

## CHAPTER 2—RETAIL STRATEGIC PLANNING AND OPERATIONS MANAGEMENT

---

### MULTIPLE CHOICE

1. \_\_\_\_\_ is the anticipation and organization of what needs to be done to reach an objective.
- Analyzing
  - Forecasting
  - Planning
  - Strategic realignment
  - Tactical adaptation

ANS: C                      PTS: 1                      REF: p. 50                      OBJ: LO 2-1  
STA: MBA: Strategic & systems skills                      LOC: MBA: Strategic & systems skills  
KEY: Bloom's: Knowledge

2. Strategic planning:
- requires a short-term commitment of resources by the retailer.
  - is concerned with maximizing the efficiency of the retailer's use of resources and with how the retailer converts these resources into sales and profits.
  - involves managing the buying and handling of merchandise, pricing, advertising and promotion, customer services and selling, and facilities.
  - is concerned with how the retailer responds to the environment in an effort to establish a short-term course of action.
  - involves adapting the resources of the firm to the opportunities and threats of an ever-changing retail environment.

ANS: E                      PTS: 1                      REF: p. 51                      OBJ: LO 2-1  
STA: MBA: Strategic & systems skills                      LOC: MBA: Strategic & systems skills  
KEY: Bloom's: Knowledge

3. Which of the following is not a step in the strategic planning process:
- develop action plans.
  - perform a SWOT analysis.
  - define specific goals and objectives.
  - a well defined mission statement.
  - strategy development

ANS: A                      PTS: 1                      REF: p. 52                      OBJ: LO 2-1  
STA: MBA: Strategic & systems skills                      LOC: MBA: Strategic & systems skills  
KEY: Bloom's: Comprehension

4. The beginning of a retailer's strategic planning process is the formulation of the retailer's:
- goals and objectives.
  - opportunity analysis audit.
  - alpha statement.
  - mission statement.
  - strategy statement.

ANS: D                      PTS: 1                      REF: p. 52                      OBJ: LO 2-1  
STA: MBA: Strategic & systems skills                      LOC: MBA: Strategic & systems skills  
KEY: Bloom's: Knowledge

5. For a mission statement to be effective, it should:

- a. be less than 10 words; after all, the more concise the mission statement, the more focused the company.
- b. provide a basic description of the fundamental nature, rationale, and direction of the firm.
- c. be changed annually to reflect changes in the environment.
- d. follow the strategy laid out annually by senior management.
- e. be developed only after the retailer sets its goals and objectives.

ANS: B                      PTS: 1                      REF: p. 52                      OBJ: LO 2-1  
 STA: MBA: Strategic & systems skills      LOC: MBA: Strategic & systems skills  
 KEY: Bloom's: Application

6. Consider this mission statement: "Dad's Tasty Dogs will utilize the friendly, proven expertise of its employees and the finest ingredients to provide customers with great tasting hot dogs at a fair price." What element of a good mission statement is missing?
  - a. How the retailer uses or intends to use its resources
  - b. A market share goal
  - c. How it expects to relate to the ever-changing environment
  - d. The kinds of value it intends to provide in order to serve the needs and wants of the customer
  - e. A SWOT analysis

ANS: C                      PTS: 1                      REF: p. 52                      OBJ: LO 2-1  
 STA: MBA: Strategic & systems skills      LOC: MBA: Strategic & systems skills  
 KEY: Bloom's: Application

7. Which of the following is NOT an aspect of a good mission statement?
  - a. Broad and general in nature
  - b. Provide direction
  - c. Motivational
  - d. Changes with every new fad
  - e. It is a plan of action for the firm to follow

ANS: D                      PTS: 1                      REF: p. 53                      OBJ: LO 2-1  
 STA: MBA: Strategic & systems skills      LOC: MBA: Strategic & systems skills  
 KEY: Bloom's: Application

8. When a retailer sets goals and objectives based on a comparison of its actions against its competitors, it is establishing:
  - a. financial performance objectives.
  - b. market performance objectives.
  - c. personal objectives.
  - d. competitive pricing objectives.
  - e. societal objectives.

