

Chapter 02 Organization Strategy and Project Selection **Answer Key**

Multiple Choice Questions

1. Which of the following is NOT true about an organization's strategy?

- A. Strategy determines how an organization will compete.
- B. Strategy is implemented through projects.
- C.** Only top management must understand strategy.
- D. Project selection should be clearly aligned with strategy.
- E. Project management plays a key role in supporting strategy.

Strategy was considered to be under the purview of senior management, but this is old school thinking. Projects and project management play a key role in supporting strategic goals. It is vital for project managers to think and act strategically.

*Learning Objective: 02-02 Identify the significant role projects contribute to the strategic direction of the organization.
Topic: The Strategic Management Process: An Overview*

2. A project selection process that is strongly linked to strategy results in

- A. The most profit.
- B.** Better utilization of the organization's resources.
- C. More projects.
- D. A larger and more diverse organization.
- E. Stronger core competencies.

Without integration of projects with the strategic plan, resources are poorly utilized. Conversely, organizations that have a link of projects to strategy have more cooperation across the organization, perform better on projects and tend to have fewer projects.

3. Which of the following is NOT true about organizational politics?

- A. Project managers should not engage in organizational politics.
- B. Politics can have a significant influence on which projects receive funding.
- C. Politics exist in every organization.
- D. Politics can influence project selection.
- E. Politics can play a role in the aspirations behind projects.

Many would argue that project management and politics should not mix. A more proactive response would be that projects and politics invariably mix. Effective project managers recognize that any significant project has political ramifications.

5. Why do project managers need to understand their organization's mission and strategy?
- A. To reduce project duration and increase the number of projects implemented
 - B.** So they can make appropriate decisions and adjustments and be effective project advocates
 - C. It is only important for senior management to understand the organization's mission and strategy.
 - D. To get their job done and increase opportunities for promotion
 - E. So that they can make sure the customer is satisfied

There are two main reasons why project managers need to understand their organization's mission and strategy. The first reason is so they can make appropriate decisions and adjustments. For example, how a project manager would respond to a suggestion to modify the design of a product to enhance performance will vary depending upon whether his company strives to be a product leader through innovation or to achieve operational excellence through low cost solutions. The second reason project managers need to understand their organization's strategy is so that they can be effective project advocates. Project managers have to be able to demonstrate to senior management how their project contributes to their firm's mission.

6. Project managers who understand the role that their project plays in accomplishing the organization's strategy will be inclined to do all of the following EXCEPT
- A. Demonstrate to senior management how their project contributes to the firm's mission.
 - B. Explain to team members why certain project objectives and priorities are critical.
 - C. Explain to stakeholders why certain project objectives and priorities are critical.
 - D. Be able to respond appropriately to delays and/or questions about product design.
 - E.** Be able to focus on problems or solutions if the project is a low priority strategically.

Project managers who understand the role that their project plays in accomplishing the organization's strategy will not be inclined to waste time focusing on problems that are a low priority in regard to achieving the organization's strategy.

7. All of the following are symptoms of organizations struggling with strategy disconnect and unclear priorities EXCEPT

- A. Frequent conflicts between managers.
- B. Inadequate resources.
- C. Confused employees regarding which projects are more important.
- D.** Not enough projects within the portfolio to make a profit.
- E. People are working on multiple projects and feel inefficient.

Frequent conflicts between managers, inadequate resources, confused employees and multitasking are all symptoms of organizations struggling with strategy disconnect and unclear priorities. Typically these organizations are also completing projects with low priority which results in a portfolio that consists of too many projects that do not align with organizational strategy.

8. Which of the following problems refers to lack of understanding and consensus of organization strategy among top and middle-level managers? This also can result when top management formulates strategy and leaves implementation to functional managers.

- A. Multitasking
- B. Organization politics
- C.** Implementation gap
- D. Resource conflicts
- E. Employee turnover

The implementation gap refers to the lack of understanding and consensus of organization strategy among top and middle-level management.

9. Which of the following is NOT true for strategic management?

- A. It should be done once every few years just before developing the operating plan.
- B. It supports consistency of action at every level of the organization.
- C. It develops an integrated and coordinated long-term plan of action.
- D. It positions the firm to meet the needs of its customers.
- E. It involves responding to changes in the external market and allocating scarce resources to improve a competitive position.

Two major dimensions of strategic management are responding to changes in the external environment and allocating scarce resources of the firm to improve its competitive position. Constant scanning of the external environment for changes is a major requirement for survival in a dynamic competitive environment.

