diagnose the possible reasons why salespeople may be engaging in this "lateness" behavior.

The MARS model suggests that individual behavior and performance are a function of ability, motivation, role perceptions, and situational factors. With respect to lateness, all four of these factors may be relevant. Salespeople may be late for work because of incorrect role perceptions. Specifically, they might not know that they must show up at the office before visiting clients. Others may be late in the morning because they incorrectly believe they can do so after working late the previous day.

Lateness may also occur because sales reps are not motivated to attend work. Perhaps there are stressful conditions at work or the jobs are not interesting to the people in those jobs. Similarly, there might be a "lateness culture" in which other employees support those who show up late. A third factor may be situational factors. In the short term, some employees might be late due to road construction, conflicts with family responsibilities, distance of the location, and so forth. This is usually a short-run explanation, however, because employees should be able to adjust their schedule in the longer term. Ability is the least likely explanation for lateness. It would occur if an employee lacked the capacity to show up for work on time. Student answers will vary due to the nature of this question. The students should also discuss the possible solutions to these problems.

AACSB: Analytic Blooms: Apply Learning Objective: 02-01 Describe the four factors that directly influence individual behavior and performance. Level of Difficulty: 2 Medium Topic: MARS Model of Individual Behavior and Performance 134. Store #34 of CDA Hardware Associates has had below average sales over the past few years. As head of franchise operations, you are concerned with the continued low sales volume. The store manager wants you to diagnose the problem and recommend possible causes. Use the MARS model of individual behavior and performance to provide four different types of reasons why employees at Store #34 might be performing below average. Provide one example for each type of explanation.

Students should answer this question by describing the four causes of individual behavior and applying these causes to the situation.

Ability: It is possible that employees at Store #34 lack the necessary skills or knowledge to complete sales transactions effectively. For example, the store might have high turnover, so most employees lack the necessary experience. Alternatively, the store manager might have hired people who lack the necessary skills and knowledge.

Motivation: Store #34 employees might not be as motivated to serve customers and sell the product. For example, the store might have a different reward system, one that is not very effective at encouraging store sales. Alternatively, employees at this store might have different needs and therefore are not as motivated by the company's compensation system.

Role perceptions: Store #34 employees might have role perceptions that result in lower sales. For example, they might not realize that certain procedures or sales practices are less effective than those used at other stores. Alternatively, employees might not realize that their level of sales is below an acceptable level.

Situational factors: Employees at Store #34 might have lower performance due to unfavorable situational factors. For example, Store #34 might be located in an area with an economic recession. Alternatively, the store might have had difficulty receiving inventory from the company's warehouse, resulting in lack of sales.

Student answers will vary due to the nature of this question.

135. Employees in a company's warehouse are making several errors in inventory control and breaking items shipped. An analysis of the situation reveals that individual competencies are poorly matched with the job requirements. Describe three different strategies that would potentially improve this kind of person-job matching.

The three different strategies that would potentially improve this kind of person-job matching are:

Select qualified applicants: This involves measuring competencies of job applicants and selecting those whose competencies most closely align with the job requirements.

Provide training: Employees who lack certain skills and knowledge should receive training in those areas.

Redesign the job: This involves reassigning specific tasks to employees based on their current knowledge and skills. For example, if an employee is good at stocking inventory but lacks skills and knowledge to use the inventory control system, then this person might be assigned only the task of stocking inventory.

136. Identify and define the five types of individual behavior in the workplace.

The five types are: task performance, organizational citizenship, counter-productive behavior, joining/staying with the organization, and maintaining attendance.

- Task performance refers to goal-directed behaviors under the individual's control that support organizational objectives. It consists of proficiency, adaptability, and proactivity.
- Organizational citizenship includes various forms of cooperation and helpfulness to others that support the organization's social and psychological context.
- Counterproductive work behaviors are voluntary behaviors that have the potential to directly or indirectly harm the organization.
- Joining and staying with the organization reflects the organization's ability to hire and retain talent.
- Maintaining work attendance consists of absenteeism (missing work), tardiness (being late for work), and presenteeism (attending scheduled work when one's capacity to perform is significantly diminished by illness or other factors).

AACSB: Analytic Blooms: Understana Learning Objective: 02-02 Summarize the five types of individual behavior in organizations. Level of Difficulty: 2 Medium Topic: Types of Individual Behavior 137. An ongoing debate in organizational behavior is whether we should consider the personality traits of job applicants when selecting them into the organization. Take the view that personality traits should be considered in the selection process and provide arguments for your position.

Students should be evaluated in this question not only on factual knowledge from the text, but also their logic and persuasive argument skills. Factually, the text presents two arguments in favor of using personality testing in selection. First, some personality dimensions, particularly conscientiousness and internal locus of control, predict job performance in almost every job group. This suggests that if we can accurately measure people who have this trait, we can better determine whether they will perform their job well. Second, personality traits affect the types of jobs in which people are interested. In fact, vocational counselors use personality testing to determine vocational interests. Placing people in jobs that match their personalities would potentially reduce employee turnover and perhaps absenteeism. If employees are happier in their jobs as a result of better vocational fit, then the improved job satisfaction might also result in better performance and organizational citizenship behaviors.