ANS: B                      PTS: 1                      REF: p. 53                      OBJ: LO 2-1  
 STA: MBA: Strategic & systems skills      LOC: MBA: Strategic & systems skills  
 KEY: Bloom's: Knowledge

9. A retail firm that is setting goals based on the analysis of its ability to provide a profit level adequate to continue in business is setting \_\_\_\_\_ objectives.
  - a. liquidity
  - b. financial performance
  - c. profit performance
  - d. market performance
  - e. operating performance

ANS: B                    PTS: 1                    REF: p. 53                    OBJ: LO 2-1  
STA: MBA: Strategic & systems skills                    LOC: MBA: Strategic & systems skills  
KEY: Bloom's: Knowledge

10. The four basic types of objectives that a retailer can formulate are:
- financial, gross margin return on sales, return on assets, and return on net worth.
  - equity, benefactor, consumer choice, and employment.
  - sales volume, market share, productivity, and profitability.
  - societal, market performance, personal, and financial performance.
  - marketing performance, profitability, productivity, and societal.

ANS: D                    PTS: 1                    REF: p. 53                    OBJ: LO 2-1  
STA: MBA: Strategic & systems skills                    LOC: MBA: Strategic & systems skills  
KEY: Bloom's: Knowledge

11. Financial performance goals and objectives does which of the following:
- Helps the firm's employees to fulfill some of their own personal needs.
  - Compares a firm's actions to its competition.
  - Helps society to fulfill some of its needs.
  - Analyzes the firm's ability to provide a profit level adequate to continue and grow in business.
  - Helps stabilize the global financial market.

ANS: D                    PTS: 1                    REF: p. 53                    OBJ: LO 2-1  
STA: MBA: Strategic & systems skills                    LOC: MBA: Strategic & systems skills  
KEY: Bloom's: Comprehension

12. Sales volume and market share are the most popular measures of:
- financial productivity.
  - market performance.
  - merchandise productivity.
  - consumer choice.
  - human resource allocation.

ANS: B                    PTS: 1                    REF: p. 53-554                    OBJ: LO 2-1  
STA: MBA: Strategic & systems skills                    LOC: MBA: Strategic & systems skills  
KEY: Bloom's: Application

13. Which of the following would be an example of a market performance objective for Record World?
- Open or acquire five to ten stores over the next year.
  - Increase this year's net profit margin by 3 percent over last year.
  - Improve public relations with customers by holding two major in-store events per six-month season.
  - Increase labor productivity by 12 percent over the next six months.
  - Increase return on assets from 12 percent to 15 percent over the next 12 months.

ANS: A                    PTS: 1                    REF: p. 54                    OBJ: LO 2-1  
STA: MBA: Strategic & systems skills                    LOC: MBA: Strategic & systems skills  
KEY: Bloom's: Analysis

14. If a retailer has set its primary objective as gaining 5 percent of market share, it is focusing on a \_\_\_\_\_ objective.
- productivity performance
  - consumer choice

- c. merchandise productivity
- d. market performance
- e. competition-oriented

ANS: D                    PTS: 1                    REF: p. 53-54                    OBJ: LO 2-1  
STA: MBA: Strategic & systems skills                    LOC: MBA: Strategic & systems skills  
KEY: Bloom's: Application

15. Financial performance objectives can be broken into two categories:
- a. marketing objectives and operating objectives.
  - b. profitability objectives and productivity objectives.
  - c. administrative objectives and financial strategy objectives.
  - d. human performance objectives and information objectives.
  - e. seasonal objectives and general operating objectives.