10. Which of the following is the correct order for the strategic management process?

- A. Strategies, mission, objectives, projects
- B. Objectives, projects, mission, strategies
- C. Mission, strategies, objectives, projects
- D. Objectives, mission, strategies, projects
- E. Projects, mission, strategies, objectives

Once the mission statement has been written, strategies are formulated. After this, objectives are developed to achieve the strategy and finally strategies are implemented through projects.

11. Which of the following questions does the organization's mission statement answer?

- A. What are our long-term strategies?
- B. What are our long-term goals and objectives?
- C. How do we operate in the existing environment?
- D. What do we want to become?
- E. All of these are answered by the mission statement.

The mission identifies 'what we want to become,' or the *raison d'être*. Mission statements identify the scope of the organization in terms of its product or service. They communicate and identify the purpose of the organization to stakeholders.

17. Which of the following would be classified as an organizational opportunity?

- A. Low debt
- B. Excellent employees
- C. Increasing product demand**
- D. Talented management
- E. Government regulation

Typical opportunities are increasing demand, emerging markets, and demographics. Managers or individual firms have limited opportunities to influence such external environmental factors; however, in recent years notable exceptions have been new technologies such as Apple using the iPod to create a market to sell music.

18. Which of the following is **NOT** one of the requirements for successful implementation of strategies through projects?

- A. Allocation of resources
- B. Prioritizing of projects
- C. Motivation of project contributors
- D. Adequate planning and control systems
- E. Quality management**

First, completing tasks requires allocation of resources. Resources typically represent funds, people, management talents, technological skills, and equipment. Frequently, implementation of projects is treated as an 'addendum' rather than an integral part of the strategic management process. However, multiple objectives place conflicting demands on organizational resources. Second, implementation requires a formal and informal organization that complements and supports strategy and projects. Authority, responsibility, and performance all depend on organization structure and culture. Third, planning and control systems must be in place to be certain project activities necessary to ensure strategies are effectively performed. Fourth, motivating project contributors will be a major factor for achieving project success. Finally, areas receiving more attention in recent years are portfolio management and prioritizing projects.

20. Susie's department is implementing many projects. She finds herself starting and stopping work on one task to go and work on another task, and then return to the work on the original task. Susie is experiencing

- A. Poor scheduling.
- B. Excess work burden.
- C. Flexible tasking.
- D. Multitasking.**
- E. Burnout.

Resource sharing also leads to multitasking. Multitasking involves starting and stopping work on one task to go and work on another project, and then returning to the work on the original task. People working on several tasks concurrently are far less efficient, especially where conceptual or physical shutdown and startup are significant.

28. Which of the following is true of multiweighted scoring models?

- A. Will include quantitative criteria
- B. Will include qualitative criteria
- C. Each criterion is assigned a weight.
- D. Projects with higher scores are considered more desirable.
- E.** All of these are true.

A weighted scoring model typically uses several weighted selection criteria to evaluate project proposals. Weighted scoring models will generally include qualitative and/or quantitative criteria. Each selection criterion is assigned a weight. Scores are assigned to each criterion for the project, based on its importance to the project being evaluated. The weights and scores are multiplied to get a total weighted score for the project. Using these multiple screening criteria, projects can then be compared using the weighted score. Projects with higher weighted scores are considered better.

Topic: The Strategic Management Process: An Overview*

51. A project that a powerful, high-ranking official is advocating is often termed a(n) _____.

sacred cow

Project selection may be based not so much on facts and sound reasoning, but rather on the persuasiveness and power of people advocating projects. The term "sacred cow" is often used to denote a project that a powerful, high-ranking official is advocating.

Topic: The Strategic Management Process: An Overview

92. What is a SWOT analysis and how does it relate to the Strategic Management Process?

It is an assessment of the internal and external environments and is the link between reviewing the current mission statement and the development of goals and objectives that support organization strategy.

AACSB: Analytical Thinking

Blooms: Understand

Difficulty: 3 Hard

Learning Objective: 02-02 Identify the significant role projects contribute to the strategic direction of the organization.

Topic: The Strategic Management Process: An Overview

93. What is the implementation gap and how does it impact project management? How can it be prevented?

The implementation gap refers to the lack of understanding and consensus of organization strategy among top and middle-level managers. If managers lack a common understanding of the priority for a given set of projects, then the achievement of long-range goals will be impossible. A project portfolio system can go a long way to reduce or even eliminate this problem.