Student answers will vary though they should address these points in their answer.

138. Describe (and/or draw) and explain Schwartz's Values Circumplex model.

This model clusters 57 specific values into 10 broad values categories: universalism, benevolence, tradition, conformity, security, power, achievement, hedonism, stimulation, and self-direction. These 10 categories are further clustered into four quadrants. The first, openness to change, refers to the extent to which a person is motivated to pursue innovative ways. This quadrant includes the value categories of self-direction and hedonism. The opposing quadrant is conservation, which is the extent to which a person is motivated to preserve the status quo. The third quadrant is self-enhancement, which refers to how much a person is motivated by self-interest. The last quadrant, which is the opposite of self-enhancement, is self-transcendence, which refers to the motivation to promote the welfare of others and nature. The model is shown in Exhibit 2.5.

Topic: Types of Values

139. The textbook states, "...there is often a 'disconnect' between personal values and individual behavior. What does this mean? What influences this disconnect?

This means that people may think that they act consistently with their hierarchy of values, but they don't always do so. One influence on the values-behavior link is the situation. Work environments influence our behavior, at least in the short term, so they necessarily encourage or discourage values-consistent behavior. This sometimes occurs without our awareness, but more often we blame the situation for preventing us from applying our values. Another factor is that we are more likely to apply values when we actively think about them and understand their relevance to the situation. Some situations easily trigger awareness of our values. However, values are abstract concepts, so their relevance to specific situations is not obvious much of the time. We literally need to be reminded of our dominant personal values in these situations to ensure that we apply those values.

AACSB: Analytic Blooms: Understand

Learning Objective: 02-04 Summarize Schwartz's model of individual values and discuss the conditions in which values influence

behavior.

Level of Difficulty: 3 Haro

Topic: Values and Individual Behavior

140. Explain the three distinct types of ethical principles.

The three distinct types of ethical principles are: utilitarianism, individual rights, and distributive justice.

Utilitarianism: This principle advises us to seek the greatest good for the greatest number of people. In other words, we should choose the option that provides the highest degree of satisfaction to those affected. This is sometimes known as a consequential principle, because it focuses on the consequences of our actions, not on how we achieve those consequences. One problem with utilitarianism is that it is almost impossible to evaluate the benefits or costs of many decisions, particularly when many stakeholders have wide-ranging needs and values. Individual rights: This principle reflects the belief that everyone has entitlements that let him/her act in a certain way. Some of the most widely cited rights are freedom of movement, physical security, freedom of speech, fair trial, and freedom from torture. The individual rights principle includes more than legal rights; it also includes human rights that everyone is granted as a moral norm of society.

Distributive justice: This principle suggests that people who are similar to one another should receive similar benefits and burdens; those who are dissimilar should receive different benefits and burdens in proportion to their dissimilarity. A variation of the distributive justice principle says that inequalities are acceptable when they benefit the least well off in society. Thus, employees in risky jobs should be paid more if their work benefits others who are less well off. One problem with the distributive justice principle is that it is difficult to agree on who is "similar" and what factors are "relevant."

Learning Objective: 02-05 Describe three ethical principles and discuss three factors that influence ethical behavior.

Level of Difficulty: 2 Medium

Topic: Three Ethical Principles

141. Several international sales representatives in your organization have faced the murky question of paying foreign government officials under the table in order to do business in other countries. Describe three strategies that the organization should consider to resolve these and other ethical dilemmas for foreign sales representatives.

First, the company should develop and make its salespeople aware of a written ethical code of conduct. This code may help employees resolve some of the decision-making dilemmas they face. Second, the value of the ethics code would increase if sales representatives received training on ethical conduct. These seminars help employees work through ethical dilemmas by applying the corporate code of ethical conduct. The long-term objective is to help participants internalize these standards so that ethical considerations are addressed almost intuitively. Third, the organization should develop an ethics committee consisting of senior management, sales representatives and/or board of directors to discuss and resolve ethical dilemmas that are presented to them as well as dilemmas that foreign salespeople might face in the future. The conclusions of this committee should be communicated clearly to all employees. Finally, the foreign sales representatives' ethical behavior should be linked to the reward system. This might be a difficult task, but the perceived link would maintain consistency with the company's interest in ethical decision making.

Topic: Supporting Ethical Behavior

142. What have we learned from research about differences in values across cultures? What warning flags do we need to pay attention to?

While our knowledge of cross-cultural dynamics has blossomed due to research in the past two decades, there are three issues we need to be aware of. One is that many research studies have relied on small, convenient samples, and these studies may draw conclusions that might not generalize to the cultures they represent. Second is that cross-cultural studies often assume that each country has one culture, while in reality many countries are culturally diverse. A third concern is that cross-cultural research and writing continues to rely on a major study conducted almost 40 years ago, the findings of which may have become out of date as values in some cultures have shifted over the years.

AACSB: Analytic Blooms: Understana Learning Objective: 02-06 Describe five values commonly studied across cultures. Level of Difficulty: 3 Haro Topic: Caveats about Cross-Cultural Knowledge