ANS: B                    PTS: 1                    REF: p. 55                    OBJ: LO 2-1  
STA: MBA: Strategic & systems skills                    LOC: MBA: Strategic & systems skills  
KEY: Bloom's: Knowledge

16. Which of the following elements is NOT a part of the strategic profit model (SPM)?
- a. Net profit margin
  - b. Stockouts
  - c. Asset turnover
  - d. Financial leverage
  - e. Return on assets

ANS: B                    PTS: 1                    REF: p. 55                    OBJ: LO 2-1  
STA: MBA: Strategic & systems skills                    LOC: MBA: Strategic & systems skills  
KEY: Bloom's: Comprehension

17. The Card Shoppe had a gross margin last year of \$2,000,000 and a net profit of \$300,000, while net sales were \$2,500,000. What was The Card Shoppe's net profit margin for last year?
- a. 12.0 percent
  - b. 15.0 percent
  - c. 20.0 percent
  - d. 68.0 percent
  - e. 80.0 percent

ANS: A                    PTS: 1                    REF: p. 55                    OBJ: LO 2-1  
STA: MBA: Strategic & systems skills                    LOC: MBA: Strategic & systems skills  
KEY: Bloom's: Application

18. If a retailer has a return on assets of 15 percent and a net profit margin of 3 percent, then its rate of asset turnover is:
- a. .20 times.
  - b. 5.0 times.
  - c. 15.0 times.
  - d. 30.0 times.
  - e. 60.0 times.

ANS: B                    PTS: 1                    REF: p. 55                    OBJ: LO 2-1  
STA: MBA: Strategic & systems skills                    LOC: MBA: Strategic & systems skills  
KEY: Bloom's: Application

19. Cameron Brody wants 15 percent of an average dollar invested in the assets of his bookstore to be returned in profit. Cameron is setting a(n) \_\_\_\_\_ financial objective.
- gross margin return on sales
  - return on inventory
  - return on net worth
  - operating profit margin
  - return on assets

ANS: E                      PTS: 1                      REF: p. 56                      OBJ: LO 2-1  
STA: MBA: Strategic & systems skills      LOC: MBA: Strategic & systems skills  
KEY: Bloom's: Application

20. If net profit margin is 2.0 percent, the rate of asset turnover is 6.0x, and the financial leverage is 2.1, what is the return on assets?
- 0.333 percent
  - 8.0 percent
  - 12.0 percent
  - 25.2 percent
  - 33.0 percent

ANS: C                      PTS: 1                      REF: p. 56                      OBJ: LO 2-1  
STA: MBA: Strategic & systems skills      LOC: MBA: Strategic & systems skills  
KEY: Bloom's: Application

21. Which of the following is NOT an example of a financial performance goal?
- Increase return on assets from 8 percent to 9 percent.
  - Increase asset turnover from 2.5 to 2.8.
  - Increase market share by 20 percent.
  - Increase space productivity by 5 percent.
  - Reduce financial leverage from 2.1 to 2.0.

ANS: C                      PTS: 1                      REF: p. 55-57                      OBJ: LO 2-1  
STA: MBA: Strategic & systems skills      LOC: MBA: Strategic & systems skills  
KEY: Bloom's: Comprehension

22. A retailer has a net profit of \$1,000,000, total assets of \$12,000,000, a 2.5 asset turnover ratio, and a net worth of \$5,000,000. What is its financial leverage ratio?
- .083 times
  - .500 times
  - 2.00 times
  - 2.40 times
  - 4.80 times

ANS: D                      PTS: 1                      REF: p. 56                      OBJ: LO 2-1  
STA: MBA: Strategic & systems skills      LOC: MBA: Strategic & systems skills  
KEY: Bloom's: Application

23. A retailer has total assets of \$6,000,000 and a net worth of \$3,000,000. What is the retailer's financial leverage ratio?
- .5 times
  - 2.0 times
  - 50 percent
  - 75 percent
  - 100 percent

ANS: B                      PTS: 1                      REF: p. 56                      OBJ: LO 2-1  
STA: MBA: Strategic & systems skills                      LOC: MBA: Strategic & systems skills  
KEY: Bloom's: Application

24. If net profit margin is 5.0 percent, rate of asset turnover is 4.0x, and financial leverage is 2.0x, then return on net worth is:
- 8.0 percent.
  - 10.0 percent.
  - 20.0 percent.
  - 40.0 percent.
  - 80.0 percent.

