MULTIPLE CHOICE BANK

Chapter 2: Strategy, Competitive Forces and Positioning

Below are a number of multiple choice questions relevant to this chapter. There are two to three variations on the same questions. Each question has four options; the correct answer is written in the final column. Some questions are very simple, while others are much more difficult; this should be taken into account when setting quizzes or exams.

Example of possible instruction to students:

For each of the following questions, read each question carefully and then choose the answer you believe is *most* correct:

Questi	on and options	#	Ans.
What is	s part of a firm's business environment?	1	d
a.	Market environment		
b.	Legal frameworks		
c.	Institutional structures		
d.	All of the above		
organiz	gists refer to as factors shaping for the zation's goods and services in the environments in which the zation operates.	2	b
a.	properties/demand		
b.	demand drivers/demand		
c.	technology drivers/goals		
d.	properties/objectives		
firms o	are relationships with other entities, such as competing r government.	3	b
a.	Competitive relationships		
b.	Horizontal relationships		
c.	Thorough relationships		
d.	Vertical relationships		

a. Vertical relationships b. Horizontal relationships c. Governmental relationships d. Institutional relationships =takes an external perspective and is concerned with the industry within which firms operate and behave as producers, sellers and buyers of goods and services. a. Resource-based view b. Value chain c. Industrial organization d. Macro economics According to industrial organization theory, which factor does NOT influence market structure? a. Supply conditions b. Demand for a product c. Manufacturing base of the leading firm d. The degree of differentiation of products refers to the characteristics of the product and is the way through which firms improve the quality of their offerings over time (usually by means of innovation). a. Product differentiation b. Augmented product c. Core product d. Product development What do we call firms that invest in a variety of different product markets to reduce exposure to risk in single product markets? a. Investment firms b. Diversified firms c. Monopolies d. Oligopolies		are about the management of suppliers and buyers.	4	а
c. Governmental relationships d. Institutional relationships takes an external perspective and is concerned with the industry within which firms operate and behave as producers, sellers and buyers of goods and services. a. Resource-based view b. Value chain c. Industrial organization d. Macro economics According to industrial organization theory, which factor does NOT influence market structure? a. Supply conditions b. Demand for a product c. Manufacturing base of the leading firm d. The degree of differentiation of products refers to the characteristics of the product and is the way through which firms improve the quality of their offerings over time (usually by means of innovation). a. Product differentiation b. Augmented product c. Core product d. Product development What do we call firms that invest in a variety of different product markets to reduce exposure to risk in single product markets? a. Investment firms b. Diversified firms c. Monopolies	a.	Vertical relationships		
d. Institutional relationships	b.	Horizontal relationships		
takes an external perspective and is concerned with the industry within which firms operate and behave as producers, sellers and buyers of goods and services. a. Resource-based view b. Value chain c. Industrial organization d. Macro economics According to industrial organization theory, which factor does NOT influence market structure? a. Supply conditions b. Demand for a product c. Manufacturing base of the leading firm d. The degree of differentiation of products refers to the characteristics of the product and is the way through which firms improve the quality of their offerings over time (usually by means of innovation). a. Product differentiation b. Augmented product c. Core product d. Product development What do we call firms that invest in a variety of different product markets to reduce exposure to risk in single product markets? a. Investment firms b. Diversified firms c. Monopolies	c.	Governmental relationships		
industry within which firms operate and behave as producers, sellers and buyers of goods and services. a. Resource-based view b. Value chain c. Industrial organization d. Macro economics According to industrial organization theory, which factor does NOT influence market structure? a. Supply conditions b. Demand for a product c. b. Business cycles	a.	Exchange rates		
	b.	Business cycles		

C.	Economic growth rates		
d.	All of the above		
Socioc	ultural macro-environmental influences incorporate:	24	d
a.	Changing cultures and demographics		
b.	Urbanism		
c.	Gender relations		
d.	All of the above		
Legal r	macro-environmental influences incorporate:	25	С
a.	Legislative constraints such as health and safety legislation		
b.	Equal opportunity directives		
c.	Both of the above		
d.	None of the above		
Marke compe	t describes the state of a market with respect to etition.	26	а
a.	structure		
b.	process		
c.	dynamism		
d.	All of the above		
Which	of the following is NOT one of the basic market structures?	27	d
a.	The homogeneous or pure market		
b.	The monopoly		
c.	The oligopoly		
d.	The duopoly		
In a ho	omogeneous or pure market, what is it relatively easy for a firm	28	а
a.	Imitate success almost immediately		
b.	Conquer the market		
C.	Gain access to capital		
d.	All of the above		
-	are market, the only distinguishing variable that a firm can use to rantage is	29	b
a.	Product superiority		

b. Relative price		
c. Technological know-how		
d. None of the above		
is characterized by a number of players acting in relatively predictable and coordinated ways to supply products and services.	30	а
a. Oligopoly/limited		
b. Free market economy/limited		
c. Duopoly/large		
d. Free market economy/huge		
occurs when competitors within an industry cooperate illegally for mutual benefit.	31	а
a. Collusion		
b. Bribery		
c. Corruption		
d. None of the above		
depicts a market in which the sources of competitive advantage can change quickly, and maintaining above-average profits over a long time is difficult.	32	a
a. Hypercompetition		
b. Low-level competition		
c. High-level competition		
d. Oligopoly		
Which force is NOT part of Porter's five forces model?	33	С
a. Deregulation		
b. Globalization		
c. a and b		
d. Barriers to entry		
is an economic term used to describe a situation where a firm's assets are highly specialized and, therefore, cannot easily be sold to other buyers in another industry.	34	a
a. Asset specificity		
b. Asset allocation		

C.	Asset dominance		
d.	Asset toxicity		
or sim	_ are a group of firms in the same industry that follow the same, ilar, strategies.	35	С
a.	Strategic partners		
b.	Cooperating firms		
c.	Strategic groups		
d.	Strategic networks		
What	is NOT part of Porter's generic strategies?	36	a
a.	Diversification		
b.	Cost leadership		
c.	Focus		
d.	Differentiation		

Chapter 2 ESSAY QUESTIONS

This section comprises five essay questions. The answers should reflect the students' knowledge of the topic area learned in class, through their readings and through other sources. Good students will demonstrate their ability to reflect on, and critique, key ideas or issues. These questions can be incorporated into a mid-term or end-of-semester exam. Conversely, the questions can be assigned as a take-home essay assignment. The length of the expected answer will vary accordingly, but typically expect 2–3 pages in an exam setting, and request 2,000 words or more in a take-home essay assignment.

- a. Discuss the foundations and developments of the SCP paradigm.
- b. What are the factors that might explain variations in organization performance in an industry?
- c. Describe the role and characteristics of the forces described in Porter's five forces model.
- d. Critically evaluate the value of Porter's generic strategies for understanding strategy.
- e. What are the characteristics of the value chain and how does the chain help us to understand strategy?