ANS: D                      PTS: 1                      REF: p. 56                      OBJ: LO 2-1  
STA: MBA: Strategic & systems skills                      LOC: MBA: Strategic & systems skills  
KEY: Bloom's: Application

25. If a retailer has a net profit margin of 3 percent, asset turnover of 4.0x, and financial leverage of 2.0x, then its return on net worth is:
- 6 percent.
  - 8 percent.
  - 12 percent.
  - 24 percent.
  - 48 percent.

ANS: D                      PTS: 1                      REF: p. 56                      OBJ: LO 2-1  
STA: MBA: Strategic & systems skills                      LOC: MBA: Strategic & systems skills  
KEY: Bloom's: Application

26. If a retailer has an ROA of 10 percent and a financial leverage of 4.0, then its RONW would be:
- 0.4 percent.
  - 6 percent.
  - 14 percent.
  - 26 percent.
  - 40 percent.

ANS: E                      PTS: 1                      REF: p. 56                      OBJ: LO 2-1  
STA: MBA: Strategic & systems skills                      LOC: MBA: Strategic & systems skills  
KEY: Bloom's: Application

27. If a retailer with an ROA of 7.0 percent decides to increase its financial leverage ratio from 1.5 times to 2.0 times, which of the following results will occur?
- The retailer's ROA will increase by 33 percent.
  - The retailer's RONW will decrease by 33 percent.
  - The retailer's RONW will go from 10.5 percent to 14.0 percent.
  - The retailer's RONW will increase by .5 percent.
  - The retailer's RONW will increase by 10.5 percent.

ANS: C                      PTS: 1                      REF: p. 56                      OBJ: LO 2-1  
STA: MBA: Strategic & systems skills                      LOC: MBA: Strategic & systems skills  
KEY: Bloom's: Application

28. Specialty stores typically have a \_\_\_\_\_ than discounters.
- lower asset turnover
  - lower profit margin
  - lower return on net worth

- d. lower market share
- e. lower return on net worth and lower market share

ANS: A                      PTS: 1                      REF: p. 57                      OBJ: LO 2-1  
STA: MBA: Strategic & systems skills                      LOC: MBA: Strategic & systems skills  
KEY: Bloom's: Knowledge

29. When a retailer uses productivity objectives, it is referring to the productivity of which resources?
- a. Market comparison, profitability, productivity
  - b. Net worth, financial leverage, and asset turnover
  - c. Sales, merchandise, and owner's equity
  - d. Space, labor, and merchandise
  - e. space, owner's equity, and merchandise

ANS: D                      PTS: 1                      REF: p. 57                      OBJ: LO 2-1  
STA: MBA: Strategic & systems skills                      LOC: MBA: Strategic & systems skills  
KEY: Bloom's: Knowledge

30. Merchandise productivity:
- a. is net sales divided by the total square feet of retail floor space.
  - b. states how many dollars in sales the retailer wants to generate for each square foot of store space.
  - c. is net sales divided by the number of full-time–equivalent employees.
  - d. reflects how many dollars in sales the retailer desires to generate for each full-time–equivalent employee.
  - e. is net sales divided by the average dollar investment in inventory.

ANS: E                      PTS: 1                      REF: p. 58                      OBJ: LO 2-1  
STA: MBA: Strategic & systems skills                      LOC: MBA: Strategic & systems skills  
KEY: Bloom's: Knowledge

31. A retail firm that is setting goals based on its desire to help society fulfill some of its needs is developing \_\_\_\_\_ objectives.
- a. personal
  - b. self-respect
  - c. financial benefit
  - d. self-esteem
  - e. societal

ANS: E                      PTS: 1                      REF: p. 58                      OBJ: LO 2-1  
STA: MBA: Strategic & systems skills                      LOC: MBA: Strategic & systems skills  
KEY: Bloom's: Knowledge

32. You have recently been hired by a small retailer in your area. During a discussion with the owner, you notice that the owner's primary objective for being in business is to provide the customer with a real alternative. The owner is primarily using a \_\_\_\_\_ objective to focus the business.
- a. market performance
  - b. financial performance
  - c. societal
  - d. personal
  - e. self-esteem

ANS: C                      PTS: 1                      REF: p. 59                      OBJ: LO 2-1  
STA: MBA: Strategic & systems skills                      LOC: MBA: Strategic & systems skills  
KEY: Bloom's: Application

33. The manager of a department store chose to use a percentage of the year's profits to help fund the Salvation Army's Thanksgiving Dinner for the Homeless. In reference to this sponsorship, the manager appears to have set what kind of objective?
- Benefactor objective
  - Self-gratification objective
  - Financial performance objective
  - Status and respect objective
  - Personal objective

ANS: A                      PTS: 1                      REF: p. 59                      OBJ: LO 2-1  
STA: MBA: Strategic & systems skills      LOC: MBA: Strategic & systems skills  
KEY: Bloom's: Application

34. Chandler Markus is the store manager for a large discount drugstore. Chandler allows his department managers to arrange the fixtures and schedule their employees as they see fit. According to Chandler's actions, the drugstore has set what kind of objective?
- Benefactor objective
  - Power and authority objective
  - Space productivity objective
  - Employee-centered objective
  - Employee empowerment

ANS: B                      PTS: 1                      REF: p. 62                      OBJ: LO 2-1  
STA: MBA: Strategic & systems skills      LOC: MBA: Strategic & systems skills  
KEY: Bloom's: Application

35. Which of the following refers to a retailer's "traffic strategy"?
- Having the right merchandise, using the right layout and display, and having the right sales force
  - Providing the appropriate level of service that the customers expect
  - Getting shoppers and converting them into customers at the lowest operating cost possible
  - Converting shoppers into customers by having them purchase merchandise
  - Getting shoppers into the store

ANS: E                      PTS: 1                      REF: p. 64                      OBJ: LO 2-1  
STA: MBA: Strategic & systems skills      LOC: MBA: Strategic & systems skills  
KEY: Bloom's: Knowledge

36. Closure strategy is:
- often referred to as a "retailer's cost management" strategy.
  - just getting shoppers into the store.
  - getting shoppers in the store and converting them into customers at the lowest operating cost possible.
  - often referred to as a retailer's traffic strategy.
  - having the right merchandise, using the right layout and display, and having the right sales force.

ANS: E                      PTS: 1                      REF: p. 64-65                      OBJ: LO 2-1  
STA: MBA: Strategic & systems skills      LOC: MBA: Strategic & systems skills  
KEY: Bloom's: Knowledge

37. A "retailer's cost management" strategy refers to:
- getting shoppers into the store.
  - having the right merchandise, using the right layout and display, and having the right sales

force.

- c. the small size of the retailers' stores which gives these advantages in negotiating leases in an industry with a surplus of stores, thus reducing their operating costs.
- d. having a low marginal cost, where the cost of selling one more unit does not significantly impact total costs, thus making them want to maximize revenue.
- e. getting shoppers and converting them into customers at the lowest operating cost possible that is consistent with the level of service that customers expect.

ANS: E                      PTS: 1                      REF: p. 65                      OBJ: LO 2-1  
STA: MBA: Strategic & systems skills      LOC: MBA: Strategic & systems skills  
KEY: Bloom's: Knowledge

38. The analysis that provides management with a critical view of the organization's position relative to its internal and external environment is known as:
- a. SWOT analysis.
  - b. strategic window analysis.
  - c. leverage analysis.
  - d. retail audit.
  - e. opportunities awareness.

ANS: A                      PTS: 1                      REF: p. 68                      OBJ: LO 2-1  
STA: MBA: Strategic & systems skills      LOC: MBA: Strategic & systems skills  
KEY: Bloom's: Knowledge

39. When a retailer is attempting to determine its major advantage(s) over competitors, it is analyzing its:
- a. strengths.
  - b. weaknesses.
  - c. opportunities.
  - d. threats.
  - e. operations.

ANS: A                      PTS: 1                      REF: p. 68                      OBJ: LO 2-1  
STA: MBA: Strategic & systems skills      LOC: MBA: Strategic & systems skills  
KEY: Bloom's: Application

40. If a retailer is assessing the remodeling needs of its stores, as well as evaluating the effect that the lack of a formal training program is having on the management of its establishments, the retailer is reviewing the firm's:
- a. strengths.
  - b. weaknesses.
  - c. opportunities.
  - d. threats.
  - e. operations.

ANS: B                      PTS: 1                      REF: p. 68                      OBJ: LO 2-1  
STA: MBA: Strategic & systems skills      LOC: MBA: Strategic & systems skills  
KEY: Bloom's: Application

41. If a retailer is attempting to determine which of the closely related areas of business are underdeveloped in its market, it is assessing its:
- a. strengths.
  - b. weaknesses.
  - c. opportunities.
  - d. threats.
  - e. operations.

ANS: C                   PTS: 1                   REF: p. 68-69           OBJ: LO 2-1  
STA: MBA: Strategic & systems skills    LOC: MBA: Strategic & systems skills  
KEY: Bloom's: Application

42. If a retail firm is attempting to determine the potential negative effects of a new competitor entering the market, it is assessing its:
- strengths.
  - weaknesses.
  - opportunities.
  - threats.
  - operations.

ANS: D                   PTS: 1                   REF: p. 69               OBJ: LO 2-1  
STA: MBA: Strategic & systems skills    LOC: MBA: Strategic & systems skills  
KEY: Bloom's: Application

43. \_\_\_\_\_ signify what the retailer wants to accomplish, while \_\_\_\_\_ indicate how the retailer will attempt to achieve them.
- Objectives; mission statements
  - Mission statements; plans
  - Strategies; plans
  - Objectives; strategies
  - Action plans; strategies

ANS: D                   PTS: 1                   REF: p. 69               OBJ: LO 2-1  
STA: MBA: Strategic & systems skills    LOC: MBA: Strategic & systems skills  
KEY: Bloom's: Knowledge

44. A fully-developed retail marketing strategy specifies the:
- level of financial performance sought and mix of financial statement components.
  - specific target market sought, location, the specific retail mix to be used, and the retailer's value proposition.
  - consumer and channel member behavior.
  - prices of goods to be sold.
  - retail mix to be used, specific target market sought, and budget available.

ANS: B                   PTS: 1                   REF: p. 69               OBJ: LO 2-1  
STA: MBA: Strategic & systems skills    LOC: MBA: Strategic & systems skills  
KEY: Bloom's: Comprehension

45. A retailer's retail mix consists of all of the following EXCEPT:
- location.
  - price.
  - customer service and selling.
  - traffic strategy.
  - merchandise.

ANS: D                   PTS: 1                   REF: p. 72               OBJ: LO 2-1  
STA: MBA: Strategic & systems skills    LOC: MBA: Strategic & systems skills  
KEY: Bloom's: Comprehension

46. The retailer's \_\_\_\_\_ is a clear statement of the tangible and intangible results a customer receives from using the retailer's products or services.
- mission statement

- b. customer interaction tracker
- c. value proposition
- d. customer type indicator
- e. vision statement

ANS: C                      PTS: 1                      REF: p. 74                      OBJ: LO 2-1  
STA: MBA: Strategic & systems skills      LOC: MBA: Strategic & systems skills  
KEY: Bloom's: Knowledge

47. Which of the following is an incorrect statement regarding strategic planning?
- a. A short-term commitment of resources is required by strategic planning.
  - b. The strategic planning process is started by assessing the external environment.
  - c. Effective strategic planning can aid a retailer in contending with competitors.
  - d. Strategic planning takes into consideration how a retailer responds to the environment.
  - e. Ineffective strategic planning can lead to a decrease in a retailer's level of profitability.

ANS: A                      PTS: 1                      REF: p. 74-75                      OBJ: LO 2-2  
STA: MBA: Strategic & systems skills      LOC: MBA: Strategic & systems skills  
KEY: Bloom's: Comprehension

48. Most smaller retailers have more control over this important factor for successes than larger retailers:
- a. promotional strategy.
  - b. location.
  - c. personnel.
  - d. service levels.
  - e. credit policies.

ANS: B                      PTS: 1                      REF: p. 74-75                      OBJ: LO 2-2  
STA: MBA: Strategic & systems skills      LOC: MBA: Strategic & systems skills  
KEY: Bloom's: Knowledge

49. The aim of operations management is to:
- a. heighten customer service.
  - b. advance the merchandise mix.
  - c. maximize the performance of current operations.
  - d. develop more effective long-term plans.
  - e. increase a product's perceived value to the customer.

ANS: C                      PTS: 1                      REF: p. 77                      OBJ: LO 2-2  
STA: MBA: Strategic & systems skills      LOC: MBA: Strategic & systems skills  
KEY: Bloom's: Knowledge

50. It is necessary for retail firms to strive for high-profit performance results:
- a. so that average operating results can be obtained even if planned results cannot be accomplished.
  - b. as a means of achieving the largest profit possible.
  - c. a retailer need not strive for high profit performance results.
  - d. so that new retailer entrepreneurs cannot enter the market.
  - e. so that the managers can be allocated larger year-end bonuses.

## ESSAY

1. When setting goals and objectives, a retailer has a variety of objectives from which to choose. Please list and explain these objectives. How will each of these objectives influence the way in which the retailer conducts its operations?

ANS:

Retailers usually divide goals and objectives into two dimensions: (1) market performance, which compares a firm's actions to its competitor's; and (2) financial performance, which analyzes the firm's ability to provide a profit level adequate to continue in business. In addition to the market performance and financial performance objectives, some retailers may also establish (3) societal objectives, which are phrased in terms of helping society fulfill some of its needs; and (4) personal objectives, which relate to helping people employed in retailing to fulfill some of their needs.

**Market Performance Objectives:** Market performance objectives establish the amount of dominance the retailer seeks in the marketplace. The most popular measures of market performance are sales volume and market share. Profitability is clearly and positively related to market share. Market performance objectives are pursued because they are a key profit path.

**Financial Objectives:** Retailers can establish many financial objectives, but they can all be fit into categories of profitability and productivity.

- **Profitability Objectives:** Profit-based objectives deal directly with the monetary return a retailer desires from its business. The most common way to define profit is the aggregate total of net profit after taxes. Another retail method of expressing profit is as a percentage of net sales. However, most retail owners feel the best way to define profit is in terms of return on investment (ROI). The strategic profit model (SPM) is a tool used to assess a firm's profitability. It contains five elements that include net profit margin, asset turnover, return on assets (ROA), financial leverage, and return on net worth (RONW). Another measure of profitability is the gross margin percentage, which is gross margin divided by net sales.
- **Productivity Objectives:** Productivity objectives state how much output the retailer desires for each unit of resource input. The major resources at the retailer's disposal are space, labor, and merchandise. Productivity objectives are vehicles by which a retailer can program its business for high-profit results. In short, productivity is a key determinant of profit in retailing.

**Societal Objectives:** Societal objectives highlight the retailer's concern with broader issues in society. The five most frequently cited societal objectives are employment objectives, payment of taxes, consumer choice, equity, and being a benefactor.

**Personal Objectives:** Personal objectives can relate to the personal goals of any of the employees, managers, or owners of the retail establishment. Generally, retailers tend to pursue three types of personal objectives: self-gratification, status and respect, and power and authority.

The retailer has to consider his/her objective(s) while deciding upon the retail strategy involving the retail mix, promotion, location, and so on.

KEY: Bloom's: Synthesis

2. Explain the strategic profit model (SPM).

ANS:

The most frequently encountered profit objectives for a retailer are shown in the strategic profit model (SPM), a tool used to assess a firm's profitability. The five elements of the SPM elements include net profit margin, asset turnover, return on assets, financial leverage, and return on net worth.

- Net profit margin is the ratio of net profit (after taxes) to net sales. It shows how much profit a retailer makes on each dollar of sales after all expenses and taxes have been met.
- Asset turnover is computed by taking the retailer's annual net sales and dividing by total assets. This ratio shows how productively the firm's assets are being used.
- Return on assets (ROA), which is annual net profit divided by total assets, depicts the net profit return the retailer achieved on all assets invested regardless of whether the assets were financed by creditors or by the firm's owners. ROA is the result of multiplying the net profit margin by asset turnover.
- Financial leverage is total assets divided by net worth or owners' equity. This ratio shows the extent to which a retailer is using debt in its total capital structure.
- Return on net worth (RONW) is net profit divided by net worth or owner's equity. Return on net worth is usually used to measure owner's performance. The ROA multiplied by financial leverage yields RONW.

 STA: MBA: Strategic & systems skills                      LOC: MBA: Strategic & systems skills  
 KEY: Bloom's: Evaluation

3. Discuss the components of SWOT analysis used by a retailer. What primary objection would a retailer have for conducting a SWOT analysis?

ANS:

A SWOT analysis (SWOT for strengths, weaknesses, opportunities, and threats), involves asking the following questions.

Strengths:

- What major competitive advantage(s) do we have?
- What are we good at?
- What do customers perceive as our strong points?

Weaknesses:

- What major competitive advantage(s) do competitors have over us? What are competitors better at than we are?
- What are our major internal weaknesses?

Opportunities:

- What favorable environmental trends may benefit our firm?
- What is the competition doing in our market?
- What areas of business that are closely related to ours are undeveloped?

Threats:

- What unfortunate environmental trends may hurt our future performance?
- What technology is on the horizon that may soon have an impact on our firm?

Primary objection for conducting SWOT analysis would be for a retailer who wants to develop a strategy to differentiate itself starts with an analysis of the retailer's strengths and weaknesses as well as the threats and opportunities that exist in the environment.

4. Success in retailing is a function of strategic planning and operations management. Please explain the retail strategic planning and operations management model and the ways a retailer can employ this model in a globally competitive environment.

ANS:

Exhibit 2.6 provides the strategic planning and operations management model. Strategic planning involves adapting the resources of the firm to the opportunities and threats of an ever-changing retail environment. Considering the strategic plan, it involves the development of a mission statement for the firm, definition of specific goals and objectives for the firm, SWOT analysis, and development of basic strategies that will enable the firm to reach its objectives and fulfill its mission. It profiles the major environmental forces that should be assessed. Briefly, these are consumer behavior, competitor behavior, supply chain behavior, the socioeconomic environment, the technological environment, and the legal and ethical environment. Operations management is concerned with maximizing the efficiency of the retailer's use of resources and with how the retailer converts these resources into sales and profits. Regardless, when a retailer is able to do a good job at operations management, then the retailer is said to be operations effective. The need to strive for a high profit is tied to the extremely competitive nature of retailing. While concerning a globally competitive environment, consumer behavior, competitor behavior, supply chain behavior, the socioeconomic environment, the technological environment, and the legal and ethical environment should be taken into consideration.

STA: MBA: Strategic & systems skills                      LOC: MBA: Strategic & systems skills  
KEY: Bloom's: Synthesis

5. What are the major environmental forces that should be constantly assessed by retailers?

ANS:

The major environmental forces that should be constantly assessed by retailers are:

- Consumer behavior: The retailer will need to understand the determinants of shopping behavior so that it can identify likely changes in that behavior and develop appropriate strategies.
- Competitor behavior: Retailers must develop a competitive strategy that is not easily imitated, which happens all too often with price cuts.
- Supply chain behavior: The behavior of members of the retailer's supply chain can have a significant impact on the retailer's future.
- Socioeconomic environment: The retailer must understand how economic and demographic trends will influence revenues and costs in the future and adapt its strategy according to these changes.
- Technological environment: The technical frontiers of the retail system encompass new and better ways of performing standard retail functions. The retailer must always be aware of opportunities for lowering operating costs.
- Legal and ethical environment: The retailer should be familiar with local, state, and federal regulations of the retail system. It must also understand evolving legal patterns in order to be able to design future retail strategies that are legally defensible. At the same time, the retailer must operate at the highest level of ethical behavior.
